**Dixie Road Noise Wall (West Side)
from Howden Boulevard to North Park Drive, City of
Brampton
Project 10-4020**

PROJECT UPDATE:

Regarding the above mentioned project, the Region would like to provide the following update.

We will be extending the construction contract (2021-571T) for this project to include select properties backing on to Dixie Road (see list attached), on the West side, from Howden Boulevard to North Park Drive. There is an upcoming large watermain project that will be commencing within the project limits around June of this year. That project will be constructed using tunnel boring technology, to keep most of the construction underground to avoid open cutting for the work. Consequently, there are a number of locations along Dixie Road where there will be large tunnel shaft compounds for the watermain project. At this time, we will be focussing on constructing segments of the new noise wall at the properties that will be adjacent to these tunnel shaft compounds (you will receive information specific to the watermain project closer to the start date). The remaining properties will have the noise wall installed at a later date (to be confirmed). For those properties not receiving the new noise wall at this time, please note that the Region remains committed to completing all outstanding segments in a timely manner.

Please see the attached a list of properties that back onto the tunnel compound locations where we intend to complete the noise wall at this time.

We'd like to remind you that, in order to complete the Works, the Contractor will require short-term, intermittent access to your Property, to conduct one or more of the following tasks:

- Remove any remaining vegetation, fencing and other improvements at the rear (and/or side) of your Property;
- Construct temporary fencing to isolate the required construction area from the remainder of the rear yard;
- Construct the Noise Wall; and
- Restore any impacted areas

What are we doing during construction?

- Replacement of existing private noise wall/fence with a new Region-owned noise wall to improve noise mitigation. The work includes, but is not limited to:
 - removal and disposal of existing noise wall and/or fence;
 - installation of new noise wall;
 - extension of existing backyard fences to new noise wall;
 - restoration; and
 - minor related works.

Where? Dixie Rd Noise Wall (West Side) from Howden Boulevard to North Park Drive

When?

- Construction Start: March 12, 2024
- Construction Finish: end of June 2024, weather permitting

Project Updates

- The Region of Peel will keep you informed of any substantial changes in the project scope or schedule.
- We are committed to ensuring minimum disruption to your homes.
- Please call the project manager or inspector if you have any special needs.
