On March 11, 2020, the World Health Organization (WHO) declared COVID-19 a global pandemic. COVID-19 is a new type of coronavirus that can cause acute respiratory illness. It is spread person-to-person through droplets (e.g., coughing, sneezing) that can travel up to two metres. It may also be possible for a person to get the virus by touching contaminated surfaces and then touching their mouth, nose or eyes. Symptoms have ranged from mild to severe, and commonly include fever, cough and shortness of breath.
