  - Topic: A re-orientation of PPH programs and services relevant to physicians and healthcare providers
  - Earn up to 2 MainPro+ credits.
- Access Peel health status data online.

**Peel Public Health (PPH) in collaboration with the Mississauga and Central West Primary Care Networks, is hosting a physician and healthcare provider education session.**

The education session aims to reconnect PPH and Peel physicians/health care providers post acute pandemic. This is an opportunity to gain valuable insights into public health programs and services relevant to your practice.

- Details:**
- Session name: Community Health Care Provider Education Session (ID-202871)
  - Date: October 23, 2024.
  - Time: 6:30 to 8:30 p.m.
  - Where: Virtual event (**Microsoft Teams**)
  - Earn 2 MainPro+ credits.
  - Register** for the event.

- Topics covered**
- Peel’s population and their public health needs
  - Public health programs, services, and resources, including referral pathways relevant to physicians and healthcare providers
  - Disease reporting requirements

- Reportable communicable diseases including HIV, rabies, new reportable tick-borne diseases, and other animal bite-related reporting
- Respiratory season immunization updates and vaccine safety
- Common infection prevention and control concerns in community practice
- Oral health programs and services for children and seniors
- Substance use harm reduction services
- Updates on programs for parents of young children

Speakers include Peel Public Health physicians and staff.

**Health status data in Peel**

Peel Public Health acquires, analyzes, and reports data to understand the health of Peel residents. This includes information on population sociodemographics, health status, health behaviours, and health care use. Our population health assessment products include:

- [Interactive Power BI reports](#) – includes data visualizations and key messages.
- [Comprehensive health reports](#) on selected topics.
- [Peel Health Data Zone Information Tool](#) – includes small geographic area data on sociodemographics and health in Peel.
- [Peel Respiratory Virus Activity Report](#) with the current status of COVID-19, influenza, and other respiratory viruses in Peel.
