

Peel Health Data Zone B2

Health Profile 2016

The burden of illness and preventable loss of life arises in large part because of the conditions in which people are born, grow, live, work and age.¹ Peel Health Data Zones (PHDZ) arose out of a need for data at small areas of geography to aid with planning programs and services that will in turn work towards improving public health outcomes. The PHDZ are defined geographic areas within Peel that are smaller than the municipality level, use Census Tracts as the building blocks, and where plausible, respect natural and man-made boundaries.

Description:

PHDZ B2 is located in the middle of Brampton just north of downtown and is mostly residential suburban neighbourhoods (see Map 1).

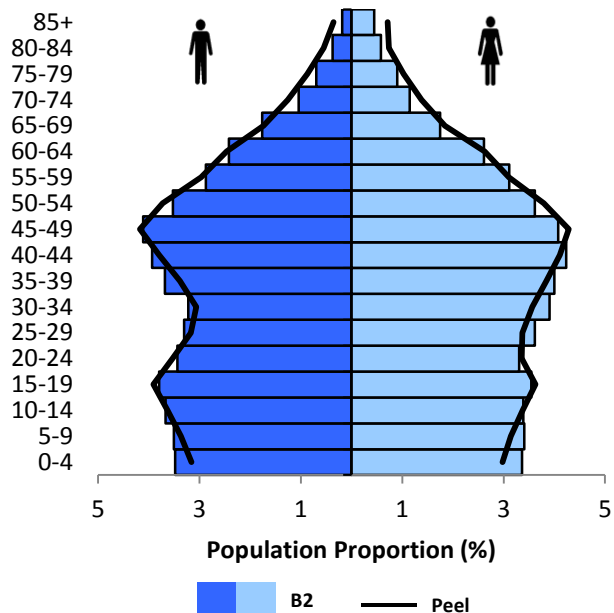

Socio-demographic summary:

B2's population by age group follows closely to Peel's population. The average household income is \$70,645, about \$8,500 lower than Peel's average. B2 has a similar prevalence of low income households (14%) compared to Peel (13%). The top three languages spoken at home are English, Panjabi and Urdu. Forty-nine per cent of B2's population identifies as East Indian, Canadian or English.

Adult Health:

Life expectancy at birth in B2 is similar to that in Peel. The leading causes of death among those 20 years and older in B2 are: ischemic heart disease, lung cancer and stroke. The age standardized rates of mortality for these diseases are higher in B2 compared to Peel. Well over half (65%) of B2 residents are classified as overweight or obese which is higher than Peel (51%). A larger proportion of B2 residents were physically inactive during leisure time (63%) compared to residents in Peel (54%). Significantly more residents were current smokers (22%) compared to Peel (15%).

Population Distribution by Age Group, B2 and Peel, 2011

Population: 77,985

Source: 2011 Census, Statistics Canada

Child health:

A similar proportion of the population aged 0-18 years (19%) are living in low income in B2 compared to Peel (16%). The *general fertility rate* is similar to Peel and the *pre-term live birth rate* is higher in B2 compared to Peel.

SOCIO-DEMOGRAPHIC SUMMARY

Indicator	B2	Peel	Compared to Peel
Population			
Total population	77,985	1,296,815	
Population aged 0-4 years	6.8%	6.1%	Similar
Population aged 5-9 years	6.9%	6.5%	Similar
Population aged 10-14 years	7.1%	7.0%	Similar
Population aged 15-19 years	7.3%	7.5%	Similar
Population aged 20-24 years	6.7%	6.9%	Similar
Population aged 25-29 years	6.9%	6.5%	Similar
Population aged 30-34 years	7.1%	6.6%	Similar
Population aged 35-39 years	7.7%	7.2%	Similar
Population aged 40-44 years	8.2%	7.9%	Similar
Population aged 45-49 years	8.2%	8.5%	Similar
Population aged 50-54 years	7.1%	7.5%	Similar
Population aged 55-59 years	6.0%	6.1%	Similar
Population aged 60-64 years	5.0%	5.1%	Similar
Population aged 65-69 years	3.5%	3.6%	Similar
Population aged 70-74 years	2.2%	2.6%	Similar
Population aged 75-79 years	1.6%	1.9%	Similar
Population aged 80-84 years	1.0%	1.3%	Similar
Population aged 85+ years	0.6%	1.1%	Lower
Language/Immigration			
Knowledge of official language – neither English nor French	3.4%	3.9%	Similar
Immigration status – Immigrants	44.9%	50.5%	Similar
Time period of immigration: immigrated between 2006-2011	15.2%	15.5%	Similar
Education			
Highest level of education achieved (ages 25-64 years), 2011			
Less than high school	14.9%	10.4%	Higher
High school certificate or equivalent	27.8%	23.6%	Similar
Apprenticeship or trades certificate or diploma	8.1%	6.5%	Higher
College, CEGEP or other non-university certificate or diploma	23.9%	21.0%	Similar
University certificate, diploma or degree	25.2%	38.5%	Lower
Income			
Private household after-tax median income	\$64,135	\$68,251	Similar
Private household after-tax average income	\$70,645	\$79,146	Similar
Prevalence of low income in private households (LIM-AT)	14.2%	12.6%	Similar
Less than 18 years	19.0%	16.3%	Similar
Less than 6 years	20.5%	17.1%	Similar
18-64 years	12.9%	12.0%	Similar
65 years and over	10.5%	7.8%	Higher
Tenant households spending 30%+ of household income on shelter cost	44.3%	41.5%	Similar
Owner households spending 30+ of household income on shelter cost	28.8%	28.1%	Similar

Notes:

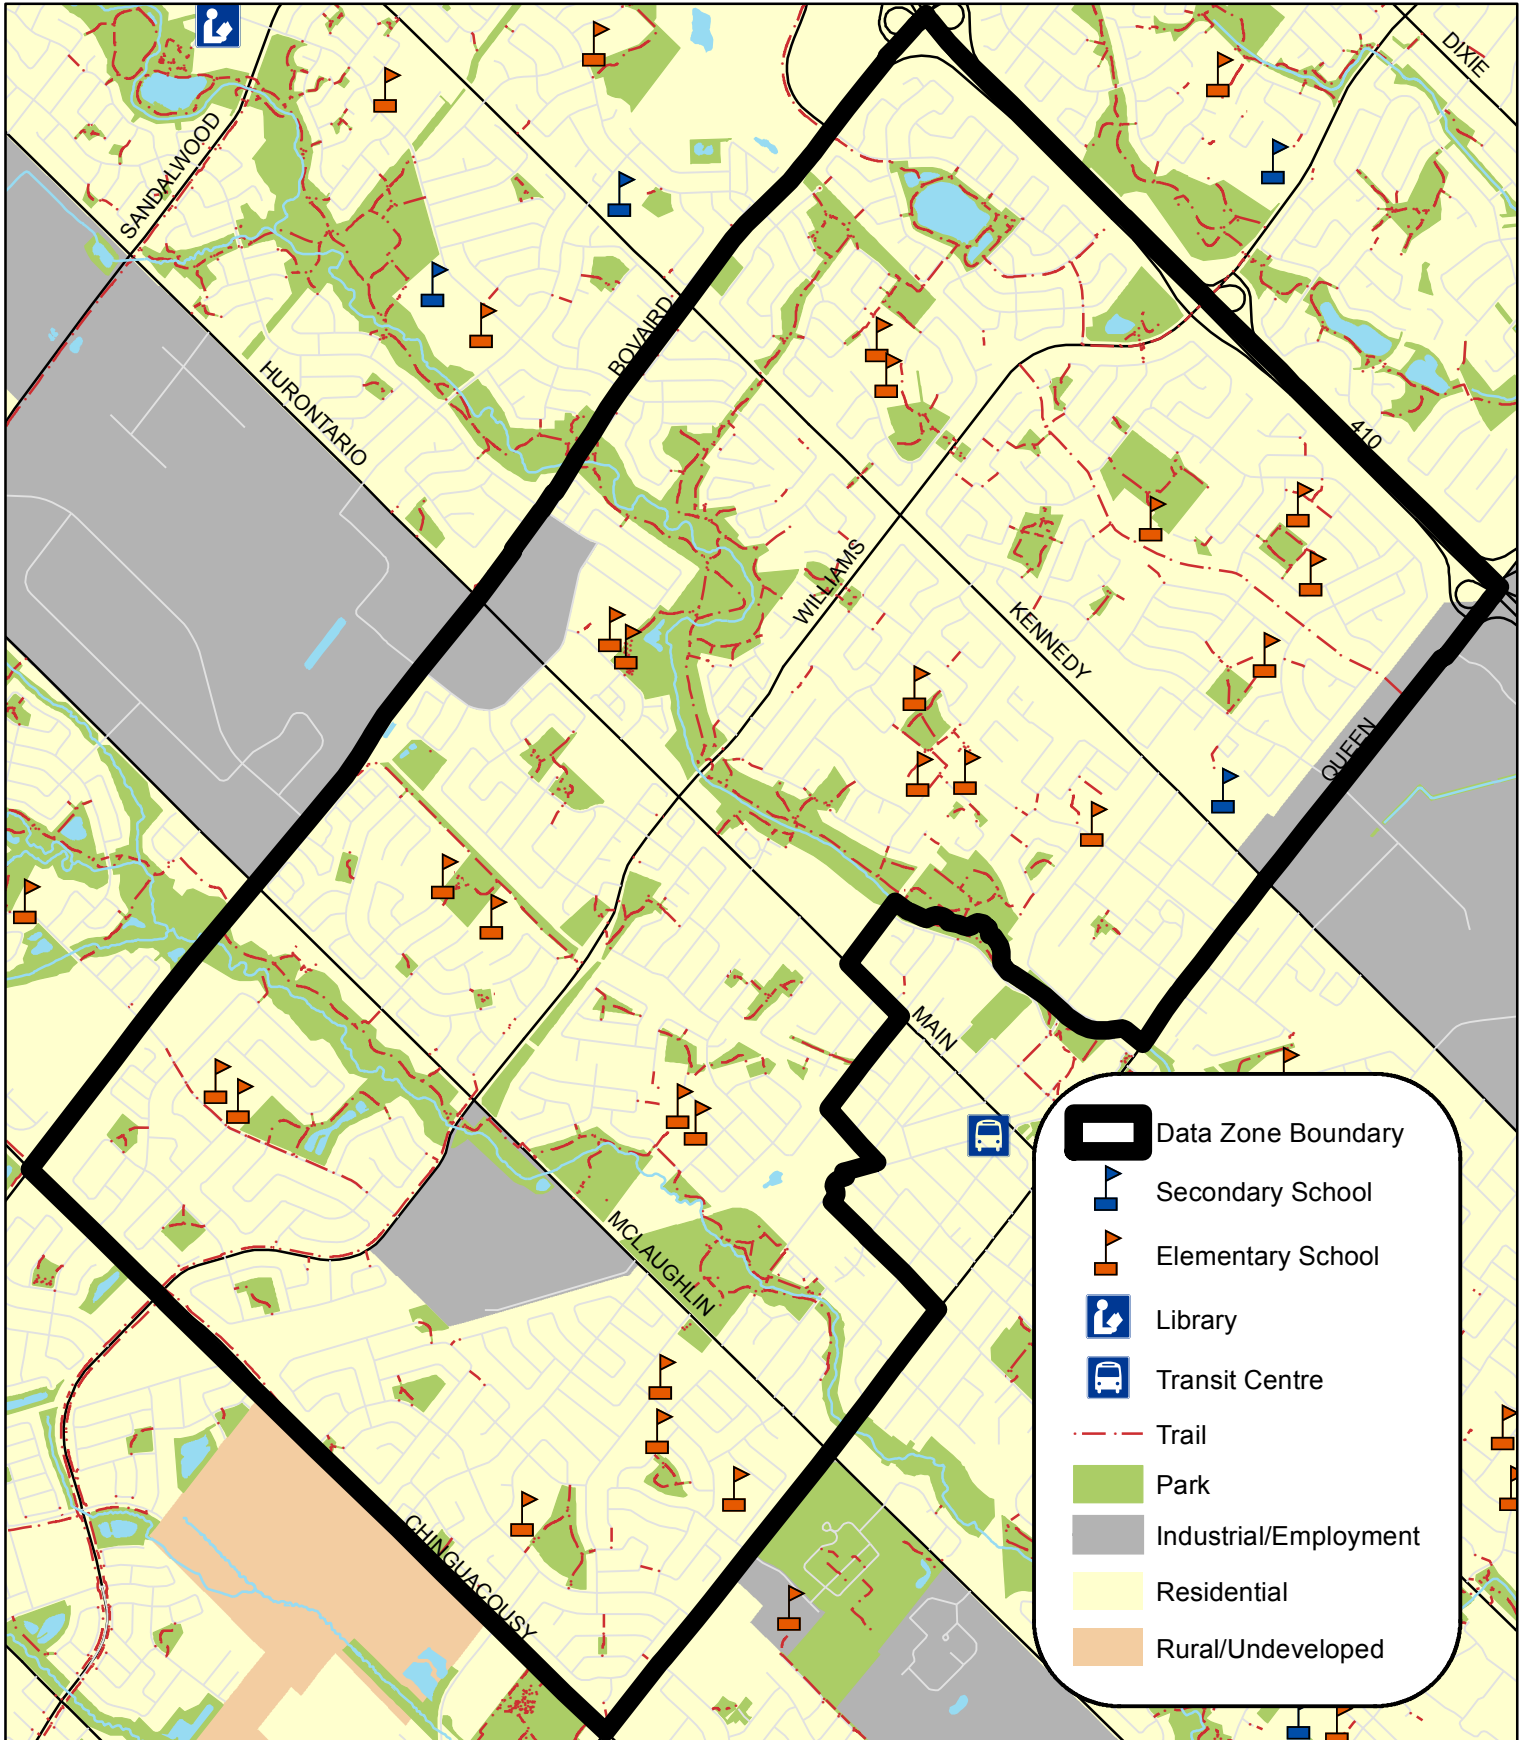

For the Canadian Community Health Survey indicators presented in the tables above the term “lower” or “higher” means the 95% confidence intervals do not overlap between the data zone and Peel and therefore the differences between the estimates are statistically significant.

For the remaining indicators presented in the tables above, the term “lower” or “higher” refer to data zones with a rate that falls 20% above or 20% below the Peel rate.

For more information about these and other health related indicators in Peel please refer to the [Health Status Data](#) website.
