

Peel Health Data Zone M7

Health Profile 2016

The burden of illness and preventable loss of life arises in large part because of the conditions in which people are born, grow, live, work and age.¹ Peel Health Data Zones (PHDZ) arose out of a need for data at small areas of geography to aid with planning programs and services that will in turn work towards improving public health outcomes. The PHDZ are defined geographic areas within Peel that are smaller than the municipality level, use Census Tracts as the building blocks, and where plausible, respect natural and man-made boundaries.

Description:

PHDZ M7 is located in the south-west section of Mississauga and borders Lake Ontario and is made up of mostly residential with some industrial/employment areas (see Map 1).

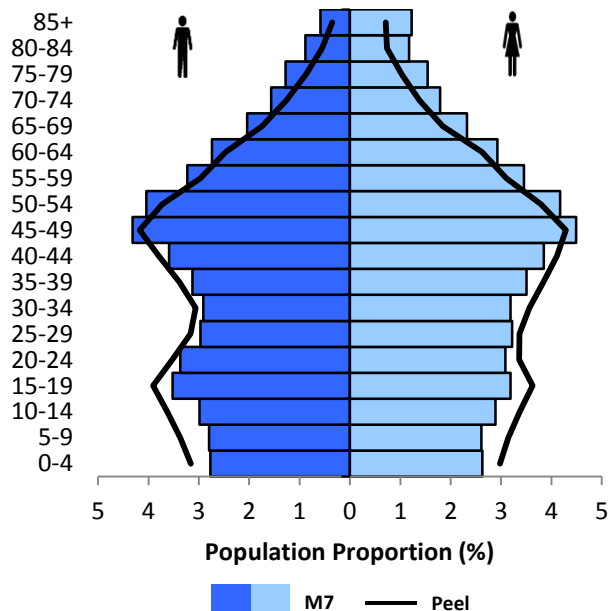

Socio-demographic summary:

A higher proportion of M7's population is aged 30-39 years and 65 years and older compared to Peel. The average household income is \$81,277, about \$2,100 more than Peel's average. M7 has a higher prevalence of low income households (17%) compared to Peel (13%). The top three languages spoken at home are English, Polish and Chinese. Forty-six per cent of M7's population identifies as English, Canadian or Scottish.

Adult Health:

Life expectancy at birth in M7 is similar to that in Peel. The leading causes of death among those 20 years and older in M7 are: ischemic heart disease, dementia and Alzheimer's disease and lung cancer. The age standardized mortality rate for lung cancer is higher in M7 compared to Peel. Just under half of M7 residents are classified as overweight or obese (45%) which is similar to Peel (51%). A higher proportion of residents in M7 were current smokers (23%) compared to Peel (15%).

Population Distribution by Age Group, M7 and Peel, 2011

Population: 107,385

Source: 2011 Census, Statistics Canada

Child health:

A higher proportion of the population aged 0-18 years are living in low income in M7 (20%) compared to Peel (16%). The *infant mortality rate* is higher in M7 compared to the Peel rate.

SOCIO-DEMOGRAPHIC SUMMARY

Indicator	M7	Peel	Compared to Peel
Population			
Total population	107,385	1,296,815	
Population aged 0-4 years	5.4%	6.1%	Similar
Population aged 5-9 years	5.4%	6.5%	Similar
Population aged 10-14 years	5.9%	7.0%	Similar
Population aged 15-19 years	6.7%	7.5%	Similar
Population aged 20-24 years	6.5%	6.9%	Similar
Population aged 25-29 years	6.2%	6.5%	Similar
Population aged 30-34 years	6.1%	6.6%	Higher
Population aged 35-39 years	6.6%	7.2%	Higher
Population aged 40-44 years	7.4%	7.9%	Similar
Population aged 45-49 years	8.8%	8.5%	Similar
Population aged 50-54 years	8.2%	7.5%	Similar
Population aged 55-59 years	6.7%	6.1%	Similar
Population aged 60-64 years	5.7%	5.1%	Similar
Population aged 65-69 years	4.4%	3.6%	Higher
Population aged 70-74 years	3.4%	2.6%	Higher
Population aged 75-79 years	2.8%	1.9%	Higher
Population aged 80-84 years	2.1%	1.3%	Higher
Population aged 85+ years	1.8%	1.1%	Higher
Language/Immigration			
Knowledge of official language – neither English nor French	2.9%	3.9%	Lower
Immigration status – Immigrants	43.6%	50.5%	Similar
Time period of immigration: immigrated between 2006-2011	18.3%	15.5%	Similar
Education			
Highest level of education achieved (ages 25-64 years), 2011			
Less than high school	8.5%	10.4%	Similar
High school certificate or equivalent	23.0%	23.6%	Similar
Apprenticeship or trades certificate or diploma	6.5%	6.5%	Similar
College, CEGEP or other non-university certificate or diploma	21.3%	21.0%	Similar
University certificate, diploma or degree	41.2%	38.5%	Similar
Income			
Private household after-tax median income	\$59,309	\$68,251	Similar
Private household after-tax average income	\$81,277	\$79,146	Similar
Prevalence of low income in private households (LIM-AT)	17.1%	12.6%	Higher
Less than 18 years	20.3%	16.3%	Higher
Less than 6 years	27.2%	17.1%	Higher
18-64 years	17.3%	12.0%	Higher
65 years and over	11.7%	7.8%	Higher
Tenant households spending 30%+ of household income on shelter cost	45.2%	41.5%	Similar
Owner households spending 30+ of household income on shelter cost	24.3%	28.1%	Similar

Notes:

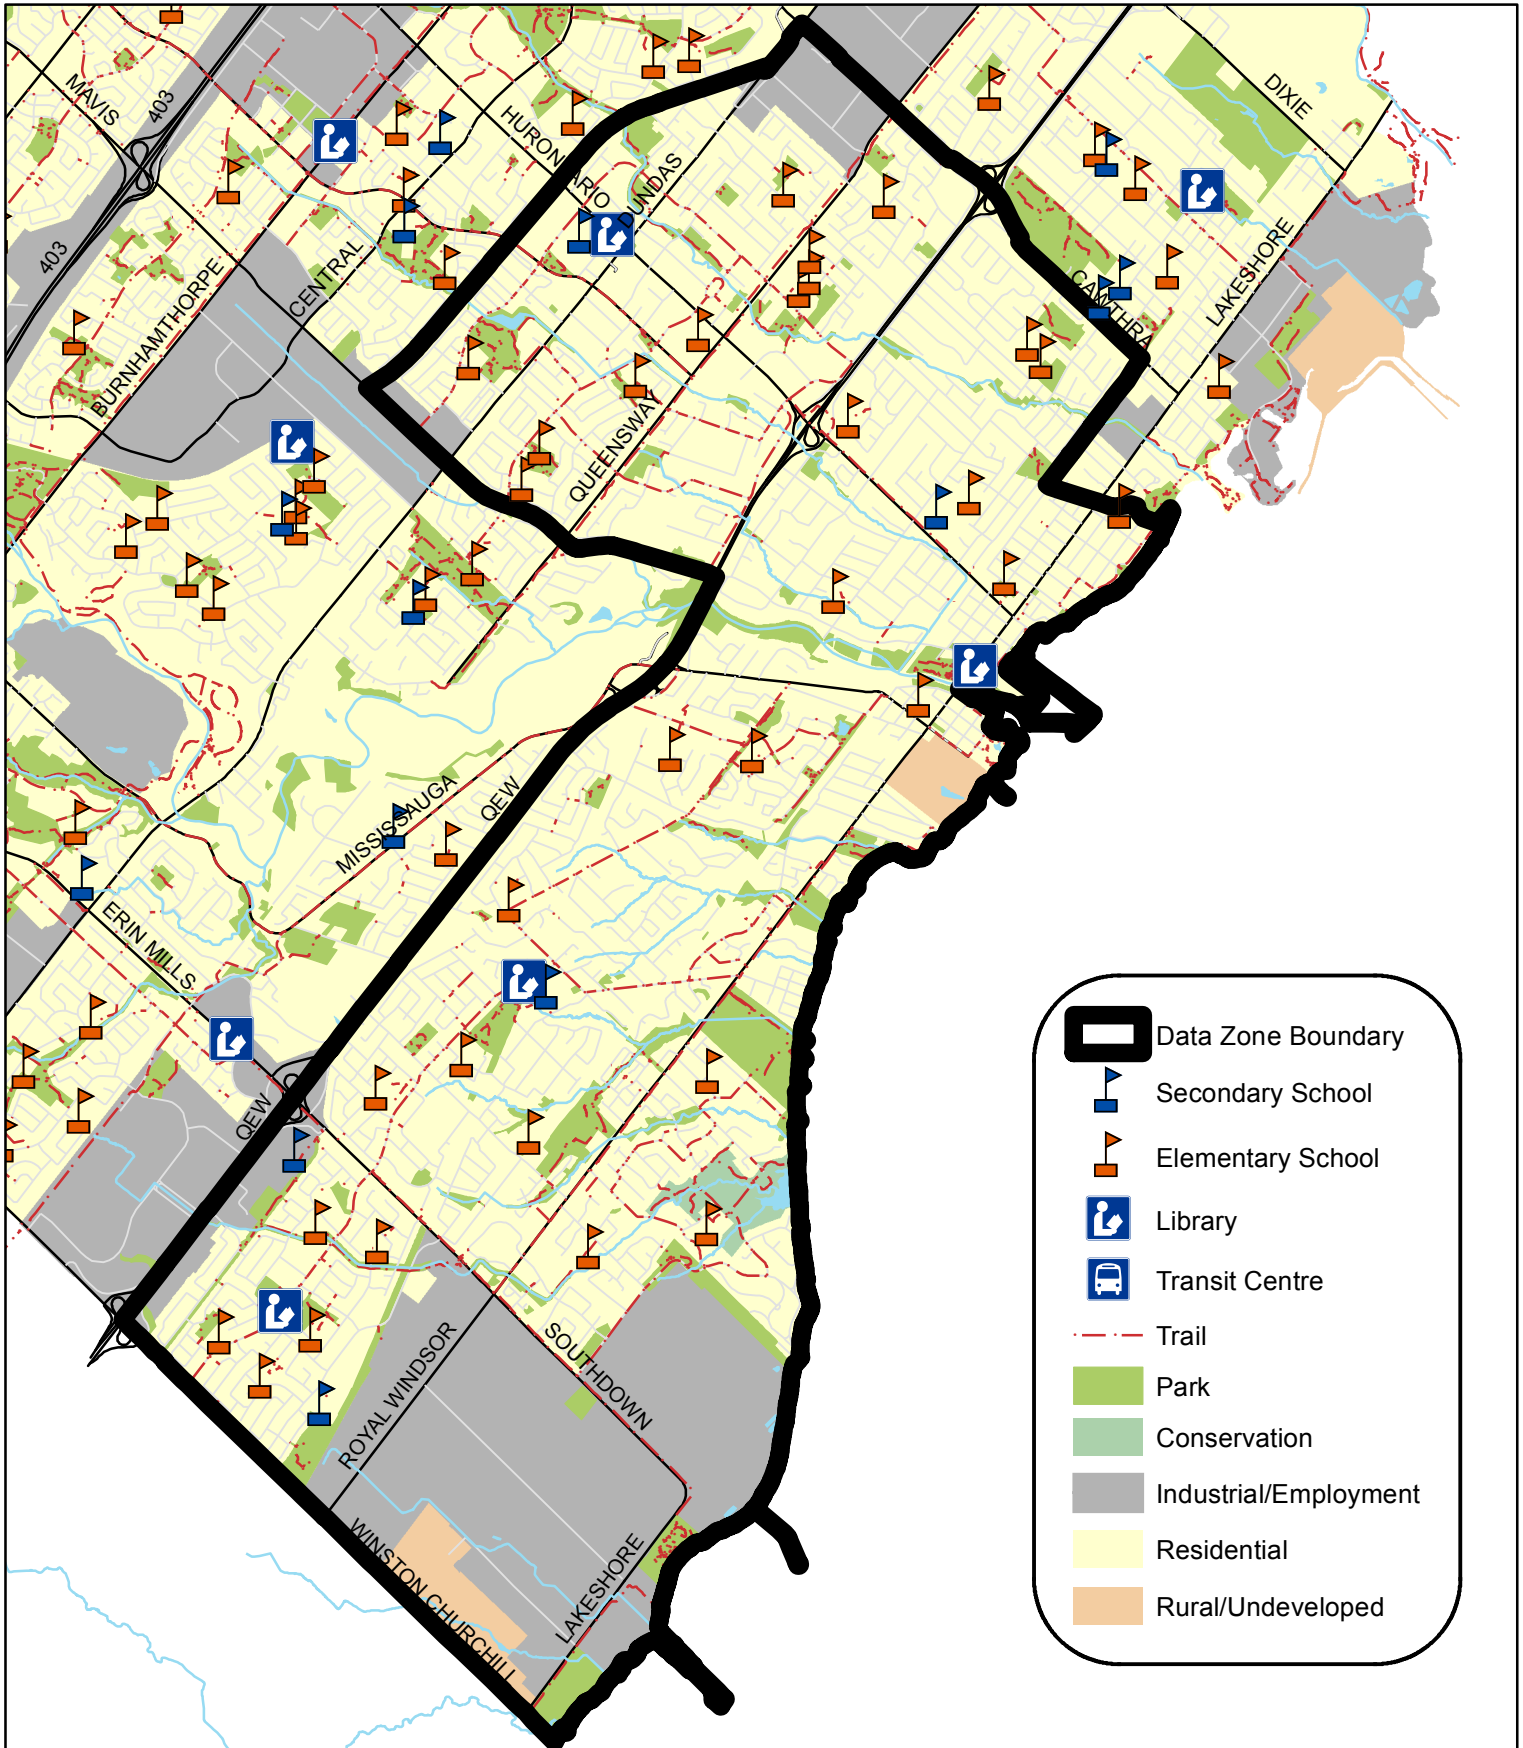

For the Canadian Community Health Survey indicators presented in the tables above the term “lower” or “higher” means the 95% confidence intervals do not overlap between the data zone and Peel and therefore the differences between the estimates are statistically significant.

For the remaining indicators presented in the tables above, the term “lower” or “higher” refer to data zones with a rate that falls 20% above or 20% below the Peel rate.

For more information about these and other health related indicators in Peel please refer to the [Health Status Data](#) website.
