

Burnhamthorpe Water Project

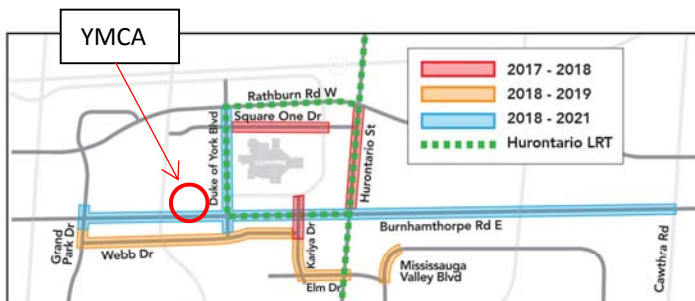

What's New?

July 2018

What's happening in front of your YMCA?

- A 1500mm (5 feet) diameter watermain is being constructed by tunnelling under Burnhamthorpe Road between Grand Park Drive and Cawthra Road.
- As part of this work, we must dig a 26-metre deep shaft in front of the YMCA.
- The acoustic (noise-absorbing) hoarding around the shaft will be about 10 feet high and will be in place until 2021.
- The hoarding should keep most dust within the compound.
- Most noise will occur when we start to excavate the shaft. The deeper we go, the less noise there will be.
- We take pride in our housekeeping and will ensure the work area is kept clean and as attractive as possible.
- When we are finished our work, we will restore the area to its former condition—or even better.
