

Burnhamthorpe Water Project

What's New?

November 5, 2018

WATERMAIN AND SANITARY SEWER REPLACEMENT AND IMPROVEMENT

GRAND PARK DRIVE (Burnhamthorpe Road to Webb Drive), WEBB DRIVE, KARIYA DRIVE (Enfield Place to Elm Drive), MISSISSAUGA VALLEY BOULEVARD, ELM DRIVE WEST (Kariya Drive to Hurontario Street)

CITY OF MISSISSAUGA

What are we doing?

- Replacing and improving the aging watermains and sanitary sewers as shown on the attached map.
- Replacing the water service pipe to your service box.

Why?

- To upgrade the water and sanitary systems' capacity and reliability as part of the Region of Peel's State of Good Repair program.

When?

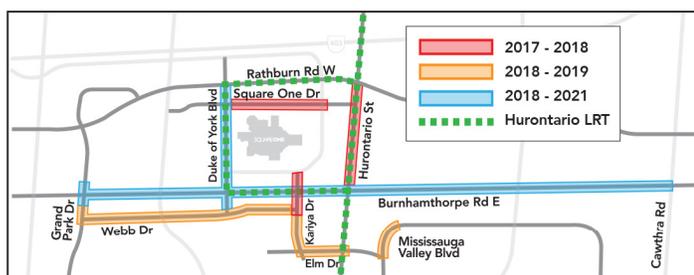

- We expect to start work on or about December 1, 2018, starting at the intersection of Hurontario Street and Elm Street.
- The project should be completed in winter 2019/2020. All work is under warranty for two years from the completion date.
- We will start restoring the road when all water and sanitary system replacements and transfers are complete, and as weather permits.

Working Hours

- Our contractor's normal working hours are from 7 a.m. to 7 p.m. These hours are consistent with the local municipality's bylaws. We understand this may cause some inconvenience, but a shorter working day would mean the project would take longer to complete.

Traffic and Parking Control

- We may need to reduce traffic to a single lane during construction.
- If we have to reroute traffic, we will place signs giving directions.
- On-street parking will be reduced during construction.

Driveway Access

- Due to construction activities, we may need to block your driveway for a short time. We will contact you before we do this to arrange for the best time and for alternate access, if needed. If your driveway is blocked, you may choose to park on a side street for a short time. If you need immediate access to your driveway, the contractor will have road plates available to quickly allow access in and out of your driveway.
- We will make sure businesses have access at all times.
- Please call the Project Manager if you have special needs related to access or business hours.

Irrigation or Sprinkler Systems

- Please tell the ambassador or the inspector if you have underground irrigation or a sprinkler system outside your property line.
- You may wish to move the sprinkler lines to inside your private property to avoid damage.

Trimming Trees

- If tree branches within the right-of-way interfere with construction, the contractor will have the trees pruned before equipment enters the drip line of the tree.
- If tree branches on private property interfere with construction, they will be pruned back to the nearest suitable trunk, crotch or branch.
- The contractor will ask you for permission before cutting any branches on private property. If you do not allow the contractor onto your property to trim the branches, the branches will be cut vertically at the property line.

Interrupting Your Water Supply

- It is our goal to let you know 48 hours (2 days) in advance if we need to shut off your water. Occasionally, we may have to reduce this notice to 24 hours.
- If we have to shut off your water because of an emergency, we will do everything we can to fix the problem as quickly as possible.

Waste Collection

- Your garbage, recycling and organics containers will continue to be picked up on your regularly scheduled day. It is the contractor's responsibility to move your garbage, recycling and organics bins to a location where our collection vehicles can pick them up. Empty containers will be returned to their corresponding addresses. Please make sure your house number is clearly marked on each bin.

Vibrations

- You may feel slight vibrations from the construction work.

Replacing and Taking Care of Your Sod

- The contractor will take care of any sod we replace for 30 days.
- You can help the sod to stay healthy by watering it for one hour in the early morning, two or three times a week. This is especially important in hot or dry weather.
- We will replace your sod as soon as we can, but there may be a short delay.
- It is very common for the work area to settle a bit following construction. If you notice any settlement, please let the project manager or inspector know and we will ensure the contractor fixes it.

Repairing Your Driveway

- If we need to cut your driveway to replace the existing service valve or access the watermain, we will repair the asphalt in the disturbed area from edge to edge across the driveway. Unfortunately the Region **cannot** completely replace your driveway.
- Several weeks before the driveway restoration work, we will send you an update with contact information for the contractor, in case you wish to have the remainder of your driveway (private side) paved at the same time.
- If you have any concerns, please call the project manager or the ambassador.
- We will repair your driveway as soon as we can, but there may be a short delay.

Repairing the Road, Curbs, and Sidewalks

- Our contractor will pave only the trench they dug and install temporary curbs because the City of Mississauga plans to pave the roads after we have finished our work.

Project Updates

- The Region of Peel will always let you know if there are any major changes to the plans.
- The latest updates are online at peelregion.ca/bwp.
- Please call the project manager or ambassador if you have any concerns or special needs.
- We will try to disturb you as little as possible.

How Did We Do?

- After we've finished, you can rate our work by completing a short online survey. If we have your email address, we will send you the link, and it will also be posted on our website: peelregion.ca/bwp.

Thank you!
