

Environmental Assessment Study

Notice of Public Information Centre (PIC#3) Front Street Station Wastewater Diversion Project

Study Background

The Region of Peel has identified the need to address the existing Front Street Station catchment area wastewater flows to align with the Region's long-term, wastewater services sustainable plan. As a result, a Schedule 'B' Class Environmental Assessment (EA) was initiated to identify a solution for this infrastructure need. The technical analysis has led the Region to determine that the Ben Machree Sewage Pumping Station will no longer be needed to accommodate the long-term wastewater servicing needs of the area. The decommissioning of the Ben Machree Sewage Pumping Station is part of the preferred solution for this Class EA study.

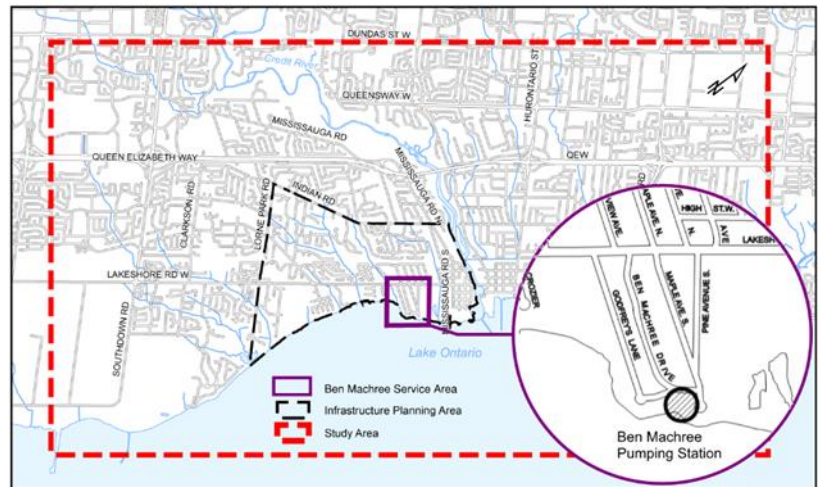

The Study Process

The study has investigated alternative strategies, routes and design concepts. The preferred solution involves the decommissioning of the Front Street Sewage Pumping Station, a sewer alignment along Lakeshore Road, a new pumping station in Richard's Memorial Park, the decommissioning of the Ben Machree Sewage Pumping Station and the preferred diversion route.

At the end of the study, and prior to implementation, a Project File documenting the entire study process will be available for public review for a 30-day period.

Public Information Centres (PICs)

As a part of this study, a (PIC) is being held to present study findings and to provide an opportunity for comments and feedback to the project team.

PIC No. 3

Date and Time: Nov. 29, 2018, 5:30 to 8 p.m.

Location: Port Credit Arena, Credit Room, 40 Stavebank Rd, Mississauga

PIC No. 3 will reintroduce the background and objectives of the study, identify the preferred alternative, and present the planned decommissioning of the Ben Machree Station including the preferred diversion route. Information will be presented on display boards and staff will be available to respond to questions.

PIC No. 1 was held on March 28, 2017, and PIC No. 2 was held on March 1, 2018.

Comments and Information

Please visit the project website at peelregion.ca, public works, water and wastewater, environmental assessments, current water & wastewater EAs, Mississauga, Front Street EA for more information and to see the project video. You can also follow the project on Twitter @PeelPublicWorks #FrontStreetEA.

If you wish to receive further information about this project, to submit a comment, or be added to the mailing list please contact:

Kolsoom Motamedi, P.Eng.

Project Manager

905-791-7800, ext. 4196

The Region of Peel is committed to ensure that all Regional services, programs and facilities are inclusive and accessible for persons with disabilities. Please contact the Project Manager if you need any disability accommodations to provide comments or feedback for this study.

This notice was first issued on November 15, 2018

With the exception of personal information, all comments will become part of the public record of the study. The study is being conducted according to the requirements of the Municipal Class Environmental Assessment, which is a planning process approved under Ontario's *Environmental Assessment Act*.
