Note: This figure provides historical information for the specified period. 1971-2006 population, household, and employment figures are rounded to the nearest hundred. 2021-2031 forecasts are rounded to the nearest thousand.

1971 and 1981 population figures include Ontario gross census undercoverage rates of 1.68% and 1.94% respectively. 1991-2001 population figures include Peel Region net census undercoverage rates (1991=3.39%, 1996=2.99%, 2001=4.2%). To be consistent with Places to Grow forecasts, the 2001 net undercoverage rate for Peel Region was applied to 2006, 2021 and 2031 population figures.

1971 and 1981 employment figures do not take into account "no fixed place of work". 1991-2006 employment figures include "no fixed place of work" as per a formula created by Hemson Consulting.

Regional staff, in cooperation with area municipal staff, adjusted the area municipal forecasts. Adjustments are described in the discussion paper titled "Places to Prosper".

* The Peel-Caledon Significant Woodlands and Significant Wildlife Habitat Study (June 2009) provided a methodology for identifying and evaluating criteria and thresholds for the identification of significant wildlife habitat. Thresholds have been recommended for criteria where they could be based on sufficient data, available research and/or expert opinion to be considered defensible. Where this information did not exist, criteria were recommended without a threshold. Criteria that were not relevant or applicable to the Region of Peel or Town of Caledon are not included in Figure 5. It is recognized that thresholds identified in the Study may need to be developed, refined or revised through further study, including through the planning approval process as further detailed comprehensive or site specific studies are completed. As a result of the further potential for refinements or revisions, the thresholds have not been adopted as policy in the Region of Peel Official Plan. (Adopted ROPA 21B)
