

Using roundabouts in Peel Region

May 2024

Roundabouts are proven to:

- Reduce collisions
- Reduce the severity of collisions
- Improve the flow of traffic
- Reduce idling

Watch for these signs.
All roundabouts will be properly marked.

ROUNDABOUT

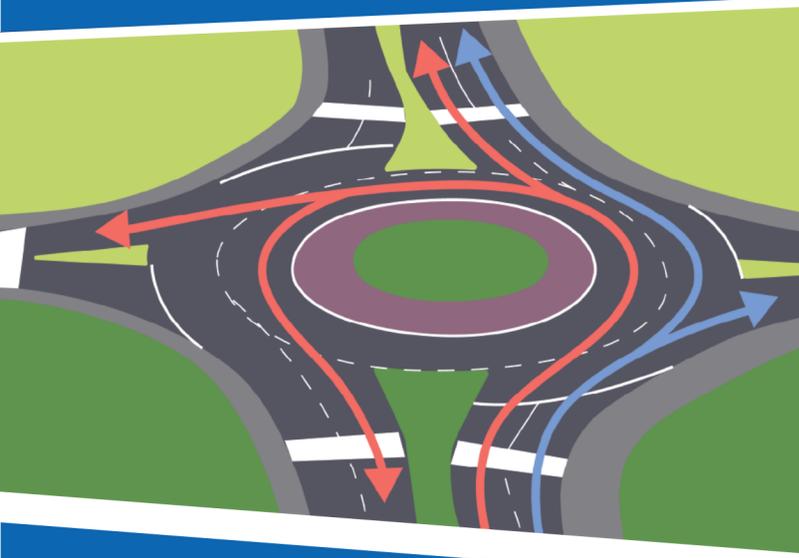

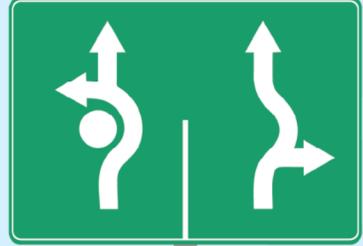

Experienced cyclists can travel through a roundabout like a driver.

Newer cyclists can dismount and cross as a pedestrian.

Choose your lane before merging!

Exits are indicated before entering the roundabout.

When going **LEFT**, use the LEFT lane.

When going **RIGHT**, use the RIGHT lane.

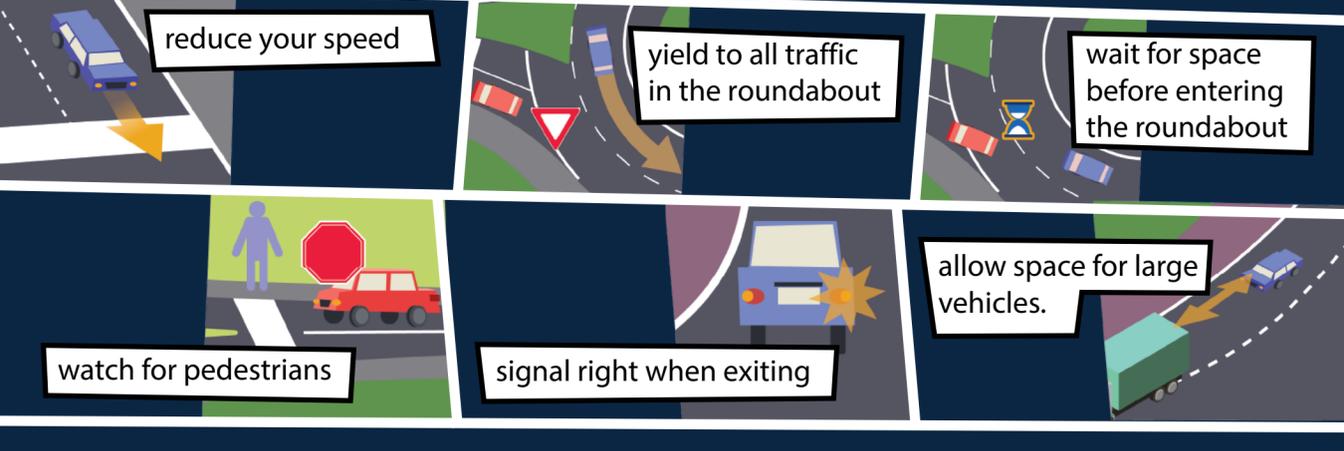

Either lane can be used to continue straight.

Large vehicles may take up multiple lanes.
Give them space!

Staying safe in roundabouts

DO

DON'T
