Phase One Environmental Site Assessment for
Schedule "C" MCEA
Wastewater Capacity Improvements in Central
Mississauga

GMBP File: 718018

November 2020

EXECUTIVE SUMMARY

A Phase One Environmental Site Assessment (ESA) has been completed for the 13 sites (the Sites) proposed for the construction of shafts to facilitate capacity improvements for the central Mississauga wastewater system. These Sites are located throughout the central part of the City of Mississauga, generally within the area enclosed by Burnhamthorpe Road, Etobicoke Creek, The Queensway, and Hurontario Street.

This report has been completed as a due-diligence technical study to support the Municipal Class Environmental Assessment process. As it is the understanding of the assessors (GM BluePlan) that no Record of Site Condition (RSC) will be required, this ESA has not been prepared for the intention of supporting an application for RSC.

The Phase One ESA was conducted with regard to each of the shaft Sites as well as the area enclosed by a search buffer extending 250 m beyond the Site boundaries (i.e. the Study Area). This Phase One ESA involved the review of numerous sources of information available from public sources and from the Region of Peel (the Client). Sources included:

- Topographic, surficial geological, water well record mapping and database information
- Environmental database reports from ERIS, including
- Limited City Directory search.
- Aerial photographs
- Fire Insurance Plans
- Site reconnaissance, and others.

Some data sources could not be searched to the usual extent possible due to unavailability during the COVID-19 pandemic.

The review of information identified a total of 49 potentially-contaminating activities (i.e. PCAs) within the Study Area. The majority of these PCAs were related to the historical or current existence of fuel tanks or automotive service stations and the historical occurrence of spills of potential contaminants of concern (PCOCs). Other identified PCAs included a variety of industrial activities, including historical dry-cleaning operations/businesses (i.e. potential sources of solvents and volatile organic compounds VOCs), metals fabrication, battery manufacture, and the presence/operation of PCB-laden electrical components. The potential presence of imported fill of unknown quality was a PCA identified for each of the Sites.

These PCAs were each subject to an individual assessment to determine whether the environmental risk associated with it was sufficient enough to be considered an Area of Potential Environmental Concern (APEC). Several of the APECs are due to PCAs that occurred at off-Site locations. Where a PCA was identified to have occurred on a given Site, it was immediately considered to be an APEC.

The table below (see next page, also provided as Table 5 in the report) provides a summary of the Areas of Potential Environmental Concern, as well as a brief description of the precipitating PCA ("Activity"), the affected Sites, the affected environmental media, and the potential contaminants of concern (PCOCs) which may be present at the Site as a result of the PCA.

Based on the APECs identified, it has been recommended that additional investigation (i.e. in the form of a Phase Two Environmental Site Assessment or soil quality sampling for the purposes of Excess Soil Management Plan in accordance with O. Reg. 406/19) be conducted to achieve the following objectives:

- determine with greater certainty whether the potential impacts are present and
- assess how the impacts may affect construction activities such as dewatering and/or
- provide soil quality assessment for the purposes of developing an Excess Soil Management Plan.

It has been noted that three of the Sites (14B, 15C, and 17C) are presently under construction and shafts have been built upon them to support other infrastructure projects. As a result of the additional information or experience which may be gained during that construction process, it is expected that additional investigation may not be necessary at these Sites.

Table: Areas of Potential Environmental Concern

#	Address/Operation	Activity	Affected Site(s)	Affected Media	PCOCs
1	3100 Cawthra Road Esso Station	Spill (heating oil, 4,000 L) Fuel tanks Automotive Service	Site 14B	Soil Groundwater	PHCs F1-F4 BTEX
2	655 Queensway E Sunoco Station	Fuel tanks Automotive Service	Site 06A	Groundwater	BTEX PHCs F1
3	2360 Dixie Road Samuel Son and Co.	Fuel Tanks	Site 03A	Groundwater	BTEX PHCs F1
4	691 Burnhamthorpe Rd E	Automotive Service	Site 15C	Groundwater Soil	BTEX Metals PAHs PHCs F1-F4 VOCs
5	Various	Imported Fill (on-Site)	Site 01B through Site 17C	Soil	Metals PAHs
6	2325 Hurontario Street Queentario Cleaners	Drycleaning	Site 12B	Groundwater Soil	VOCs
7	2301 Dixie Road Batronics, Nightingale, Curtis Properties	Battery Manufacture Electrical Transformation Metal Fabrication	Site 03A	Groundwater Soil	VOCs PCBs Metals PHCs F1
8	Former Farm Homestead	Fuel Tanks	Site 08B	Groundwater Soil	PHCs F1-F4 BTEX
9	680 Silver Creek Blvd.	Drycleaning	Site 14B	Groundwater	VOCs

**PHASE ONE ENVIRONMENTAL SITE ASSESSMENT FOR
SCHEDULE "C" MCEA
WASTEWATER CAPACITY IMPROVEMENTS IN CENTRAL MISSISSAUGA**

REGION OF PEEL

NOVEMBER 2020

GMBP FILE: 718018

1. INTRODUCTION

The Region of Peel (the Region) have retained GM BluePlan Engineering Limited (GMBP) to undertake a Schedule "C" Municipal Class Environmental Assessment (MCEA) to select a preferred solution for the capacity expansion of the wastewater collection system in central Mississauga.

As part of this undertaking, this Phase One Environmental Site Assessment (ESA) report has been prepared to assist the MCEA team to support the decision-making process as well as to provide insight as to the potential to encounter impacted environmental media (i.e. soil, groundwater) at the short-listed proposed shaft sites.

This Phase One ESA was undertaken to identify potential and/or actual environmental concerns or risks associated with the Sites which may have resulted from current or historical land uses on the Site or neighbouring properties. It is our understanding that this Phase One ESA is being conducted to support the route/solution selection to achieve certain wastewater system upgrade/capacity expansion objectives. This Phase One ESA is not intended to support an application for Record of Site Condition per Ontario Regulation (O.Reg.) 153/04 (as amended). However, it is understood that some of the Sites are owned by parties other than the Region or other municipal bodies and so the preferred solution may involve property transfer and/or easement creation.

1.1 Site Location and Property Information

The preferred solution for the improvements to the wastewater system comprises 13 proposed shaft locations (the "Sites") as shown on Figure 1 and described in Table 1 below. These Sites are located within the City of Mississauga (Geographic Township of Toronto) with the exception of Site 01B, which straddles Etobicoke Creek and extends partly into the City of Toronto (Geographic Township of Etobicoke).

Table 1: Shaft Sites and Site Location Information

Site ID	Site Location	Site ID	Site Location
01B	Queensway and East Trunk Lot 3, Con 1 S of Dundas Geo.Twp of Toronto; Lot 13, Con 2 S Div Fronting Lake Ontario Geo.Twp of Etobicoke	10A	Queensway and Camilla Lot 14, Con 1 S of Dundas Geo.Twp of Toronto
02A	Queensway and Etobicoke Creek Lot 3, Con 1 S of Dundas Geo.Twp of Toronto	11A	Queensway and Cooksville Creek Lot 15, Con 1 S of Dundas Geo.Twp of Toronto
03A	Queensway and Dixie Lot 5, Con 1 S of Dundas Geo.Twp of Toronto	12B	Queensway and Hurontario Lot 15, Con 1 S of Dundas Geo.Twp of Toronto
06A	Queensway and Cawthra Lot 10, Con 1 S of Dundas Geo.Twp of Toronto	14B	Cawthra and Dundas Lot 11, Con 1 N of Dundas Geo.Twp of Toronto
07A	Queensway and Tedlo Lot 11/12, Con 1 S of Dundas Geo.Twp of Toronto	15C	Burnhamthorpe and Cawthra Lot 11, Con 2 N of Dundas Geo.Twp of Toronto
08B	Queensway and Hensall Lot 12, Con 1 S of Dundas Geo.Twp of Toronto	17C	Burnhamthorpe and Central Parkway Lot 13, Con 2 N of Dundas Geo.Twp of Toronto
09C	Queensway and Cliff Lot 13, Con 1 S of Dundas Geo.Twp of Toronto		

1.2 Property Ownership

A number of entities hold ownership over the Sites and several of the Sites cross property lines and thus have multiple owners as listed below:

- Site 01B: Toronto and Region Conservation Authority
- Site 02A: Rialto Apartments Limited and Horner Developments Limited
- Site 03A: 2661618 Ontario Inc. and the Region of Peel
- Site 06A: Peel Condominium Plan 1052 and the Region of Peel
- Sites 07A, 08B, 09C, 10A and 11A: HydroOne
- Site 12B: Yeoman Investments Limited
- Site 14B: Region of Peel and City of Mississauga
- Site 15C: Eduarda Amaral and Victor Amaral and the Region of Peel
- Site 17C: The City of Mississauga

2. SCOPE OF INVESTIGATION

The Phase One ESA was conducted in general accordance with the guidelines of the Canadian Standards Association (CSA) as presented in Report No. Z768-01, Phase One Environmental Site Assessment (November 2001). The purpose of a Phase One ESA is to identify actual and potential environmental concerns or risks associated with the Sites. These environmental concerns may be the result of current or historical uses of the Sites or surrounding properties.

The Phase One ESA process involves review of documents, maps, and other recorded information in conjunction with the observations of a reconnaissance visit to the Sites by the Assessor. Based on the information gathered, an assessment of the potential environmental concerns can be made and, if warranted, recommendations offered for further investigation. A brief description of the records reviewed, and the reconnaissance visit follows. Interviews with current Owners of the Sites were not conducted as part of this process.

Fire insurance plans (FIPs) for the Sites and general Study Area were requested through ERIS from Opta Information Intelligence (Opta). Where available, the FIPs were reviewed to assess historical ownership and uses of the Sites and vicinity. The majority of the Sites were outside of the available coverage provided by the FIPs as reported by Opta.

The Ministry of the Environment, Conservation and Parks (MECP) Waste Disposal Site Inventory (MECP 1991) was reviewed to identify closed and active waste disposal sites in the vicinity of the Site.

A selection of relevant reports from Region of Peel archives were also reviewed for applicable information such as borehole information, soil and groundwater sampling data, spills, waste disposal sites and recommendations and evaluations from other Phased ESA projects.

A set of environmental risk reports were requested from ERIS (ERIS reports) to review available historical and environmental records and provide information on reported spills, registered waste generators, fuel storage tanks among other databases of environmental significance. The ERIS reports covered a search area extending at a 250 m radius from the boundaries of the Sites. Site 15C was not included in the ERIS search as that site has recently undergone Phase One and Two Environmental Site Assessments (ESAs) and the reports for those ESAs were available for review. A set of review notes that summarizes the ERIS Reports and highlights key findings is provided in Appendix A. The ERIS Reports themselves are provided in the Appendices as follows:

- Appendix A1 for Sites 01A and 02B
- Appendix A2 for Site 03A
- Appendix A3 for Sites 06A through 12B
- Appendix A4 for Site 14B
- Appendix A5 for Site 17C

The Region of Peel has provided access to geographical database information regarding the location of historical waste disposal sites / landfills in the City of Mississauga area. These records were reviewed to determine the location of the reported disposal sites relative to the Phase One Sites.

Aerial photographs dating back to 1954 were available for each of the Sites from the Mississauga Maps online GIS. Air photos from each available decade were reviewed, specifically years 1954, 1966, 1975, 1985, 1997, 2007, and 2017. A summary of observations from these aerial photo reviews is provided in Appendix B.

Background physiographic, geological, hydrogeological and topographical information for the Site and the surrounding area was assembled from several sources including the Ministry of Environment, Conservation and Parks (MECP), publications from the Ontario Geological Survey and others.

3. RECORDS REVIEW

3.1 Phase One Study Area

The Phase One Study Area is a composite area that generally includes the areas within 250 m of each of the shaft Sites. The Study Area boundaries are shown on Figure 1.

3.2 First Developed Use

The first developed use of each property is listed in Table 2. For the purposes of this identification, agricultural or recreational land uses will not be listed as the “first developed use” of a Site unless that is also the present day land use of the Site. Certain uses have been identified from aerial photos and, due to the limited resolution of the photos and difficulty discerning land use with certainty, these uses are identified as “apparent”.

Table 2: First Developed Use Identified for Each Site

Site ID	First Developed Use	Approximate Year
01B	Site Vacant / Greenspace	N/A.
02A	(Apparent) Gravel Extraction	1966
03A	Greenspace/Landscaped area related to an Industrial Building (Nightingale Inc. – furniture manufacturer)	1966
06A	Greenspace/Landscaped area related to a Commercial Building/Plaza (various tenants)	1985
07A	(Apparent) Queensway Right-of-Way and Trailway	2017
08B	(Apparent) Queensway Right-of-Way and Trailway	2017
09C	(Apparent) Queensway Right-of-Way and Trailway	2017
10A	(Apparent) Queensway Right-of-Way and Trailway	2017
11A	(Apparent) Queensway Right-of-Way and Trailway	2017
12B	(Apparent) Greenspace/Landscaped area related to a mid-rise Residential Building	1975
14B	(Apparent) Cawthra Road Right-of-Way	N/A
15C	Automotive service station	1985
17C	(Apparent) Burnhamthorpe Right-of-Way and Trail	2017

3.3 Fire Insurance Plans

A request for Fire Insurance Plans (FIP) was placed with ERIS for the Sites and the general study area. The FIP search was completed by Opta Information Intelligence (Opta) for majority of the Sites with exception of Site 01B, where the FIP was not requested due to its location in a historically undeveloped/greenspace lands. FIPs were also not requested for Site 15C, due to previously completed ESAs at this Site by others.

No plans were reported to be available for the Sites where the FIP search request was placed, with the exception of Site 14B, where a 1939 FIP was reported to be available, however, Site 14B was not shown on the FIP.

3.4 City Directory Search

City Directory records for the Study Area obtained through ERIS include property use information from the years 1958 to 2000 in approximate six (6) to twelve (12) year increments (Appendix C). City Directory records were requested for the Site addresses (if Site is part of a private property with a current civic address) as well as select properties in the vicinity, specifically for commercial and industrial properties. Due to library closures at the time of preparation of this report, City Directory records were not available for all the addresses requested to be searched. City Directory records were not requested for Sites 15C and 17C, as previously completed City Directory searches were reviewed for these sites in available ESA reports (GHD, 2015 and WSP, 2018).

Summary of available City Directory records is enclosed in Appendix C, along with the search results from ERIS with select pertinent details summarized below.

With the exception of Sites 03A, 06A and 12B, the remaining Sites are not specifically listed in the City Directory records, as there are no civic addresses associated with the remaining Sites (predominantly located within existing right-of-ways or Queensway trail lands or Etobicoke Creek natural area) or due to inaccessible City Directory records due to library closures.

In the broader Study Area, are numerous residential, commercial and industrial properties. The City Directory records do indicate several records related to potential dry cleaning, vehicle repair, manufacturing and associated operations as follows with additional details included in Appendix C.

Site 03A

Site 03A is located on portion of 2301 Dixie Road property. City Directory listings for this property include the following:

- Nightingale Inc./ Biltrite Nightingale Inc. (office furniture manufacturer) - 2000, 1989
- ESB Canada/Electric Storage Battery Canada/Storage Battery - 1981, 1970/71, 1958

In the broader Study Area, there are numerous industrial and commercial listings at upgradient/crossgradient properties including:

- 2290 Dixie Road
 - Speed N Truck World, Acura Technology Inc. – 2000
 - Hansen & Young Machinery - 1981, 1970/71
- 2300 Dixie Road
 - Acura Machine Tool Systems - 1989
- 2320 Dixie Road
 - Various auto service and related establishments including Applewood Hills Auto Service, Dixie Transmission, Julius Tire Auto Repair, Meineke Discount Mufflers, Rust Check Canada Inc., Korea Kar, Tint Master, Mr. Gas Tank – 2000, 1989
- 2360 Dixie Road
 - Samuel Son & Co./Samuel & Son – 2000, 1970/71
 - Samuel Strapping System, Production Steel Sales – 1989, 1981
 - Canadian Metal Rolling Mills Ltd.- 1970/71
- 2365 Dixie Road
 - Cryovac Canada Inc. – 2000, 1989, 1981, 1970/71
 - Davison Grace & Co./Grace & Co. of Canada/Grace Computer Services/Grace Containers Ltd.– 1989, 1970/71
- 2401 Dixie Road
 - BBC Brown Boveri Canada Inc. – 1989
 - ITE Industries – 1981
 - Eastern Power Devices – 1970/71
 - Quality Brass Foundry - 1958

Sites 06A, 07A, 08B, 09C, 10A, 11A, 12B

- Site 06A listings include the following:
 - Multi-tenant commercial including Citywide Express Ltd., D A B Desktop Publishing Centre Inc., J J Pad Printers, Kwik Kopy Printing, Kwik Shine Inc., TTP Trade Printing - 2000, 1994, 1989

- (including listing for Centra Clean – online search of this name suggests this may be related to a Centra Clean vacuum replacement parts supplier i.e. not a dry-cleaning establishment), 1984
- Site 12B listings include the following:
 - Multi-tenant residential and commercial listings including Action Trophy & Engraving, S & K Tuck Shop, Community Centre, Yeomen Investments – 2000, 1994, QB's Carpet & Upholstery Cleaning Serv., Queensway Manor Day Nursery 1989

In the broader Study Area, there are numerous industrial and commercial listings at upgradient/crossgradient properties including:

- 2355 Cawthra Road (approximately 140 m northwest of Site 06A)
 - Treblex Ltd. (inferred metal fabrication) – 1994, 1989, 1984, 1979, 1973/74, 1970/71, 1966
 - BGM Machine - 2000
- 2370 Cawthra Road (approximately 140 m northwest of Site 06A)
 - Westway Machinery Ltd. – 2000, 1994; Columbia Machine Ltd. – 1989, 1984, 1979, 1973/74, 1970/71, 1966
- 2325 Hurontario Street (approximately 100-130 m N of Site 12B)
 - Multi-tenant commercial including Milano Cleaners, Washday Blues Laundromat – 2000; Queentario Cleaners – 1994; Network Cleaners Ltd. – 1989; Hydro Electric Commission of Mississauga/ Hydro Electric Comm of Twp of Toronto/Twp of Toronto Hydro Electric Comm Ofc – 1979; 1973/74, 1970/71, 1966
- 655 Queensway East (approximately 75 m W of Site 12B)
 - Mississauga Kar Kare Centres, Queensway Cawthra Carwash Sunoco Inc./ Canadian Vehicle Wash Systems/ Queensway Cawthra Car Wash, Lube Master – 2000, 1994

Site 14B

In the broader Study Area, there are numerous industrial and commercial listings at upgradient/crossgradient properties including:

- 680 Silver Creek Boulevard (approximately 100 m NW of Site 14B)
 - Multi-Tenant Commercial including Silvercreek Laundromat & Dry Cleaning/ Ace-Kelly Dry Cleaners Ltd. – 2000, 1989, 1983
- 3100 Cawthra Street (approximately 130 m NW of Site 14B)
 - Esso Imperial Oil – 1994

3.5 Waste Disposal Site Inventory

The Waste Disposal Site Inventory (1991) is a document prepared by the MECP that provides a listing of active and inactive waste disposal sites (e.g. landfills) at the time of its writing (i.e. 1991). A set of geospatial data that shows the location of each of these disposal sites has been prepared by Fortin (2005) of the University of Toronto.

Reviewing the data, it appears that there are two waste disposal sites listed at locations within about 1 km of the project Sites. These are as follows:

- Inactive Site at 600 m northwest of Site 03A (presently Dixie Go station)
- Inactive Site at 1 km northwest of Site 03A (presently an industrial/commercial development).

3.6 Peel Landfills Database

The Region of Peel has a record of historic dump sites that were located within Mississauga. This search indicated three dump sites within the 500 m of the project Sites.

- Near Site 02A:
 - Two dump sites were located to the northwest (250 m and 380 m) of Site 2A.
 - A rail line passes between these two dump sites and the predominant land use in the area now appears to be industrial.
 - These sites are located on the opposite side of Little Etobicoke Creek from Site 2A.

- Near Site 14B:
 - A dump site (approximately 5,000 m² in area) was located about 350 m south-southeast of Site 14B.
 - This dump site is within lands now occupied by industrial and commercial developments.

No other information was available regarding the history, ownership, or usage of these dump sites.

3.7 Peel Spills Records

The Region of Peel maintains a record of spills reported, whether by citizens or by the MECP Spills Action Centre.

A set of 34 spill records were provided by the Region of Peel corresponding spills that occurred or may have had effects in the areas near the proposed shaft sites. These spill records are enclosed in Appendix D.

The spill records were reviewed by GMBP and the majority of the spill records fell into one of three categories:

- Watermain breaks
- Sewer breaks, backups or other sanitary sewage releases
- Small-volume oil or hydraulic fluid spills associated with motor vehicles
- Sheen reported on a watercourse

The following records were identified as being of greater significance:

- 15-334A: PCB-containing oil from electrical vaults was understood to have been released from 2335 Hensall Street (152 L of oil) and 444 Abruz Boulevard (27 L). 444 Abruz Boulevard is located adjacent to and upgradient of Site 08B, while 2335 Hensall Street is located opposite Hensall Street, approximately 65 m upgradient of the Site 08B.
- 04-207: A large quantity (18,000 L) of heating oil was released from an underground heating oil tank, apparently punctured during construction at Mississauga Trillium Hospital (100 Queensway West, approximately 280 m cross-gradient from Site 12B). Environmental remediation and investigative contractors were reportedly deployed to address the release.
- 07-183: Diesel fuel (200 L) leaked from a truck on westbound Queensway, west of Cawthra. Most of the spilled fuel was suspected to have been contained, but some was reported as potentially have entered the storm sewer system, which drains toward Cooksville Creek, though reported observations of the Creek indicated no effect there. The interpreted location of the spill is approximately 75 m southwest of (crossgradient from) Site 06A.

3.8 Other Environmental Reports

Burnhamthorpe Watermain Class EA Stage I ESA, GHD, January 2015

This report (GHD 2015) identified areas of "environmental impairment" near Sites 15C and 17C.

- 691 Burnhamthorpe Road E (on-Site at 15C): former gas station
 - Groundwater sampling from previous studies had indicated groundwater impacts (benzene, barium, MTBE) at this location potentially due to the former gas station.
- 3670 Cawthra Road (50 m downgradient of Site 15C): former gas station
- 350 Burnhamthorpe Road E (50 m downgradient of Site 17C): former gas station
 - Property has been redeveloped into a commercial plaza.
 - Sampling or results thereof have not been reported.
- 377 Burnhamthorpe Road E – Parkway Cleaners reported in City Directory records (1991-2000). As reported by GHD (2015) this address was not identified in the ERIS report as a generator of halogenated solvents suggesting that this location may have been a drop-off depot, rather than drycleaning operation on Site. GHD (2015) also reported that based on the Inspection Reports available for the 377 Burnhamthorpe Road E property for the years 1986 (inspection report for the entire shopping mall at this address) and 1996 (report for Parkers Cleaners Ltd. at this address), Parkers Cleaners Ltd. operated a drop-off depot and the inspection reports did not identify the storage or use of dry cleaning solvents at

the property (GHD, 2015). The ERIS report obtained as part of the current project, did not list this location in the registered waste database for halogenated solvents.

This report also noted that prior sampling indicated occasional road-salt related impacts (SAR, EC) in soils along Burnhamthorpe Road E.

691 Burnhamthorpe Road East, Mississauga, Ontario Phase One ESA and Limited Phase Two ESA (Part 1 and Part 2 Phase Two ESA reports), WSP Canada Inc., 2018

- 691 Burnhamthorpe Road E (on-Site at 15C) reported to be occupied by a former gas station with former USTs believed to be located on the eastern portion of the Site. No documentation regarding UST removal was provided to WSP for review. The Site also was reported to be historically used as autobody/vehicle repair shop.
- Two Phase Two ESAs were completed, Part 1 (on the north portion of the subject Site, to be utilized as working easement of two main shafts for watermain construction) and Part 2 (south portion of the Site, to be utilized for construction of two main shafts)
- Phase Two ESA on Part 1 portion of the Site included the drilling of six boreholes, installation of two monitoring wells, and sampling of an additional existing monitoring well.
- Phase Two ESA on Part 2 portion of the Site included the drilling of three boreholes and installation of two monitoring wells.
- There were no exceedances of the MECP Table 2 Full Depth Generic Site Condition Standards for Industrial/Commercial/Community (ICC) Property Use in a potable groundwater condition reported for the soil samples collected from both Part 1 and Part 2 of the Site during the investigations.
- No groundwater exceedances were reported from monitoring wells on Part 2 of the Site.
- Groundwater at the location of one monitoring well in Part 1 (the north portion) of the Site was reported to exceed the Table 2 Standard for select metals, polycyclic aromatic hydrocarbons PAHs and petroleum hydrocarbons (PHCs). When compared against Table 3 (non-potable groundwater site condition standards), the groundwater quality at this monitoring well location was reported to meet this Standard.

3.9 Environmental Database Search (ERIS Report)

The Environmental Risk Information Services (ERIS) Report contains the results of a comprehensive search of a variety of environmental databases. The search is geospatially-organized so all records returned are attributed to locations within the study area, in this case 250 m from the boundary of one of the Sites.

Many of the records returned by the ERIS Report are considered to indicate negligible or minimal risk of environmental impacts to the Sites. As such, GMBP staff have reviewed the ERIS Reports and broken down the results to identify the most significant records: this breakdown is provided in Appendix A and the most significant records are denoted by red text. The ERIS Reports themselves are provided in Appendices A1 to A5, which include detailed descriptions of the various databases that were searched.

A brief summary of the most significant results is provided here with the results categorized by database.

Ontario Spills

- 150 Sherway Drive (Trillium Health Care) Diesel/oil spill to gravel, volume unknown
 - >220 m upgradient of Site 01B
- 2365 Dixie Road (Cryovac) spill circa 1994 of 225 L of hydraulic oil, partly to ground and partly to sewer.
 - 200 m upgradient of Site 03A
- 228 Chantenay Drive, Transformer oil leak, 168 L of oil to ground.
 - 150 m downgradient of Site 09C
- 2335 Hensall Street, Transformer oil leak, 152 L of oil to ground
 - 65 m upgradient of Site 08B
 - See also under Peel Spill Records 15-334 (Section 3.7)
- 2355 Tedlo Street, diesel oil dumped to ground and storm sewer

- 150 m upgradient of Site 07A
- 655 Queensway East (Sunoco) various fuel spills between 20 and 200 L volume
 - 70 m cross-gradient of Site 06A
- 2395 Cawthra Road (Day and Night Mobile Refrigeration) 100 L of motor oil released to ground/pavement.
 - 200 m upgradient of Site 06A
- 2364 Haines Road (Cambridge Hydro) leaking underground tank, 300 L petroleum oil spilled to ground.
 - 300 m cross-gradient of Site 06A
- 100 Queensway West (Trillium Hospital) 1,850 L of heating oil to ground circa 2004.
 - >220 m cross-gradient of Site 12B
- Cawthra Road south of Dundas, 765 L of transformer oil to sewers.
 - 60 m downgradient of Site 14B
- 3100 Cawthra Road (Esso Petroleum) 4,000 L of heating oil to storm sewer.
 - 140 m upgradient of Site 14B
- Cawthra Road and Silver Creek Blvd, 180 L of diesel fuel to road and sewer, spilled from truck.
 - 200 m upgradient of Site 14B

Environmental Registry

- 2380 Loreland Ave (Wynn Family Properties) Approval for use of former waste disposal site.
 - 250 m northwest of Site 02A, opposite Little Etobicoke Creek.

Delisted Tanks

- 655 Queensway E, Fuel Service Facility
 - 70 m cross-to-upgradient of Site 06A
 - Also listed at this address under: Fuel Storage Tank (51,000 L double wall UST, 100,000 L double wall UST, 36,300 L single wall UST from 1989 with 21.5 years service, and more), Private and Retail Fuel Storage Tanks (131,834 L and 5,000 L retail fuel tanks), Retail Fuel Storage Tanks (6 records for gas station and/or lube service station)
- 100 Queensway W (Trillium Health Centre) 45,000 L double wall UST and 10,000 L double wall UST.
 - >220 m cross-gradient of Site 12B.
 - Also listed under: Fuel Storage Tank (45,000 L double wall UST), Commercial Fuel Oil Tank (45,000 L and 10,000 L double wall USTs, installed 1992).
- 3100 Cawthra Road (John Victor Service Station) various records for fuel service facility and piping
 - 140 m upgradient of Site 14B
 - Also at this address under: List of Expired Fuel Safety Facilities (three tank removal records), Fuel Storage Tanks (two 22,700 L and one 45,400 L single wall USTs), Private and Retail Fuel Storage Tanks (expired 1995)
- 350 Burnhamthorpe Road E (Mike Zuccatos Esso), various records for expired fuel service facility and piping
 - 60 m downgradient of Site 17C
 - Also at this address under: List of Expired Fuel Safety Facilities (several records for USTs and liquid fuel tanks), Fuel Storage Tanks (records for 22,700 L, 25,000L, 45,400 L, and 50,000 L single wall USTs for gasoline), Private and Retail Fuel Storage Tanks, Retail Fuel Storage Tanks (record for gasoline, oil tanks).

Fuel Storage Tanks

- 2360 Dixie Road (Samuel Son & Co.) 50,000 L underground liquid fuel tank in 1986 (removed in 2007).
 - >130 m up- to cross-gradient of Site 03A.
 - Also listed at this address under: List of Expired Fuel Safety Facilities (UST record from 2009), Delisted Tank (Private fuel outlet)
- 2398 Haines Road (Zapp Haines Investments Limited), Single Wall underground storage tank (4,546 L)
 - 330 m up-to-crossgradient of Site 06A
 - Also listed at this address under: Private and Retail Fuel Storage Tanks (4,456 L private UST)

Private and Retail Fuel Storage Tanks

- 1450 Caterpillar Road (Federal Express) 4,000 L fuel storage tank.
 - >250 m cross-gradient of Site 03A

Retail Fuel Storage Tanks

- 2320 Dixie Road (Magic Touch Muffler, Victor's Esso Service Centre) Automotive Service station.
 - 100 m up-to-cross-gradient of Site 03A

Scott's Manufacturing Directory

- 2301 Dixie Road (Nightingale Inc.)
 - Furniture (metal office chairs, wooden furniture) manufacturing company from 1928 to recent.
 - Also listed under Ontario Waste Generators with records indicating use of paint and solvents.
 - Site 03A is located at this property.

Ontario Waste Generators

- 2301 Dixie Road (Batronics Inc)
 - Battery manufacture
 - Waste types includes halogenated solvents and petroleum distillates.
 - Site 03A is located at this property.
- 2325 Hurontario Street (Queentario Cleaners)
 - Drycleaning facility, listing halogenated solvents among the waste types generated.
 - 125 m upgradient of Site 12B

Ontario PCB Inventory

- 2301 Dixie Road (Curtis Properties Inc.)
 - Storage of 28 capacitors with high-level PCBs (>1000 ppm) in 1995. Records indicating PCB storage on-property from 1992 to 1998 (Ontario Waste Generators)
 - Site 03A is located at this property.

3.10 Physical Setting

Aerial Photographs

Aerial photographs available from Mississauga Maps (City of Mississauga 2020) were reviewed for each of the Sites for the following years: 1954, 1966, 1975, 1985, 1997, 2007, and 2017.

A common theme among the Sites is that they were generally used for agricultural (fields, homesteads, orchards) circa 1954 to 1966 and development (mainly residential, but also some industrial and commercial) began to encroach on the Sites through the 1970s and 1980s, with little change in land use being observed after 1985.

Most of the Sites remain "vacant" (i.e. no buildings), but most of the Sites would have seen some form of area grading and potentially utility construction over the course of the development of the areas. Some Sites (e.g. those along the north side of Queensway) have been improved with multi-use pathways or road construction.

A summary of detailed notes taken during the aerial photo review is provided in Appendix B. The following is a brief breakdown of land-use activities of potential concern that were identified in the review.

Site 02A

- Circa 1966: Site was disturbed and may have been used as a gravel pit. Potential for imported fill of unknown quality.
- Circa 1975: Potential gravel pit or storage/scrap yard appears to have been in operation approximately 80 m north of the Site. However, a ravine of a tributary to Etobicoke Creek separates the Site from that location so potential impacts may be mitigated due to hydraulic separation.

Site 06A

- Circa 1985 through 2017: Gas station in operation approximately 75 m W of Site (on opposite side of Cawthra Road from Site).

Site 08B

- Circa 1954: a farm homestead was once located in the northwest portion of the Site. Due to the prevalence of fuel tanks and/or fuel oil tanks on the “home quarter” of farms, there may be potential for hydrocarbon contamination from this time.

Site 15C

- Circa 1985 to 2007: a medium sized building on the Site appeared to be in use as an automotive shop and/or gas station.
- Circa 1997 to 2007: a gas station was constructed at 3670 Cawthra Road (immediately south of Site across Burnhamthorpe). This station is not likely to have impacted the Site because of its apparent location downgradient from the Site.

Site 17C

- Circa 1985 to 2007: A former gas station occupies the southwest corner of Central Parkway and Burnhamthorpe (350 Burnhamthorpe Road East, approximately 80 m south of the Site). The 2007 aerial shows that the gas station property was redeveloped into a commercial/office building. This station is not likely to have impacted the Site because of its apparent location downgradient from the Site. Given the timeline, the redevelopment may have potentially included remediation of the Site.

Topography, Hydrology, Geology

A more fulsome description of the physical description of each Site is provided under separate cover in the Baseline Hydrogeological Report prepared for this MCEA (GMBP 2020). The following is a brief summary of the physical/geological setting of the area:

- Topography:
 - The Sites are spread across an area that generally slopes southeastward toward Lake Ontario at a slope of about 1%, though local variations occur near ravines associated with Cooksville Creek (i.e. Site 11A) and Etobicoke Creek (i.e. Sites 01B and 02A).
- Geology:
 - Sites 15C and 17C lie upon a drumlinized till plain within the South Slope physiographic region. (See Figures 2 and 3).
 - The remaining Sites lie upon a sand plan within the Iroquois Plain physiographic region. (See Figures 2 and 3).
 - The surficial geology (i.e. overburden material) is briefly summarized in Table 3.
- Bedrock in the vicinity of the Sites is the shale-rich Georgian Bay Formation.

Table 3: Surficial Geological Characterization

Site ID	Surficial Geology	See Figure
01B	Modern Alluvium ¹ Variable deposits of gravel, sand, silt, clay.	4a
02A	Paleozoic Bedrock	4a
03A	Glaciolacustrine Sand ²	4a
06A	Paleozoic Bedrock Glaciolacustrine Sand	4b
07A	Glaciolacustrine Sand	4b
08B	Glaciolacustrine Sand	4b

09C	Glaciolacustrine Sand	4b
10A	Glaciolacustrine Sand	4b
11A	Modern Alluvium	4b
12B	Glaciolacustrine Sand	4b
14B	Glaciolacustrine Sand / Beach Gravel	4b
15C	Glacial Till (Halton Till) ³	4c
17C	Glacial Till (Halton Till)	4c

¹ - Variable deposits of gravel, sand, silt and clay laid down by streams

² - Sandy-gravelly to sandy-silty soils laid down in the bed of glacial Lake Iroquois or in deltas its influent streams.

³ - Clayey-silty till

- Hydrology:
 - The Sites lie within the hydrologic watershed of Lake Ontario.
 - Three of the Sites (01B, 02A, and 03A) are located in the catchment associated with Etobicoke Creek
 - The remaining Sites are located in the catchment associated with Cooksville Creek.
 - The drainage for most of the Sites is controlled by the municipal stormwater management system (i.e. storm drains, roads).
 - Generally, groundwater flow tends in a southeasterly direction toward Lake Ontario, though flow directions may vary in areas close to riparian areas and watercourses, such as Cooksville Creek and Etobicoke Creek (see Figure 5).

Water Bodies and Areas of Natural Significance

Several of the Sites lie within 500 m of waterbodies or features of natural significance. These are summarized in Table 4.

Table 4: Waterbodies, Watercourses and Wooded Areas near the Sites. "~" indicates no waterbody or watercourse identified within 500 m.

Site ID	Feature or Waterbody	Distance from Site
01B	Etobicoke Creek	Adjacent
02A	Etobicoke Creek	Adjacent
03A	~	~
06A	Wooded Area (on south side of Queensway near Cody Ln)	130 m E
07A	~	~
08B	~	~
09C	~	~
10A	Cooksville Creek Wooded Area (Along Cooksville Creek) Wooded Area (South of Cherry Post Drive)	240 m NE 250 m SW 380 m SE
11A	Cooksville Creek Wooded Area (Along Cooksville Creek) Wooded Area (South of Cherry Post Drive)	Adjacent Adjacent 430 m ESE

12B	Cooksville Creek	255 m NE
	Wooded Area (along Cooksville Creek)	255 m NE
	Mary Fix Creek	480 m SW
	Wooded Area (along Mary Fix Creek)	480 m SW
14B	Wooded Area (on Lolita Gardens)	210 m W
	Wooded Area (on Cedar Creek Ln north of Dundas)	250 m NE
15C	~	~
17C	Cooksville Creek	150 m SW
	Wooded Area (associated with Cooksville Creek)	200 m SW

Fill Materials

The majority of the Sites are located along major thoroughfares which would likely have been subject to area or roadway grading activities. Based on the age of the development throughout the study area, it is likely that (where fill was required) fill materials were not closely scrutinized for quality before being placed for construction. Based on the aerial photograph survey and the general locations of the various Sites, it is interpreted that there is some potential for imported fill materials of unknown quality to exist at all of the Sites including Site 01B, which although it appears to be in a lower lying area associated with Etobicoke Creek channel, fill material may have been utilized during the construction of the sewer which traverses this Site.

Water Well Records

A search of the provincial water well records database has indicated a total of 568 water well records attributed to locations within 500 m of the Sites. The vast majority of these water wells are listed for monitoring (83), test hole (251) or monitoring and test hole (171) purposes. A summary of information from the water well records found in these areas is provided in Appendix E.

Only two water well records appear to be listed for actual water supply purposes: one domestic (Well ID 4902247) and one industrial (Well ID 4902250). The domestic well record is located approximately 400 m south of Site 01B and lies just north of Queen Elizabeth Way. The industrial well record is located approximately 100 m east of Site 14B, near the intersection of Dundas Street and Cawthra Road. Both wells are listed as bedrock wells. Given the dates of construction (one in 1957 and one in 1949) and the development of the municipal water system, it is likely that these wells have been decommissioned and are no longer in use.

None of the water well records indicate “negative” static water levels or flowing conditions. Therefore, it seems unlikely that artesian conditions exist in the vicinity of the Sites.

4. INTERVIEWS

Interviews were not conducted as part of the ESA.

5. SITE RECONNAISSANCE

The site reconnaissance visits were completed by Ms. Joanna Olesiuk, M. A. Sc., C. Tech. of GMBP on October 2, 2020 from approximately 9:30 AM to 06:00 PM. Ms. Olesiuk was unaccompanied during site reconnaissance visits.

The weather conditions at the time of site reconnaissance were sunny, changing to overcast with rain and a temperature of approximately 10°C. During the site reconnaissance, photographs were taken and select photographs are presented in Appendix F.

5.1 Site Observations

Site 1B

The Site is vacant and is associated with the Etobicoke Creek channel and riparian area. The Site is accessed from east and west via a pedestrian walking path from Sherway Drive. The easterly portion of the Site appears to have been disturbed (i.e. cleared of trees) and is reported to have been the subject of a previous repair on an existing trunk sewer which traverses the Site from north to south. Walking paths traverse the Site. Several erosion control wood chip "silt socks" were noted on the grounds of the Site. The Site is relatively flat, with a steep slope to the west of the Site towards the neighbouring residential lands further to the west. There was no visual evidence of extensive refuse or debris, or surficial soil staining observed at the time of the site visit in the areas observed.

Site 2B

The Site is vacant and overgrown with vegetation. The Site is accessed from Queensway East and an adjoining unnamed paved roadway leading to the commercial development west of Site. An advertising billboard structure is located on Site. The Site is relatively flat with a partial berm along the west and southerly property lines. A monitoring well was observed south of the Site, north of the adjoining sidewalk. Several walking paths as well as some scattered debris (plastics, paper, asphalt fragments) were noted throughout the Site and adjoining vacant lands leading towards Etobicoke Creek natural area and ravine.

Site 3A

The Site is located partially on a landscaped portion of 2301 Dixie Road property, the location of Nightingale Inc., an office furniture products manufacturer. The remaining portion of the Site is associated with Queensway to Dixie Road right turn lane and sidewalk. On the private property portion, the Site hosts a pad-mounted transformer, a fire hydrant and a brick clad enclosure overtop of what appears to be a buried natural gas pipeline and water service. Contents of the enclosure were not confirmed at the time of the site visit, due to its location on private property. There are also overhead power lines and poles as well as a fire hydrant on Site.

The Site slopes towards the onsite building and is generally well maintained and landscaped. There was no visual evidence of extensive refuse or debris, or surficial soil staining observed at the time of the site visit in observed areas. Several of what appeared to be monitoring wells were observed from the sidewalk, located approximately 45 m northeast of the Site, near the rear loading dock of the 2301 Dixie Road building, in an area where a tote and drums of unidentified product were also stored in loading area portion of the building exterior.

Site 06A

The Site is located partially on a landscaped portion of 755 Queensway property, the location of a multi-tenant commercial building. The remaining portion of the Site is associated with a portion of Queensway to Cawthra Road right turn lane and sidewalk. On the private property portion, the Site hosts a decorative sign and lighting fixtures.

The Site slopes towards the onsite parking area and commercial building and is generally well maintained and landscaped. There was no visual evidence of extensive refuse or debris, stressed vegetation or surficial soil staining observed at the time of the site visit.

Site 07A

The Site is located partially on the landscaped portion of 505 Queensway property, the location of a multi-tenant commercial building. The remaining portion of the Site is associated with Queensway Trail lands which consist of a paved multi-use path and grassed lands.

On the private property portion, the Site hosts a decorative sign for the 505 Queensway property. Aboveground hydro poles and lines are also located onsite.

The Site is relatively flat and is generally well maintained and landscaped. There was no visual evidence of extensive refuse or debris, stressed vegetation or surficial soil staining observed at the time of the site visit.

Site 08B

The Site is located within the Queensway Trail lands and consists of a paved multi-use path and grassed lands throughout. A vegetable garden is located along the northerly extent of the Site. Markers for a buried natural gas line were observed onsite.

The Site is relatively flat with a treed berm along the Queensway right-of-way and is generally well maintained and landscaped. There was no visual evidence of extensive refuse or debris, stressed vegetation or surficial soil staining observed at the time of the site visit.

Site 09C

Similarly to Site 08B, this Site is located within the Queensway Trail lands and consists of a paved multi-use path and grassed lands throughout. A vegetable garden is located along the northerly extent of the Site. Markers for a buried natural gas line were observed onsite.

The Site is relatively flat with a treed berm along the Queensway right-of-way and is generally well maintained and landscaped. There was no visual evidence of extensive refuse or debris, stressed vegetation or surficial soil staining observed at the time of the site visit.

Site 10C

Similarly, to Sites 09C and 08B, this Site is located within the Queensway Trail lands and consists of a paved multi-use path and grassed lands throughout. A vegetable garden is located along the northerly extent of the Site. Markers for a buried natural gas line were observed onsite.

The Site is relatively flat with a treed berm along the Queensway right-of-way and is generally well maintained and landscaped. There was no visual evidence of extensive refuse or debris, stressed vegetation or surficial soil staining observed at the time of the site visit.

Site 11A

The Site is located within the Queensway Trail lands, north of the paved multi-use path and it spans across Cooksville Creek and riparian area. Markers for a buried gas line were observed in the Site vicinity.

The Site is relatively flat with a downward slope towards the watercourse. Some debris was noted onsite, specifically within the treed area associated with the watercourse including concrete and asphalt fragments, plastics, small amount of lumber, clothing and general domestic refuse. There was no visual evidence of stressed vegetation or surficial soil staining observed at the time of the site visit in observed areas.

Site 12B

The Site is the open space partially on and adjacent to a residential apartment building. The Site is landscaped (i.e. grassed with some shrubs) and is relatively flat. A sidewalk traverses the Site. There was no visual evidence of extensive refuse or debris, stressed vegetation or surficial soil staining observed at the time of the site visit.

Site 14B

The Site is an active construction site for the Cawthra Trunk sewer connection and was not entered at the time of site visit. The Site was observed from the adjacent rights-of-way. The Site is generally cleared and was surrounded by locked security fencing. Numerous construction equipment and stockpiles of construction materials were observed at the Site.

Site 15C

The Site located at 691 Burnhamthorpe Road East property, currently an active construction site for the Cawthra Road Sanitary Sewer and Watermain Phase 2 project and was not entered at the time of site visit. The Site was observed from the adjacent right-of-ways. The Site is generally cleared and was surrounded by security fencing with active work underway. Numerous construction equipment and construction materials were observed at the Site.

This property was the subject of previous environmental investigations related to the historic presence of a gasoline station and underground fuel storage tanks at this address. Soil and groundwater impacts were reported at this location by WSP (2018). Further information is presented in Section 3.8.

Site 17C

The site is adjacent and partially within a current shaft site for the Burnhamthorpe Watermain project. The remainder of the Site hosts a paved multi-use trail and is adjacent to a bus shelter. Due to the ongoing construction, the portion of the Site occupied by the current shaft site was not entered at the time of site visit. This portion of the Site is surrounded by security fencing with active work underway. Numerous construction equipment and construction materials were observed at the Site. Remainder of the Site is paved and landscaped.

5.2 Observations at Adjacent Properties

Adjacent and nearby properties were observed from public right-of-ways during the Site reconnaissance. Adjacent neighbouring properties are shown on Figure 2. Further details of activities at the neighbouring properties are contained in the ERIS report (Appendix A), aerial photographs (Appendix B), City Directory (Appendix C), with selected pertinent details discussed below. Select Site photographs are presented in Appendix F.

Current land use of neighbouring properties within the Study Area is predominantly residential (Sites 08B, 09C, 10A and 11A), with some residential and/or increasingly commercial and industrial land uses near sites 02A, 03A, 06A, 07A, 12B, 14B, 15C and 17 C. Site 01B is located within a residential and green space setting.

The following is a brief summary of land-use activities of potential concern that were identified in the review of neighbouring property uses.

Site 3A

- Site is located partially on 2301 Dixie Road property, which north of the Site hosts a manufacturing building occupied by Nightingale Inc., and office furniture manufacturer. On this property, to the northeast of Site 3A, in the rear loading dock area, were what appeared to be several monitoring wells.
- Approximately 200m north of the Site is 2365 Dixie Road property, historically occupied by Cryovac Canada Inc. (2000, 1989, 1981, 1970/71), Davison Grace & Co./Grace & Co. of Canada/Grace Computer Services/Grace Containers Ltd. (1989, 1970/71) and Davison Chemical Div. Grace Chemicals (1981).

Site 6A

- Approximately 75 m W of Site (on opposite side of Cawthra Road from Site) is a commercial plaza occupied by a gasoline service station (currently under construction), an auto repair shop, a car wash and an oil change shop.
- Approximately 250 m to the NE is 1450 Caterpillar Road (Federal Express shipping centre), where records of fuel storage were reported by ERIS.

Site 12B

- North of the Site is a commercial plaza with a drycleaning establishment located approximately 140 m N of the Site. What appears to be a transformer station with numerous concrete pad mounted transformer units is also located within the plaza, in a fenced enclosure on gravel surface.

Site 14B

- Northwest of the Site is a commercial plaza (680 Silver Creek Blvd.), a multi-tenant commercial plaza, which was listed in the City Directory records to host a dry-cleaning establishment (in 1983, 1989 and 2000) as well as 3100 Cawthra Road property, a former gasoline station with USTs (WSP, 2018). City directory records identified this property as Esso Imperial Oil (in 1994). This site is currently vacant and undeveloped.

Site 15C

- Approximately 40 m SE, across Burnhamthorpe Road is 3670 Cawthra Road, currently vacant and an undeveloped property which historically was a gasoline station with six USTs and documented PHC impacts (WSP, 2018).

Site 17C

- Approximately 60 to the SE is 350 Burnhamthorpe Road East, currently a commercial plaza, which historically was reported as a fuel service station (ERIS report, Appendix A), with several records indicating historical gasoline USTs.

6. REVIEW AND EVALUATION OF INFORMATION

6.1 Identification and Evaluation of Potentially-Contaminating Activities

Certain industrial and land use activities are listed under Table 2 of Ontario Regulation 153/04 as being "Potentially-Contaminating Activities" (PCAs). These are activities which have an increased potential of causing environmental impacts to their host sites and also, under certain conditions, to surrounding areas or neighbouring sites.

This section will identify the categories of PCAs that have been identified within the study area. Within each category, an assessment will be completed to determine whether or not these PCAs should be considered as Areas of Potential Environmental Concern (APECs) with regard to the Site(s). An Area of Potential Environmental Concern indicates that there is an elevated probability for environmental impacts at the Site due to the existence of a PCA and the prevailing conditions, be they soil, groundwater, topographic, regulatory.

Identified APECs will be recommended for additional investigation or risk mitigation approaches, as applicable. Figures 6a through 6c show the locations of each of the PCAs within the Study Area.

6.1.1 Landfills

The records review has indicated the presence of historical landfills/waste disposal sites within 500-m from the Sites. However, potential for these landfill areas to have impacted the Sites is mitigated for the following reasons:

- Hydraulic Separation:
 - The waste disposal sites near Site 02A (e.g. 2380 Loreland Ave, PCA #1) are on the opposite side of Little Etobicoke Creek from the Site. It is expected that Little Etobicoke Creek serves as a drainage divide in this area and that this obstructs the pathway for contaminants to reach the Site.
 - The waste disposal sites that are 600 m and 1 km northwest of Site 03A (PCA #2 and #3) are both in locations near enough to Little Etobicoke Creek that the anticipated groundwater flow direction may be toward Little Etobicoke Creek (i.e. a northeasterly or easterly direction), therefore lying cross-gradient from Site 03A.
- Hydraulic Gradient
 - The waste disposal site near Site 14B (PCA #4) is located downgradient of Site 14B, and as such contaminant transport is not expected to have brought impacts to the Site.
- Site Size
 - The dump site near Site 14B is also reported to be relatively small (approximately 1 acre) and so it is anticipated that the risk is mitigated due to the limited source zone size.

As a result, these reported dump sites are not considered APECs.

6.1.2 Spills

Spills of fuel, oil, or other hazardous material may result in a lasting environmental impact to soil or groundwater if not properly controlled or remediated.

Several spills were identified to be within the vicinity of the subject Sites, but most of these were identified to be of low risk materials in the context of potential for causing environmental impact (e.g. watermain breaks, sewage spills).

The ERIS Reports and a search of the Peel spill records indicated a few instances where higher risk materials (e.g. PCB-laden oil, fuels) were spilled in non-trivial quantities (e.g. >100 L) in the vicinity of the Sites. Each of these will be addressed in turn here:

- Peel Spill 15-334A (PCA #5 and #6): PCB-laden oil. This spill was reported at two locations, the nearest of which was about 50 m from Site 08B.
 - PCBs are generally poorly mobile in the subsurface as they are relatively insoluble in water and readily sorb to organic matter in soils.
 - Based on the local/ street-level topography, drainage, and probable servicing (e.g. in-ground storm sewers) it is expected that the PCB impacts remained in corridors that would not intersect the Site.
 - This spill is therefore not considered to be an APEC.
- Peel Spill 04-207 (PCA #7): Heating oil spill (18,000 L) at 100 Queensway West. This spill involved a very large volume of fluid but was located 280 m away from the nearest Site (Site 12B). The nature of the spill (occurred during construction work) suggests that the spill would have been addressed immediately.
 - This spill is therefore not considered to be an APEC.
- Peel Spill 07-183 (PCA #8): Diesel Fuel (200 L) leaked from vehicle on Queensway. The spill report indicates that efforts were made to contain the spill. Also, the location of the spill (cross-gradient from the Site 06A) and the servicing in the area (drainage toward Cooksville Creek, away from the Site) indicates limited potential for contamination to have occurred on the nearest Site (06A).
 - This spill is therefore not considered to be an APEC.
- 150 Sherway Drive (Trillium Health Care, PCA #9): Diesel/oil spill to gravel, volume unknown. There is a considerable distance separating the nearest Site (01B) from the apparent location of this spill (>220 m away). As the spill occurred at surface and to ground, it is inferred that the potential for spread of contaminants would be minimal.
 - This spill is therefore not considered to be an APEC.
- 2365 Dixie Road (Cryovac, PCA #10): spill circa 1994 of 225 L of hydraulic oil, partly to ground and partly to sewer. The amount of spilled fluid is quite small in the context of the 200-m separation distance from the nearest Site (03A).
 - This spill is therefore not considered to be an APEC.
- 228 Chanteny Drive (PCA #11): Transformer oil leak, 168 L of oil to ground. This spill is reported at a location 150 m downgradient of the nearest Site (09C), which minimizes the risk considerably.
 - This spill is therefore not considered to be an APEC.
- 2355 Tedlo Street (PCA #12): diesel oil released to ground and storm sewer at a location 150 m upgradient of Site 07A. The volume of fluid spilled is not directly reported. However, the risk is considered mitigated given the distance between the spill location and the nearest Site.
 - This spill is therefore not considered to be an APEC.
- 655 Queensway East (Sunoco gas station, PCA #13): reporting several fuel spills ranging in volume from 20 L to 200 L in volume at a location 70 m cross-gradient from Site 06A. Though there have been multiple spills reported, the potential risk due to the spills may be mitigated by the relative location of the spills from the Site (i.e. cross-gradient).
 - This spill is therefore not considered to be an APEC.
- 2395 Cawthra Road (Day and Night Mobile Refrigeration, PCA #14): 100 L of motor oil released to ground/pavement at a location 200 m upgradient of Site 06A. Due to the volume of the spill and the relative distance from the nearest site, the risk associated with this spill is substantially mitigated.
 - This spill is therefore not considered to be an APEC.
- 2364 Haines Road (Cambridge Hydro, PCA #15): leaking underground tank, 300 L petroleum oil spilled to ground at a location 300 m cross-gradient from the nearest Site (06A). Risk associated with this spill is mitigated by the distance and its cross-gradient location.
 - This spill is therefore not considered to be an APEC.

- 100 Queensway West (Trillium Hospital, PCA #16) 1,850 L of heating oil to ground circa 2004 located at least 220 m cross-gradient from Site 12B. The risk from this spill is mitigated by its relative location cross-gradient from the nearest Site.
 - This spill is therefore not considered to be an APEC.
- Cawthra Road south of Dundas (PCA #17): 765 L of transformer oil to sewers, approximately 60 m downgradient of Site 14B. Though this is a large volume of oil spilled, the fluid was released to sewer at a location downgradient of the Site. Therefore, the potential for impact to the Site is considered to be substantially mitigated.
 - This spill is therefore not considered to be an APEC.
- 3100 Cawthra Road (Esso Petroleum, PCA #18) 4,000 L of heating oil to storm sewer. Given the likely servicing, that the storm sewer would conduct flows from this spill location toward Site 14B, and due to the large volume of oil spilled, it is considered that some environmental risk may be associated with this spill.
 - This spill is considered to be an APEC.
- Cawthra Road and Silver Creek Blvd (PCA #19): 180 L of diesel fuel spilled to road and sewer, spilled from truck at a location approximately 200 m upgradient of the nearest Site 14B. Though the overland flow route is relatively direct between the spill location and the nearest Site, the volume of spilled fuel is relatively limited given the distance.
 - This spill is therefore not considered to be an APEC.

6.1.3 Tanks of Fuel and Associated Products

Historically, liquid fuel tanks (e.g. of gasoline, diesel or other petroleum fuels) have commonly been sources of environmental impacts. This is especially true in the case of underground storage tanks which, prior to monitoring and leak detection technologies becoming commonplace, may have had leaks that went undetected for long periods of time, thus allowing the release of substantial quantities of petroleum-derived chemicals into the subsurface. Furthermore, tanks are often used at industrial sites and other mechanical facilities to hold waste oil, grease, and other potential contaminants of concern.

Numerous fuel tanks and sites that host fuel tanks have been identified within the study area (refer to the ERIS Report Appendix A and TSSA records search Appendix H). Those that have been identified as Potentially-Contaminating Activities (PCAs) are listed here and assessed to determine whether they are to be considered Areas of Potential Environmental Concern.

- 655 Queensway E, Fuel Service Facility (PCA #20)
 - Numerous records describe historical usage of underground fuel storage tanks at this location. Due to the age of the records and therefore duration of potential risk exposure, combined with the volume stored on-site and proximity to Site 06A, there is considered to be some elevated potential for environmental impacts at Site 06A due to this PCA.
 - This site is therefore considered to be an APEC.
- 100 Queensway W (Trillium Health Centre, PCA #21).
 - Several records exist for this address, indicating the presence of fuel oil tanks. Due to the nature of fuel oil (less mobile than fuels with lower average molecular weights), the distance from the nearest site (>220 m cross-gradient from Site 12B), it is expected that the potential for environmental impacts at Site 12B due to these tanks is mitigated.
 - This site is not considered to be an APEC.
- 3100 Cawthra Road (John Victor Service Station, PCA #22)
 - This location is interpreted to be 140 m directly upgradient from Site 14B. Due to the potential for servicing trenches to connect between this address and Site 14B and the type of fuel tanks (USTs, presumably for gasoline), potential for environmental impacts at Site 14B due to the tanks at this location is considered to exist.
 - This address is therefore considered to be an APEC.
- 350 Burnhamthorpe Road E (Mike Zuccatos Esso, PCA #23)
 - Numerous records identify this property as historically being in use as a fuel service station, with several records indicating single wall USTs of various sizes used to store gasoline. However,

this site is located 60 m downgradient of the nearest Site (17C) and the soil types in the shallow subsurface are mainly till. As such, the risk associated with these fuel storage tanks is considered to be minimal.

- This address is not considered to be an APEC.
- 2360 Dixie Road (Samuel Son and Co, PCA #24)
 - Multiple records identify the operation of a private-use fuel outlet at this location, dating back as far as 1986 with a 50,000 L underground fuel storage tank. Furthermore, this address is located somewhat upgradient of the nearest Site (03A, 130 m away). It is therefore considered to pose some level of environmental risk to Site 03A.
 - Fuel tanks at this address are therefore considered to be an APEC.
- 2398 Haines Road (Zapp-Haines Investments Limited, PCA #25)
 - Multiple records identify the presence of a small size (<5,000 L) underground fuel storage tank at this location which is 330 m up-to-crossgradient of Site 06A. Due to the relatively small size of the tank and the significant separation distance, the potential environmental risk associated with this reported fuel tank is considered to be low.
 - This address is not considered to host an APEC.
- 1450 Caterpillar Road (Federal Express, PCA #26)
 - Records indicate that the fuel tanks at this location were relatively small (4,000 L) and located approximately 250 m cross-gradient from Site 03A. Based on the proximity, this reported fuel tank is considered to present little environmental risk to that Site.
 - This address is not considered to host an APEC.
- Site 08B (Former Farm Homestead, PCA #27)
 - The aerial photo review indicated a farm homestead being located at the northwest portion of this Site. Farm homesteads often have fuel tanks for farm equipment and/or fuel oil tanks located near the farm house and/or outbuildings. As such, there is some potential for fuel-related impacts to exist at this Site.
 - This is considered to be an APEC.

6.1.4 Automotive/Transport Systems Maintenance or Service Shops

Shops or yards that provide services to support transport systems or to repair motor vehicles often utilize a range of liquid products that may contain environmental contaminants. Examples of these include motor oil and other lubricants, fuels, waste oils, degreasers and solvents. As a result, these types of operations have the potential to result in environmental impacts.

A number of service shops have been identified through the records review. Several of these have already been addressed elsewhere (e.g. Section 6.1.3) because this land use also often involves the use or presence of fixed liquid fuel storage tanks. Therefore, only certain PCAs that have not already been addressed under the fuel tank section are discussed in detail here.

- 2320 Dixie Road (Magic Touch Muffler and others, PCA #28)
 - Tank records, historically-recorded operators, and current usage indicate automotive service/mechanical activities at this address. Based on the layout of the site, it does not appear that it was used mainly as a fuel services outlet, but rather for repair work. As a result of this usage and the relative distance from the nearest Site (100 m up-to-crossgradient from Site 03A) the potential for impacts to Site 03A is considered to be low.
 - Activities at this location are not considered to be APEC.
- 691 Burnhamthorpe Road E (on-Site at Site 15C, PCA #29)
 - Prior reporting from GHD (2015) and WSP (2018) have indicated that groundwater impacts (metals, BTEX, VOCs, PAHs, PHCs) exist at this location, presumably due to the presence of a former gas station or auto service shop there.
 - Due to the historical confirmation of impacts on-Site, this is considered to be an APEC.
- 3670 Cawthra Road (50 m downgradient from Site 15C, PCA #30)

- GHD (2015) also identified this property as historically being host to an automotive service or gas station. However, due to the location of this property being downgradient from Site 15C, it is anticipated that the environmental risk associated with this PCA will be limited.
- Therefore, this service shop is not considered to be an APEC.

6.1.5 Imported Fill of Unknown Quality

Historically, fill materials were not commonly scrutinized for environmental quality before being imported for use at a construction site. As a result, fill often contained deleterious materials or had other environmental impacts.

Based on the aerial photo review and the fact that most of the sites were developed prior to the 1990s, it is expected that all Sites have potential to have been affected by imported fill materials.

Therefore, each of those Sites is considered to have "Imported Fill of Unknown Quality" as a Potentially-Contaminating Activity (PCAs #31 through #43) and because PCAs on a subject site are to be considered APECs, these are also considered to be APEC as well.

Soils on-site may therefore require some degree of sampling and characterization effort to support soil off-site re-use and disposal in accordance with Excess Soil Management regulations (i.e. O.Reg. 406/19)

6.1.6 Drycleaners

Historically, drycleaning facilities utilized halogenated solvents (e.g. perchloroethylene) in the drycleaning process. These solvents tend to be persistent in the environment, are poorly soluble in water and are denser than water (i.e. DNAPLs). They also tend to be toxic to humans at relatively low concentrations. As a result, old drycleaning facilities which used halogenated solvents are commonly sources of environmental impacts. Several drycleaning facilities were identified within the study area as follows:

- 2325 Hurontario Street (Queentario Cleaners, PCA #44)
 - Several years on-record indicating use of halogenated solvents at this location. Due to the relative location (125 m upgradient of Site 12B), it is considered that there is some degree of environmental risk associated with this property.
 - This address is therefore considered to be an APEC.
- 680 Silver Creek Boulevard (Silvercreek Laundromat & Dry Cleaning/ Ace-Kelly Dry Cleaners Ltd., PCA #45)
 - City Directory records identify a drycleaning establishment at this address between 1983 and 2000.
 - This property is therefore considered to be an APEC.
- 377 Burnhamthorpe Road E – Parkway Cleaners PCA #46). This property was reported in City Directory records (1991-2000) as a potential drycleaning facility. As reported by GHD (2015) this address was not identified in the ERIS report as a generator of halogenated solvents suggesting that this location may have been a drop-off depot, rather than drycleaning operation on Site. The ERIS report obtained as part of the current project, did not list this location in the registered waste database for halogenated solvents.
 - This property is therefore not considered to be an APEC.

6.1.7 Battery Manufacture

Battery manufacturing involves the use of acids, solvents, and liquid materials with high metals contents. As a result, these types of industrial chemicals may be released into the environment from battery manufacturing operations. Battery manufacturing was identified to have historically occurred at the following location:

- 2301 Dixie Road (Batronics Inc., PCA #47)
 - Battery manufacturer, also generating waste types such as petroleum distillates and halogenated solvents.
 - Site 03A overlaps with the 2301 Dixie Road property.
 - This address is therefore considered to be an APEC.

6.1.8 Electricity Transformation and Power Stations

Electrical transformers and other components of electrical substations commonly contain dielectric fluid and historically PCBs were used to augment the properties of that dielectric fluid. The import, manufacture and sale of PCBs in Canada was banned in 1977, so newer components are not likely to contain PCBs. However, PCB-laden oil may still be contained within older components. Within the study area, one site was identified to be a PCA due to having a number of electrical components containing PCBs:

- 2301 Dixie Road (Curtis Properties Inc., PCA #48)
 - Storage of capacitors containing high level (>1000 ppm) PCB-laden oil.
 - Site 03A overlaps with the 2301 Dixie Road property.
 - This address is therefore considered to be an APEC.

6.1.9 Metal Fabrication

Due to the machinery involved as well as various chemicals and lubricants needed to maintain the machinery and treat and prepare metals for machining or fabrication, metals fabrication facilities may host a number of materials and processes that could become potentially-contaminating activities. One metal fabrication facility has been identified to be a PCA:

- 2301 Dixie Road (Nightingale Inc., PCA #49)
 - Manufacturing of metal furniture
 - Site 03A is located at this property.
 - This address is therefore considered to be an APEC.

6.2 Summary of Areas of Potential Environmental Concern and Conceptual Model

Having evaluated the various Potentially-Contaminating Activities and identified from them those activities which are to be considered Areas of Potential Environmental Concern (APECs), the APECs have been summarized in Table 5.

For each APEC, the following information has been noted:

- The address of the APEC property, as well as the operation name (if available)
- The activities that were identified and resulted in that location being identified as an APEC
 - This activity will correspond to an entry in Table 2 "Potentially Contaminating Activities" of Ontario Regulation 153/04
- The shaft Sites which that APEC may affect
- The environmental media which may have been affected at that Site
- The potential contaminants of concern (PCOCs) associated with that APEC.

Table 5: Areas of Potential Environmental Concern.

#	Address/Operation	Activity	Affected Site(s)	Affected Media	PCOCs
1	3100 Cawthra Road Esso Station	Spill (heating oil, 4,000 L) Fuel tanks Automotive Service	Site 14B	Soil Groundwater	PHCs F1-F4 BTEX
2	655 Queensway E Sunoco Station	Fuel Tanks Automotive Service	Site 06A	Groundwater	BTEX PHCs F1
3	2360 Dixie Road Samuel Son and Co.	Fuel Tanks	Site 03A	Groundwater	BTEX PHCs F1
4	691 Burnhamthorpe Rd E	Automotive Service	Site 15C	Groundwater Soil	BTEX Metals PAHs PHCs F1-F4 VOCs
5	Various	Imported Fill (on-Site)	Site 01B through Site 17C	Soil	Metals PAHs
6	2325 Hurontario Street Queentario Cleaners	Drycleaning	Site 12B	Groundwater Soil	VOCs
7	2301 Dixie Road Batronics, Nightingale, Curtis Properties	Battery Manufacture Electrical Transformation Metal Fabrication	Site 03A	Groundwater Soil	VOCs PCBs Metals PHCs F1
8	Former Farm Homestead	Fuel Tanks	Site 08B	Groundwater Soil	PHCs F1-F4 BTEX
9	680 Silver Creek Blvd.	Drycleaning	Site 14B	Groundwater	VOCs

Figures 7a through 7c illustrate the conceptual models of the Sites, showing the APECs.

7. CONCLUSIONS

This Phase One Environmental Site Assessment (ESA) was completed to identify potential and/or actual environmental concerns associated with 13 Sites of proposed shaft locations resulting from land use activities, whether current or historical and whether those occurred on Sites or on nearby lands. It is our understanding that this Phase One ESA is conducted to support shaft site selection and that it is not required to support a Record of Site Condition (RSC) under Ontario Regulation (O. Reg.) 153/04 (as amended).

The information collected as part of this investigation indicates that the potential for environmental impacts at several of the proposed shaft Sites are considered to exist. Nine APECs at the proposed Sites have been identified as summarized in Table 5. To confirm the quality of soil and groundwater at the proposed shaft locations, additional investigation involving sampling and laboratory analysis of soil and groundwater for identified COCs is recommended.

8. RECOMMENDATIONS

Based on the findings of this Phase One Environmental Site Assessment concerning the shaft Sites proposed for the wastewater capacity improvements for central Mississauga, GMBP make the following recommendations:

- Each Site (with exceptions noted below) is recommended to be subject to additional investigation in the form of a Phase Two Environmental Site Assessment or soil quality sampling for the purposes of Excess Soil Management Plan in accordance with O. Reg. 406/19 as part of the design phase of the project. The objectives of the Phase Two Environmental Site Assessment shall be to determine, with greater certainty:
 - whether impacts are present and
 - how the impacts may affect construction dewatering and discharge water management and/or
 - provide soil quality assessment for the purposes of developing an Excess Soil Management Plan.
- This additional investigation should be scoped to target the environmental media and potential contaminants of concern (PCOCs) identified by this Phase One ESA.
- Sites for which additional investigation may not be necessary are:
 - Sites 14B, 15C, and 17C which are currently under similar construction and have already had shafts installed.

All of which is respectfully submitted,

GM BLUEPLAN ENGINEERING LIMITED

Per:

Joanna Olesiuk, M.A.Sc., C. Tech.

Matthew Long, M.Eng., P.Eng.

9. STATEMENT OF LIMITATIONS

The information presented in this Phase One ESA report is intended for the sole use of the Region of Peel. GM BluePlan Engineering Limited accepts no liability for use of this information by third parties. Any decisions made by third parties on the basis of information provided in this report are made at the sole risk of the third parties.

The scope of this Phase One ESA was limited to a review of the history of the Sites; a review of available regional mapping and available background reports and information (including prior Phased ESA reports provided by the Region of Peel); surface/topographic features; contact with relevant regulatory agencies; review of available historical records and reports and a site reconnaissance completed on October 2, 2020. This Phase One ESA assumes that a Record of Site Condition (RSC) under O. Reg. 153/04 (as amended) is not required to be filed for this property.

GM BluePlan Engineering Limited cannot guarantee the accuracy or reliability of information provided by others or presented in records and reports available for the property. GM BluePlan Engineering Limited does not accept liability for unknown, unidentified, undisclosed or unforeseen surface or sub-surface contamination that may be later identified.

The scope of this Phase One ESA was limited to investigating the actual or potential sources of environmental impact or environmental risk and does not include full confirmation of actual environmental impact or environmental risk. While comments have been made regarding the inferred groundwater flow direction and the perceived risks of potential environmental concerns to soil and groundwater at the Site from onsite or offsite sources, full confirmatory assessment of soil and groundwater conditions is beyond the scope of this assessment. Further, while comments have been made regarding the perceived risks of potential environmental concerns, a complete risk assessment is beyond the scope of this report.

This report is believed to provide documentation of site conditions as of October 2, 2020.

Pipeline Incidents	3	<p>2213 Felina Ct - natural gas pipeline struck</p> <p>132 Paisley Boulevard E – natural pipeline hit.</p> <p>600 Orwell St – natural pipeline hit</p>
Automobile Wrecking and Supplies	2	<p>2233 Hurontario St., Kalsi Chadha Co. – Location known as a scrap metals business</p> <p>2355 Cawthra Rd., supreme disposal services – Location known as a scrap metals business</p>
Ontario Spills	48	<ol style="list-style-type: none"> 1. 228 Chanteny Drive - Enersource Hydro Mississauga Inc. – 168 L of transformer oil leak over time to land 2. 444 Arbuz Blvd - Enersource Hydro Mississauga Inc. – 27 L of PCB transformer oil “lost”? 3. 2335 Hensal St - Enersource Hydro Mississauga Inc. – 152 L of PCB transformer oil to ground. 4. 505 Queensway W. – leaking barrel of oil in garbage 5. 2320 Tedlo St. – Spill DYE to surface water 6. 186 Daphne Ave – Enersource Hydro Mississauga Inc. - 25 L of PCB oil to ground. Soil impact confirmed 7. 2281 Camilla Rd – The Apple Market – 30 L of hydraulic oil to parking lot 8. 2213 Felina Ct. - Enbridge Gas Distribution Inc., gas line struck by shovel 9. 2355 Tedlo Street, Unit 11, 12, 13 – wastewater release to land and catch basin

		<ol style="list-style-type: none"> 10. 2355 Tedlo Rd. (BEHIND UNIT S #9 & 10) – diesel/oil dumped to ground and storm sewer 11. 132 Paisley Boulevard East – Enbridge Gas Distribution Inc. - natural gas pipeline struck 12. 600 Orwell St, Unit# 9-12 – trailer leaking rotten papaya – no enviro impact 13. 600 Orwell St. - Enbridge Gas Distribution Inc. – natural gas pipeline struck 14. Cooksville Creek, Outlet Under Paisley Street Bridge – 20 L of oil to creek, cleaned by municipality 15. Cooksville Creek Outlet Under Paisley Street Bridge – fuel odour and sheen noted in creek. 16. 655 Queensway East – Sunoco – Fire, pollutants to air 17. 655 Queensway East – Sunoco – 50-75 L gasoline to ground 18. 655 Queensway East – Sunoco – 2 L gasoline to ground, enviro impact not anticipated. 19. 655 Queensway East – Seaboard Liquid Carriers Ltd. – 40 L of gasoline to ground/catch basin 20. 655 Queensway East – Seaboard Liquid Carriers Ltd. – 50 L of gasoline to ground/catch basin 21. 655 Queensway East – Seaboard Liquid Carriers Ltd. – 15 L of diesel to ground/catch basin, cleaned-up 22. 655 Queensway East – Seaboard Liquid Carriers Ltd. – unknown amount of diesel to catch basin. Enviro impact possible. 23. Queensway Avenue front of the Sunoco gas station – 100 to 200 L of diesel fuel to ground and catch basin 24. 2370 Cawthra - Mississauga Hydro – cooling system leak, unknown amount of transformer oil to ground. 25. Queen's Way and Cowthra Road – sediment build up in catch basin 26. Orwell Street - Mississauga Hydro – transformer oil washed away by watermain break into watercourse 27. Orwell Street – Wasterworks – enviro impact not anticipated 28. 2247 Hurontario St - Across Canada – sediment to Crooksville Creek 29. 2233 Hurontario St. – wastewater discharge to Crooksville Creek 30. 2395 Cawthra - Day and Night Mobile Refrigeration – 100 L of motor oil to highway 31. 755 Queensway East. – watermain break 32. Hwy 10 And The Queensway, N.E Corner - 1 L of tranny fluid – enviro not anticipated 33. Queensway & Hurontario Mississauga Hospital – gasoline odour at creek 34. Paisley Blvd and Hurontario – watermain break 35. 2399 Cawthra Rd - GAIA Contractors - Potassium Permanganate spill, enviro impact not anticipated 36. 2316 Hurontario St. – no details in record 37. 2338 Hurontario St - Alectra Utilities Corporation – 157 L of mineral oil to ground, cleaned. 38. 2350 Hurontario St. - Enbridge Gas – Natural gas pipeline hit 39. 2364 Haines Rd - Leaking underground tank identified by TSSA, quantity not specified
--	--	--

		<p>40. 2364 Haines Rd - Cambridge Hydro – 300 L of petroleum oil spilled to ground</p> <p>41. 785 Queensway East Unit 22 – methane gas leak to air</p> <p>42. 100 Queensway West - Trillium Health Centre – air pollution</p> <p>43. 100 Queensway West - Mississauga Trillium Hospital – 1850 L of heating oil to ground circa 2004.</p> <p>44. 100 Queensway West – sewage block, impacting storm sewer</p> <p>45. 100 Queensway West - Trillium Health Centre – air pollution</p> <p>46. 100 Queensway West - Trillium Health Centre – 6 L of formalin down drain, enviro impact not anticipated</p> <p>47. 100 Queensway West - Trillium Health Centre – air pollution</p> <p>48. 100 Queensway West - Trillium Health Centre – 100 L of grease spill to surface water.</p>
Environmental Activity and Sector Registry	1	Numerous records of approvals related to discharges to air (28) and municipal and private sewage works (1) at various locations in the study area.
Environmental Registry	7	
Certificates of Approval	20	
Environmental Compliance Approval	18	
ERIS Historical Searches	57	Numerous records were of historical ERIS report searches conducted on properties in the study area.
Water Well Information System	28	Numerous records of wells and boreholes in the study area. Several records of abandoned/decommissioned wells/test wells
Borehole	49	
Ontario Regulation 347 Waste Generators Summary	273	Numerous records of registered waste generation at properties in the Study Area.
Ontario Regulation 347 Waste Receivers	2	2399 CAWTHRA RD., #36 - Zylstra Molded Products (Out Of Business) – “reclaim facility” ?? Duplicate record of above
National Pollutant Release Inventory	24	Pollutant releases at 100 Queensway St. E., 563 Queensway St. E., and 755 Queensway St. East
Records of Site Condition	5	2214 Cliff Rd - Dufferin Peel Catholic District School Board – property use from institutional to institutional... 2380 Tedlo St - Jamia Islamia Canada Ltd. – from industrial to community 2350 Hurontario St. – Three records here – limited to no detail provided in record
Scott's Manufacturing Directory	167	Records listing nature of industrial establishments/activities in the study area, including: Queentario Cleaner (2325 Hurontario Street) Drycleaning with Halogenated Solvent usage from 1992 to 1998.
Pesticide register	20	Records of where pesticides have been used or stored.

Today in court, two companies and their directors were fined \$239,999 after pleading guilty to illegal waste activities. "Charges and convictions remind us all that we need to take care not to damage the environment as we go about our business," said Environment Minister Jim Bradley. The convictions relate to depositing waste on a property located at 2380 Loreland Avenue in Mississauga that was not approved by the ministry to receive waste. The property is owned by 1509439 Ontario Inc. of which Paul Wynn is the sole director. Jeffrey Wynn is a director of a related company known as the Wynn Family Properties that leased the Loreland Avenue property to Global Haulage Inc. of which Philip Pinheiro is a director. After receiving complaints of waste dumping at the property, the ministry inspected and issued orders to clean up waste including, bricks and construction and demolition materials at the property. Paul and Jeffrey Wynn along with 1509439 Ontario Inc. were convicted of failing to comply with requirements of the ministry clean up order by failing to remove the waste and submit related documentation. Global Haulage Inc. and Philip Pinheiro were convicted of depositing waste on a site unapproved by the ministry to accept waste. Global Haulage Inc. was also convicted of failing to remove the waste as required by the ministry. The convictions are as follows: Global Haulage Inc. was fined \$95,000; Philip Pinheiro was fined \$25,000; 1509439 Ontario Inc. was fined \$75,000; Jeffrey Wynn was fined \$30,000; and, Paul Wynn was fined \$14,999. A victim fine surcharge of an additional 25 per cent is also payable on all of the fines. The ministry continues to monitor activities at the property to ensure the clean up is completed. Additionally, the court has now issued orders requiring that the property be cleaned up and any future use to be approved by the ministry.

Application Type:		Aya Kitchens and Baths Ltd.			
Client Name:		1551 Caterpillar Road			
Client Address:		Mississauga			
Client City:		L4X 2Z6			
Client Postal Code:		The applicant manufactures kitchen and bathroom cabinet systems. This applicaiton seeks approval for the use and operation of two identical baghouse dust collectors and two automated paint spray lines. The baghouses will filter all exhaust air from the general woodworking operations and return the filtered air to the plant interior. Abort gates (one per unit) will redirect the baghouse exhaust to the atmosphere under upset conditions. The paint lines are designed for the application of solvent and water based coatings and will be served by to stacks.

Mississauga. ON

Database:
CONV

File No: **Location:** Mississauga
Crown Brief No: **Region:**
Court Location: **Ministry District:**
Publication City:
Publication Title: Company Fined \$25,000 For Non-compliance
Act: Environmental Protection Act
Act(s):
First Matter:
Second Matter:
Investigation 1:
Investigation 2:
Penalty Imposed: The company was convicted and fined \$25,000 plus a victim fine surcharge of \$6,250, and Mr. Pinheiro was convicted and issued a suspended sentence. The defendants were required to pay the fine in court.
Description: Global Haulage Inc. and Philip Pinheiro were fined a total of \$25,000 for failing to comply with a Court Order, contrary to the Environmental Protection Act.
Background: The company is located in Toronto. Mr. Pinheiro is the Director and Owner of the company.
The ministry became aware that the company was dumping waste onto a property in Mississauga.
The company and Mr. Pinheiro were convicted of permitting the deposit of waste at the property, which is not an

approved waste disposal site, and for failing to comply with a ministry order to remove all waste from the site. The prosecution also resulted in the issuance of a Court Order.

The Court Order required the company to: obtain approvals from the Toronto Region Conservation Authority (TRCA) to remove approximately 7,000 cubic metres of waste from the property, to remove the waste, and to provide written proof of the waste removal, back to the ministry.

The property is situated east of Little Etobicoke Creek, a tributary of the Humber River. Due to the close proximity to the creek, a permit was required from the TRCA to ensure that excavations did not damage the creek and nearby wetlands.

The company was convicted and fined \$25,000 plus a victim fine surcharge of \$6,250, and Mr. Pinheiro was convicted and issued a suspended sentence. The defendants were required to pay the fine in court.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jun 30, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM MAN

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Jun 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Aug 31, 2020

Delisted Fuel Tanks:

Provincial DELISTED TANK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Drill Hole Database:

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry:

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Aug 31, 2020

Environmental Registry:

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Aug 31, 2020

Environmental Compliance Approval:

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Aug 31, 2020

Environmental Effects Monitoring:

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jul 31, 2020

Environmental Issues Inventory System:

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial [EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial [EXP](#)

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal [FCON](#)

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal [FCS](#)

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2020

Fisheries & Oceans Fuel Tanks:

Federal [FOFT](#)

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal [FRST](#)

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial [FST](#)

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial [FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jul 31, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2020

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2020

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Aug 31, 2020

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

[PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Aug 31, 2020

Pipeline Incidents:

Provincial

[PINC](#)

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness. The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Aug 31, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial [REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial [RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2020

Retail Fuel Storage Tanks:

Private [RST](#)

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jun 30, 2020

Scott's Manufacturing Directory:

Private [SCT](#)

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial [SPL](#)

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Nov 2019

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variances for Abandonment of Underground Storage Tanks:

Provincial

VAR

Listing of variiances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variiances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Aug 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jun 30, 2020

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM MAN

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Jun 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Aug 31, 2020

Delisted Fuel Tanks:

Provincial DELISTED TANK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Drill Hole Database:

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Environmental Activity and Sector Registry:

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Aug 31, 2020

Environmental Registry:

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Aug 31, 2020

Environmental Compliance Approval:

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Aug 31, 2020

Environmental Effects Monitoring:

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jul 31, 2020

Environmental Issues Inventory System:

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial [EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial [EXP](#)

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal [FCON](#)

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal [FCS](#)

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2020

Fisheries & Oceans Fuel Tanks:

Federal [FOFT](#)

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal [FRST](#)

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial [FST](#)

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial [FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jul 31, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial **HINC**

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial **INC**

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private **MINE**

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial **MNR**

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2020

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2020

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Aug 31, 2020

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

[PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Aug 31, 2020

Pipeline Incidents:

Provincial

[PINC](#)

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness. The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Aug 31, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial [REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial [RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2020

Retail Fuel Storage Tanks:

Private [RST](#)

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jun 30, 2020

Scott's Manufacturing Directory:

Private [SCT](#)

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial [SPL](#)

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Nov 2019

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variations for Abandonment of Underground Storage Tanks:

Provincial

VAR

Listing of variations granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variations in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Aug 31, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Unit Of Measure: KG/D
Control Point Name: PLANT - O.T.C.W.
Parameter Name: BENZENE C6H6

Param Reported As: NOT APPL
Frequency: MONTHLY
Sector: PETROLEUM REFINERIES
Component Type: MAXIMUM

MISA Industrial Wastewater Discharge

Company Code: 0000130104-2012
Control Point Id: 0800
Sample Date:
Regulation: MISA COMPLIANCE
Value: 31887.8
Unit Of Measure: M3/D
Control Point Name: PLANT - O.T.C.W.
Parameter Name: FLOW

Result Structure: MISA MONTHLY REPORTING
Param Reported As: NOT APPL
Frequency: MONTHLY
Sector: PETROLEUM REFINERIES
Component Type: MINIMUM

MISA Industrial Wastewater Discharge

Company Code: 0000130104-2012
Control Point Id: 0700
Sample Date:
Regulation: MISA COMPLIANCE
Value: 5.752
Unit Of Measure: KG/D
Control Point Name: PLANT - PROCESS EFFLUENT
Parameter Name: RESIDUE, PARTICULATE
