

Environmental Assessment Study

NOTICE OF ONLINE PUBLIC INFORMATION CENTRE #1

McVean Sanitary Pumping Station Upgrades, 3900 Ebenezer Rd., Brampton

The Study

The Region of Peel has identified the need to upgrade and expand the capacity of the McVean Sanitary Pumping Station (SPS), in order to service planned growth within the City of Brampton, as well as to upgrade the SPS to comply with current Region design standards. These upgrades include odour control, grit management, emergency storage capacity, and additional site works necessary to facilitate the expansion and upgrades. As a result, a Schedule 'B' Class Environmental Assessment (EA) has been initiated to identify a solution for this infrastructure need. The *map* below shows the area that may be directly impacted by the proposed construction.

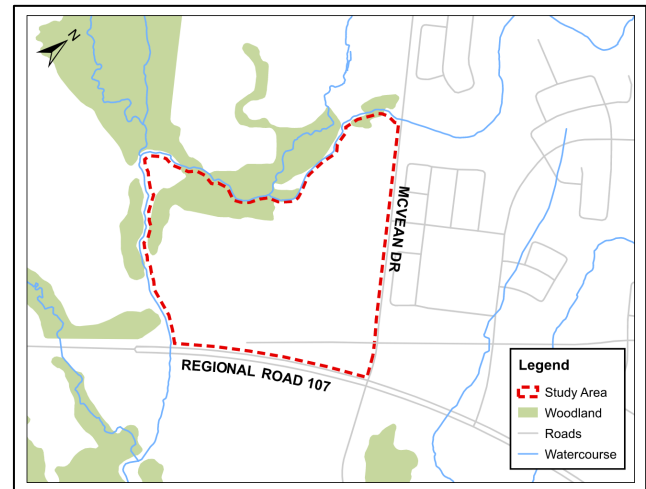

McVean Sanitary Pumping Station Upgrades Study Area

The Study Process will include:

- Public and stakeholder consultations;
- An evaluation of alternative solutions;
- An assessment of proposed alternatives; and,
- Identification of methods to lessen the adverse impacts to the community.

Virtual Public Information Centre #1

As part of the Study, two virtual Public Information Centres (PIC) will be held to allow interested members of the public an opportunity to review and comment on the preferred alternative, the evaluation process, and next steps in the Study process. PIC #1 display boards will be made available to the public on peelregion.ca/public-works/environmental-assessments starting **July 29, 2021**. Comments for PIC #1 material will be received until **Aug. 29, 2021**. Any input received by that date will be incorporated into the Project File Report, which will be available for public review when the study is completed.
