Appendix A. Stakeholder Contact List

1. Introduction

1.1 Background

The Region has initiated a Class Environmental Assessment (EA) Study to identify a preferred routing for a new 750 mm Feedermain as part of a multi-phased watermain and sewer renewal and upgrade project to support the City of Brampton's Downtown core.

The overall project is divided into three phases, with the first phase focusing on the area of Queen Street and Main Street and surrounding side streets. Upgrades including re-lining and replacement of sewers, sewer repairs, replacement of existing watermains and new watermain section. The design of the Region's work was closely coordinated with City of Brampton Revitalization program aimed at reconstruction of the Main and Queen Street rights-of-way. The contract was tendered early in 2018 but construction was deferred, pending further coordination with City of Brampton works related to transit and other downtown initiatives.

The Phase 2 works consist of a watermain replacement along Queen Street from McLaughlin Road to Main Street. The project has begun preliminary design and is expected to be constructed in 2021.

The Phase 3 works include a Schedule B Class Environmental Assessment to evaluate the most appropriate route for a new 750 mm Feedermain. The study area for this Class EA study is bounded by Wellington Street to the South, Williams Parkway to the north, the railway to the west and Kennedy Road to the east as shown in Figure 1-1. There are additional watermain and sewer renewal works contemplated within the study area that will be further developed under separate projects.

The ultimate purpose of the 750mm Feedermain is to connect to the existing 600mm diameter watermain along John Street and connect to the future 900 mm feedermain along Williams Parkway. This feedermain is intended to be built in phases with the first section starting at Wellington Street to Vodden Street. Interconnections of the proposed Feedermain will be required when the proposed pipe crosses all pipes 400 mm diameter and larger.

1.2 Purpose and Approach

The purpose of this Public and Agency Consultation Plan is to ensure timely, effective and consistent communication with all stakeholders throughout this study. The plan will be used to outline the communications strategy to engage both internal and external stakeholders and will be updated as required throughout the study process. Points of consultation necessary throughout the project will be defined in this document to provide clarity on the timing and transfer of information to and from interested parties.

This project has been identified as a Schedule 'B' project, as defined in the Municipal Class EA process (October 2000, as amended in 2007, 2011, 2015) of the Municipal Engineers Association (MEA). As such, the points of notification and consultation during Phases 1 and 2, as required by the Municipal Class EA process, will be followed. Communication will follow Regional communication protocols to ensure compliance with *Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990 c.M.56, as amended* and continuity between all Regional projects. The process will begin with one of the most critical steps: the development of the Problem/Opportunity Statement. It is imperative that the message relayed through this statement be crafted clearly and concisely as it will guide notices and correspondence to the public and agencies. Pre-consultation efforts will be undertaken with key stakeholder agencies where appropriate.

The goal of the plan is also to enact lessons learned from previous Class EA and municipal planning experiences in order to implement a consultation process that is effective, defensible and traceable.

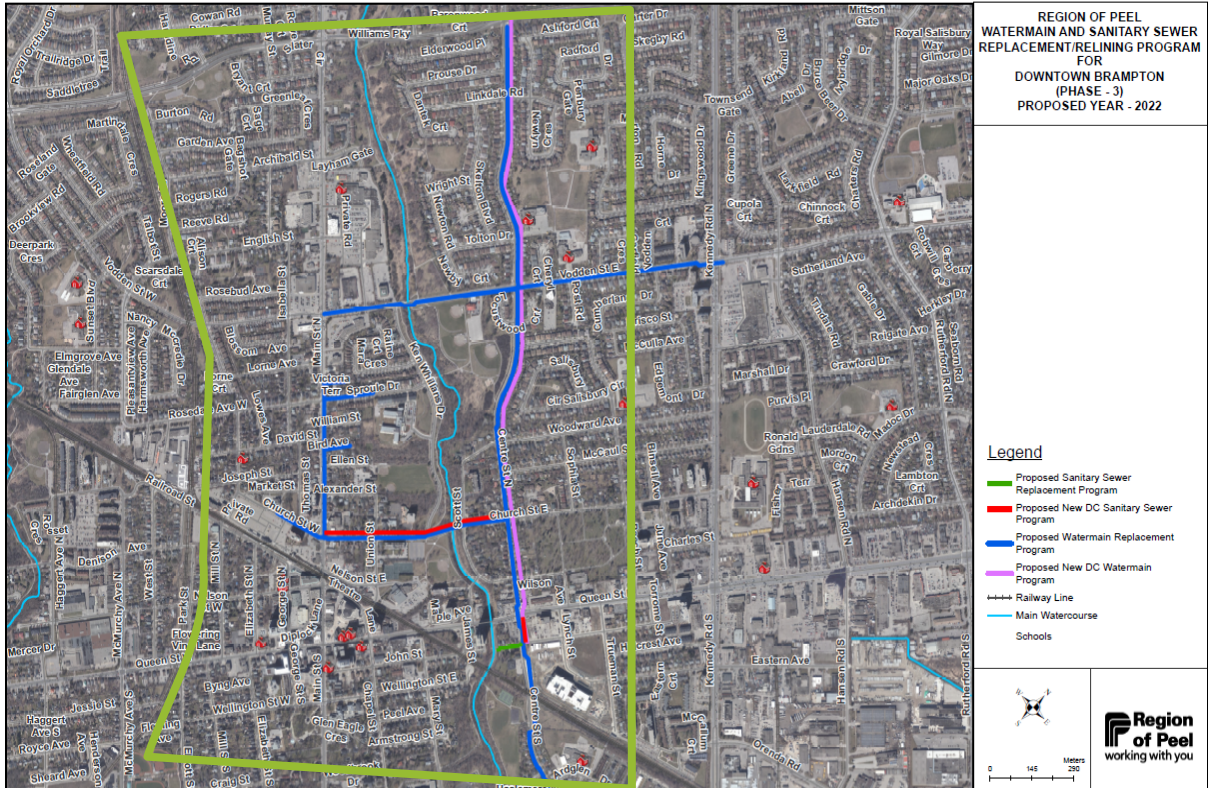

Figure 1-1. Study Area

2. Communication Plan

2.1 External Stakeholder Contact List

A Stakeholder Contact List will be developed that incorporates federal and provincial ministries / agencies, conservation authorities, municipalities, indigenous communities, utilities, rail and transit companies, and affected public within the Study Area (local businesses, institutions and property owners). This list will be updated and revised throughout the project as existing stakeholders express a desire to be removed from the mailing list, and/or as new stakeholders express an interest in being informed. All efforts will be made through collaboration with the Region's communications team and the project manager to ensure that the list is comprehensive.

The Stakeholder Contact List will be organized into categories. The following sections provide a brief overview of what stakeholders will be involved throughout the study.

2.1.1 Municipalities

The City of Brampton will be a key stakeholder in this study as the study area falls within the City of Brampton, City staff who will be engaged will include those working in policy planning (especially those involved in the City's 2040 Vision), parks and forestry services, transit, transportation, asset management, development engineering, and heritage. The Study Area is primarily located in Ward 1 with the lands between Wellington St and Queen St falling in Ward 3, as shown in Figure 2-1. The Councilors for each of these wards will also be notified and engaged as required.

Pre-consultation will be undertaken with City staff prior to the formal commencement of the study in order to help identify issues critical to the City, as well as confirming contact protocols.

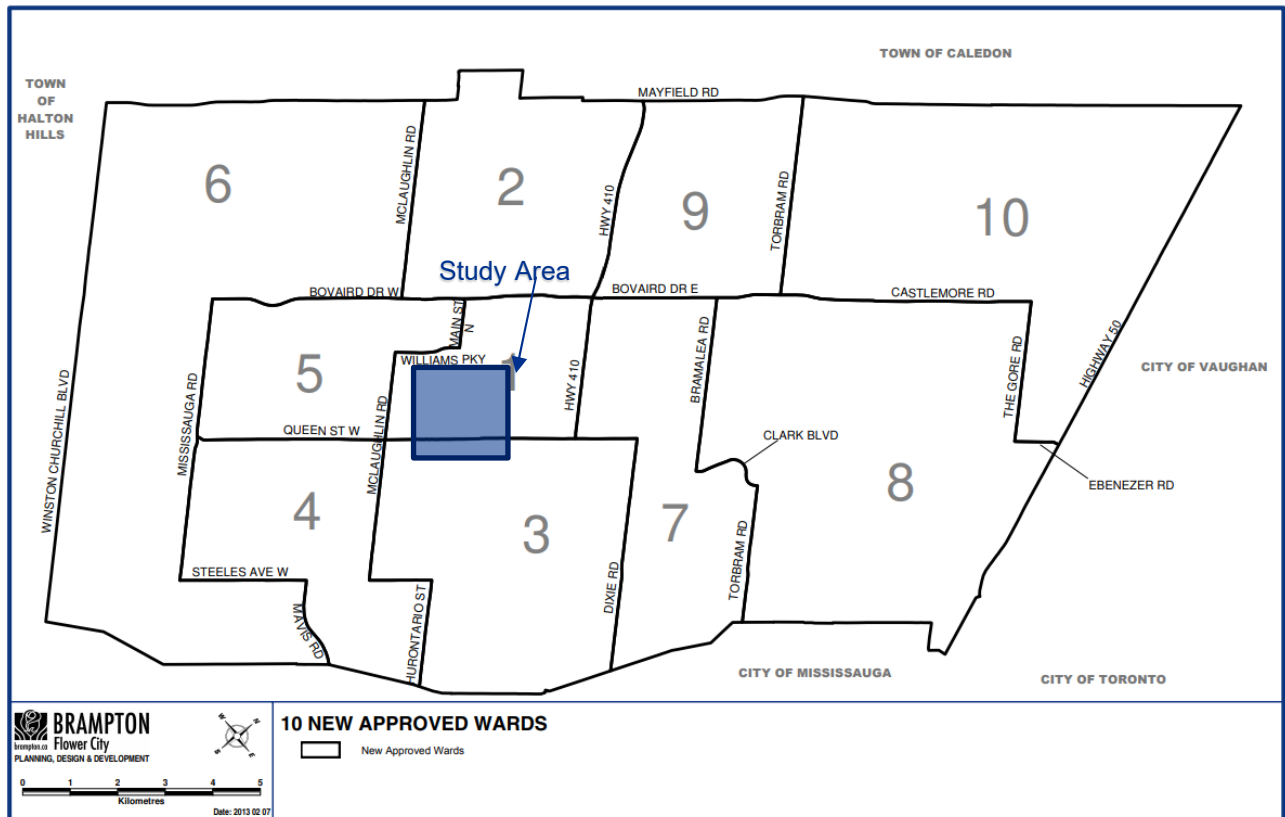

Figure 2-1. Ward Boundaries

2.1.2 Conservation Authorities

The Toronto and Region Conservation Authority (TRCA) will be a key stakeholder in this project as the existing infrastructure and potential solutions are within the Etobicoke Creek floodplains and regulation limits.

Pre-consultation will be undertaken with TRCA, prior to the commencement of the formal Class EA study. The purpose of the consultation will be to help identify issues critical to TRCA, as well as to confirm contact protocols.

2.1.3 Provincial Ministries/ Agencies

Provincial ministries and agencies will be engaged as necessary throughout the project. Key ministries will include:

- Ministry of Environment, Conservation and Parks (MECP), as they must be involved in Environmental Assessments in the province. MECP will be pre-consulted with to identify the EA coordinator for this project. As per MECP protocol, official contact will be made when the Notice of Commencement is sent to the appropriate contacts at MECP, including the EA coordinator. All Notices, including the Project Information Form will be emailed to MECP's Central Region email address.
- Ministry of Natural Resources and Forestry (MNR), as they serve as a contact for Federal agencies.
- Ministry of Tourism, Sport and Culture (MTCS), as they must be informed of any cultural heritage sites within the study area identified through Archaeological Assessments.
- Ministry of Indigenous Affairs (MIA), as they may be of assistance in ensuring appropriate engagement of relevant Indigenous stakeholders.

2.1.4 Federal Ministries/ Agencies

Federal ministries and agencies will also be engaged as necessary throughout the project. Key ministries will be:

- Department of Fisheries and Oceans Canada (DFO), as they must be informed and engaged if any aquatic species at risk may be affected by the study.
- Indigenous and Northern Affairs Canada (INAC), as they may be of assistance in ensuring appropriate engagement of relevant Indigenous stakeholders.

2.1.5 Indigenous Communities

The Region's protocols for engaging with the appropriate indigenous communities will be followed in order to ensure that the legislated 'duty to consult' is satisfied through the MEA Class EA process. MECP will provide the project team with the list of Indigenous Communities to consult within their response to the Notice of Commencement. Once identified, the appropriate indigenous groups will be added to the contact list. As the study progresses, this contact list will be updated to reflect stakeholder interest for continued engagement.

2.1.6 Utilities

Utility companies, including Alectra and Enbridge, will be contacted throughout the study as they have infrastructure and subsequent potential conflicts within the study area. All efforts will be made to ensure that conflicts are avoided/mitigated through effective engagement with the appropriate parties.

2.1.7 Rail and Transit Companies

Rail and transit companies operating or owning infrastructure close to the study area will be contacted throughout the study. Potential conflicts will be identified and addressed as required through stakeholder engagement. The following companies have infrastructure within or around the vicinity of the study area:

- Brampton Transit,
- Canadian National Railway (operating rail services on the Canadian National tracks),

2.1.8 Local Businesses, Institutions and Property Owners

Efforts will be made to engage the appropriate stakeholders owning local businesses, the Downtown Brampton Business Improvement Association (BIA), institutions and properties within the study area. Consultation with property owners regarding land acquisition for easement purposes will require coordination with the Region's Realty Division. As the study progresses, additional stakeholders who express interest in the study will be added to the Stakeholder Contact List and will be further engaged.

2.2 Internal Stakeholder Contact List

The Region will engage with internal stakeholders through distribution of Notices as noted above, invitations to engage with the Project Team at project meetings, and individual consultation as required. This will include the internal groups as listed below:

- Project Sponsor and Advisors
- Infrastructure Planning and Asset Management, State of Good Repair
- Infrastructure Planning and Asset Management, Growth and Water Resources
- Water and Wastewater Hydraulic Modelling Program
- Water Capital, Design & Construction
- Real Estate
- Information Management and Technology

3. Consultation Plan

This Consultation Plan includes study notifications, Public Information Centres, municipal and external agency stakeholder consultation, and public documentation that will be included as part of the Project File report, in line with the MEA Class EA requirements. Should there be the need for enhanced communication methods, this will be identified through subsequent stages of the Class EA.

3.1 Study Notifications

All study notices will be distributed to the Stakeholder Contact List by mail, or by e-mail if no mailing address is available. The notices will also be posted on the Region's project site and will be published in the local newspaper, the *Brampton Guardian*. All notices will be documented as part of the final Project File. The following describes the general process that will be followed for the distribution and publication of the notices.

General:

- Jacobs will prepare a draft Notice and provide to the Region for review
- Region will review and make comments as necessary
- Jacobs will update the draft with the Region's changes and finalize the Notice
- Jacobs will provide the final Notice to the Region
- Region will issue all Notices to the local newspaper directly
- Jacobs will maintain a Correspondence Tracking Sheet throughout the Class EA process
- Jacobs will provide written responses (both on behalf of the Region as well as directly, as necessary) to questions or concerns from stakeholders throughout the Class EA process

Notification to External Stakeholders and Public:

- Jacobs will prepare a cover letter for the Notice, if required
- The letter and the Notice will be sent by mail or email, as required, to contacts in the Stakeholder Contact List at the time of Notice preparation
- Public Notice within the Study Area will be undertaken through publishing the Notice in two consecutive editions of the *Brampton Guardian*

Notification to Internal Stakeholders:

- Region will distribute Notices to internal stakeholders, including Councilors

Notification through Website:

- Region will internally coordinate and publish the Notice on their project website

Notification through Social Media:

- Region will broadcast Public Information Centre (PIC) through its social media accounts closer to the date of the PIC, as this has been found to be more effective than print media

For specific stakeholders identified by the Region and Jacobs, follow-up communication will be pursued to ensure receipt of the Notice. Follow-up may occur in the form of email or phone call.

3.1.1 Notice of Study Commencement

The project will be introduced to the public and stakeholders through the Notice of Study Commencement to formally introduce the project. This notice will contain a brief description of the study, the Class EA process,

preliminary project timeline, the Regional project manager's contact information, and provide methods by which interested stakeholders can get involved (i.e. via the Stakeholder Contact List).

A completed Project Information Form will be sent to MECP's Central Region email address at the time of issuing the Notice of Commencement.

3.1.2 Notice of Public Information Centre No. 1

At the end of Phase 2, the first PIC will be held to present the preliminary preferred solution and the supporting evaluation and analyses to the public and stakeholders. This notice will contain a brief description and an update on the progress of the Class EA study, the Regional project manager's contact information, and methods available for interested stakeholders to get involved at this stage, including details of the PIC (i.e., date, time, location, and brief description of PIC goals and content). The Notice will be issued approximately two weeks ahead of the PIC and will also be posted to the project website.

3.1.3 Notice of Study Completion

At the end of Phase 2, the public and stakeholders will be informed of the Study's completion through the Notice of Study Completion. This notice will contain a brief description of the study, a summary of the preferred design alternative, next steps including details on accessing the Project File and its review period (i.e. locations for viewing hard copies of the Project File, website address to access the electronic copy of the Project File, dates and timing of the review period, and contact information for submitting comments on the Project File).

3.2 Public Information Centre

At the end of Phase 2, the evaluation and the recommendation on the preferred solution will be presented to public and stakeholders at a Public Information Centre. (PIC). The PIC will communicate how the Region has pursued solutions that address the problem/opportunity statement while minimizing impact to the surrounding area through a series of displays and handouts and provide the opportunity for the public and stakeholders to directly connect with the project team. Team members from both the Region and Jacobs will be present at the PIC to explain the project and answer any questions or concerns that attendees may have. The outcome is to obtain feedback on the preliminary preferred solution and/or the evaluation process in order to refine the preferred solution. The PIC will be located at a venue within or within close proximity to the study area and will be set up in an "open house style" format.

The following outlines the overall process that will be followed for the PIC:

- Region will make arrange for the venues
- Jacobs will create draft display panels, sign-in sheets, comments form and any hand-out packages, and provide to the Region for review
- Region will review and make comments as necessary
- Jacobs will update the draft with the Region's changes and finalize the PIC material
- Jacobs will provide a soft copy of the final PIC material to the Region
- Region will post the soft copy of the PIC display material onto the project website
- Jacobs will bring all PIC material to the venue and will ensure project staff is present at the PIC
- Jacobs will collect and document all sign-in sheets and comments forms that are filled out by attendees
- Attendees at the PIC will be added to the Stakeholder Contact List, as required
- Jacobs will provide draft responses to Region for comments and/or concerns received from stakeholders, including those received through the comment forms
- Region will review draft response and make comments as necessary
- Jacobs will update with the Region's changes and issue final responses as required
- Jacobs will prepare a summary report on the PIC (to be incorporated into the Project File)

3.3 Municipal Stakeholder Consultation

As required, the Project Team will arrange one-on-one information meetings with interested parties including Region/City Councillors, City staff, Regional management team and key agencies to provide a forum to further explain the problem/opportunity statement, key challenges and opportunities, alternative alignments and potential impacts. Agendas will be prepared for meetings one week prior to the meetings and written minutes documenting discussions will be provided to all attendees within 1-week timeframe.

At key study milestones, Briefing Notes will also be prepared and issued to councillors to ensure that they are aware of the project's progress and are able to answer any questions or concerns that may arise from their ward's constituents. The Region's Project Manager will send the Briefing Notes to Councillors, as required.

3.4 Public Documentation

The Project File will contain documentation of all relevant public and agency consultation material, including notices, PIC material, information packages, comments and responses (excluding personal contact information), correspondence with stakeholders, and stakeholder meetings.

3.4.1 Correspondence Tracking

The project team will maintain a tracking sheet with all stakeholder correspondence. This will include correspondence letters, e-mails, phone calls, meetings, and completed comments sheets. The project team's responses as well as acknowledgements will also be tracked. The tracking sheet will be incorporated into the ESR (excluding personal information of residents/individuals not representing agencies).

3.4.2 Study Website

The Region's project website will contain all material that is published to the public, including notices, PIC material, and the final ESR. Jacobs will support in the preparation of the content that will be posted to the project website.
