## 1. Executive Summary

EXP Services Inc. (EXP) was retained by Bombardier Inc. ("Client") to complete a Phase One Environmental Site Assessment (ESA) for portions of the following roadways: Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court, in addition to a 5 metre stretch along each side of the roadways, in Mississauga, Ontario (hereinafter referred to as the 'Site') as shown on Figure 1.

The Site has an area of approximately 12.28 hectares (30.34 acres) and is occupied by roadways, sidewalks and landscaped areas. No structures are located at the Site.

It is EXP's understanding that the Client does not intend to redevelop the Site. Given that no change in land use is proposed, filing of a Record of Site Condition (RSCs) will not be required to support the change to a more sensitive land use per Ontario Regulation (O. Reg.) 153/04.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg.153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property. However, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

Based on the Phase One ESA findings, the following information is provided in Table 1-1 in support of the Phase One Qualified Person's (QP's) conclusion:

**Table 1-1: Areas of Potential Environmental Concern**

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Fill Material (PCA 1a)	Entire Site	PCA#30 – Importation of Fill Material of Unknown Quality	On-Site	PAHs, Metals, As, Sb, Se, Boron-Hot Water Soluble (B-HWS), Cyanide (CN <sup>-</sup> ), Mercury (Hg), Chromium (Cr) VI, EC, and SAR	Soil
APEC 1b: Salt Application (PCA 1b)	Entire Site	PCA#30 – Importation of Fill Material of Unknown Quality	On-Site	EC, and SAR	Soil

- (1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the PI ESA, including through (a) identification of post or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities. Refer to Appendix I, Table 2 for the distance and details description of PCAs.
- (2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

## 2 Introduction

EXP Services Inc. (EXP) was retained by Bombardier Inc. (“Client”) to complete a Phase One Environmental Site Assessment (ESA) for portions of the following roadways: Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court, in addition to a 5 metre stretch along each side of the roadways, in Mississauga, Ontario (hereinafter referred to as the 'Site'), as shown on Figure 1.

The Site has an area of approximately 12.28 hectares (30.34 acres) and is occupied by roadways, sidewalks and landscaped areas. No structures are located at the Site.

It is EXP’s understanding that the Client does not intend to redevelop the Site. Given that no change in land use is proposed, filing of a Record of Site Condition (RSCs) will not be required to support the change to a more sensitive land use per Ontario Regulation (O. Reg.) 153/04.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg.153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It should be noted that the objective of this review was to identify any environmental concerns associated with the Site.

### 2.1 Phase One Property Information

Details of the Site are as follows:

Municipal Address	n/a
Current Land Use	Commercial/Industrial/Community
Proposed Land Use	Commercial/Industrial/Community
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 607617 m E 4837530 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	Google Earth
Site Area	12.28 hectares (30.34 acres)
Property Owners, Owner Contact and Address	City of Mississauga/Region of Peel

### 3 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Site through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Obtaining an Environmental Risk Information Services Ltd. (ERIS) report for the Site and surrounding properties within a 250 metre radius of the Site;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Site;
- Reviewing available reports previously completed at the Site;
- Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide EXP staff with unrestricted access to all areas of the Site and Site buildings (as required by O.Reg. 153/04, as amended);
- Conducting a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
- Conducting a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that may have impacted the environmental condition of the Site; and,
- Preparing a report to document the findings.

The following sections summarize the information gathered by EXP during the Phase One ESA and identifies Potentially Contaminating Activities (PCAs) on the Phase One property and in the Phase One study area, and Areas of Potential Environmental Concern (APECs) associated with the Site. APECs and PCAs are defined in the O. Reg 153/04, as amended.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses or monitoring.

EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or any of the statements made by others.

EXP personnel who conducted assessment work for this project included Mr. Philip Gaggi, Ms. Kate Miles, and Mr. Kelvin Lee, P.Eng, M.Eng, QP<sub>ESA</sub>. An outline of their qualifications is provided in Appendix B.

## 4 Record Review

### 4.1 General

#### 4.1.1 Phase One Study Area Determination

The Site is located in Mississauga, Ontario and consists of portions of the following roadways: Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court, in addition to a 5 metre stretch along each side of the roadways, as shown on Figure 1.

The Phase One Study Area consists of properties within a distance of approximately 250 metres from the Site boundaries. The Phase One Study Area is bound by commercial/industrial properties in all directions, including portions of Pearson International Airport to the southeast.

The Phase One Study Area and a Surrounding Land Use Plan are shown on Figure 2.

#### 4.1.2 First Developed Use Determination

Based on a review of historical aerial photographs, historical maps, and other records, the Site was first developed with Derry Road East and Bramalea Road prior to the 1950s, with development of the remaining roadways in the 1990s.

#### 4.1.3 Fire Insurance Plans

A search of the Catalogue of Canadian Fire Insurance Plans 1875 – 1975 (Catalogue) was conducted by Opta Information Intelligence to determine if FIPs were available for the site. Based on a review of the Catalogue, no FIPs or site plans were available for the site or the Phase One Study Area.

A copy of the Opta response is provided in Appendix C.

#### 4.1.4 Insurance Reports

No insurance reports were identified for the Site at the time of this Phase One ESA.

#### 4.1.5 Chain of Title

The search for the historic chain of titles that comprise the Site was not completed for the Site as the Site history was established using historical information available from other sources.

#### 4.1.6 Environmental Reports

No reports were available for review at the time of this Phase One ESA.

### 4.2 Environmental Source Information

#### 4.2.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase One Study Area was completed by Environmental Risk Information Services (ERIS) on November 12, 2020, requested by EXP Services Inc.

EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the ERIS report is provided in Appendix D.

A summary of the significant findings pertaining to the Site and properties within the Phase One Study Area is provided below:

	Description	Data Base	Associated PCA(s)
<b>Site</b>			
Derry Road East and Telford Way	<p>In 1993, 45 litres of diesel fuel was spilled to the roadway and catchbasin.</p> <p>In 2011, Moore Brothers Transport spilled 15 litres of diesel to the road due to a motor vehicle accident.</p>	SPL, GEN	PCA#Other – Spill
Derry Road and Bramalea	<p>In 2001, Dufferin Construction spilled 500 litres of concrete sealing compound to the ground.</p> <p>In 2002, Canadian Waste Services spilled 60 litres of hydraulic oil to the road and catchbasin.</p> <p>In 2007, Pronorth Transportation spilled 100 litres of diesel to the catchbasin and road due to a motor vehicle accident.</p> <p>A CA was issued in 2001 for municipal and private watermain construction on Bramalea Road.</p> <p>Greater Toronto Airports Authority was granted an ECA in 2001 for municipal and private water works.</p>	SPL, CA, ECA	PCA#Other – Spill
Southbound Bramalea Road, north of Derry Road	<p>In 2017, LJW Transport Co. spilled 20 litres of diesel to the ground.</p>	SPL	PCA#Other – Spill
<b>Surrounding Properties</b>			
6925 Bramalea Road (immediately southeast of the Site – Derry Road East and Bramalea Road)	<p>Dufferin Construction was listed as a private fuel outlet with a 45,460 litre capacity; one 22,730 litre liquid fuel single wall gasoline UST and one 22,730 liquid fuel single wall diesel UST.</p> <p>In 1996 Dufferin Construction spilled 100 litres diesel fuel to the soil from an above-ground tank leak.</p> <p>Dufferin Construction Co (asphalt paving) was registered as a waste generator of heavy fuels from 1992 to 1998.</p>	PRT, SPL, GEN, FSTH, FST	<p>PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks</p> <p>PCA#Other – Spill</p> <p>PCA#5 – Asphalt and Bitumen Manufacturing</p>
1900 Derry Road East (immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East)	<p>Bombardier Regional – Aircraft was listed in Scott’s Manufacturing Directory for transportation equipment and supplies, except motor vehicles in 1993.</p> <p>Bombardier Aerospace was listed in Scott’s Manufacturing Directory for all other machinery, equipment and supplies wholesale-distribution in 1993.</p> <p>Bombardier Inc. was registered as a waste generator of paint/pigment/coating residues, petroleum distillates, organic laboratory chemicals and waste compressed gases from 2002 to 2004.</p>	SCT, GEN	<p>PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles</p> <p>Based on the nature of the business of COSS Systems Inc. (software publishing), it is not considered to be a PCA.</p>

### 4.2.3 Ontario Ministry of the Environment Records

#### 4.2.3.1 Ministry of the Environment, Conservation and Parks (MECP)

No Freedom of Information and Protection of Privacy Act (FOI) request was made for the Site as it consists of public roadways.

#### 4.2.3.2 Ministry of the Environment and Climate Change Databases

The ERIS report summarized in the Federal and Provincial Database Search section of the report included a summary relevant records from MECP databases (see section 4.2.1). The databases include the following: Environmental Bill of Rights (EBR), Brownfields Environmental Site Registry, Hazardous Waste Information Network (HWIN) and Waste Disposal Sites.

### 4.2.4 Technical Standards and Safety Authority

Requests were made to the TSSA by email on November 12, 2020 for information regarding fuel storage. The Technical Standards and Safety Authority (TSSA) is the Provincial regulatory agency responsible for overseeing the storage of fuels in Ontario. As such, the TSSA maintains a database (approximately 1987 to present) of all registered fuel storage tanks in Ontario.

A written response for the TSSA was received on November 12 and 13, 2020. According to a search of their database, the following records were identified at surrounding properties:

- Propane cylinder exchange facility and self-serve gasoline station with liquid fuel tanks at 1700 Derry Road East;
- Propane refill centre at 1746 Alstep Drive;
- Propane refill centre, filling plant and propane tanks at 6900 Tranmere Drive.

The propane refill centres and tanks are not considered to be PCAs. The gasoline station at 1700 Derry Road East is considered to be a PCA: PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks

A copy of the e-mail correspondence with the TSSA is provided in Appendix F.

## 4.3 Physical Setting Sources

### 4.3.1 Aerial Photographs

Aerial photographs were obtained in order to review the development and land use history of the Site, as well as to the land in the immediate vicinity of the Site. The aerial photographs dated 1954, 1966, 1975, 1985, 1999, 2007 and 2019 were obtained from Mississauga Maps, an online interactive mapping tool.

The development and land use history of the Site and adjacent properties as depicted on the reviewed aerial photography is summarized in the table below. Copies of the aerial photographs are included in Appendix G.

Aerial Photography Year	Observations
1954	<ul style="list-style-type: none"> <li>• The Site has been developed with two roadways (Derry Road East and Bramalea Road).</li> <li>• The remainder of the Site is vacant/agricultural.</li> <li>• A watercourse crosses Derry Road East in the northeast corner of the Site.</li> <li>• The surrounding properties are vacant/agricultural.</li> <li>• Airport construction is observed to the southeast of the Site.</li> </ul>
1966	<ul style="list-style-type: none"> <li>• The Site appears similar to the 1954 aerial photograph.</li> <li>• Development is observed at the surrounding properties to the south and west of the Site.</li> <li>• The airport has been developed to the southeast of the Site.</li> </ul>
1975	<ul style="list-style-type: none"> <li>• The Site appears similar to the 1966 aerial photograph.</li> <li>• Additional development is observed at the surrounding properties to the north of the Site.</li> <li>• Additional runways for the airport are observed to the south of the Site.</li> </ul>
1985	<ul style="list-style-type: none"> <li>• The Site appears similar to the 1975 aerial photograph.</li> <li>• Additional development is observed at the surrounding properties to the north of the Site.</li> </ul>
1999	<ul style="list-style-type: none"> <li>• Additional roadways have been constructed in the southwestern portion of the Site (Telford Way, Menkes Drive, Alstep Drive and Menway Court).</li> </ul>

Aerial Photography Year	Observations
	<ul style="list-style-type: none"> <li>The properties to the northwest and southwest of the Site have been developed with commercial/industrial structures.</li> <li>Development is observed to the northeast of the Site, adjacent to Bramalea Road</li> </ul>
2007	<ul style="list-style-type: none"> <li>The Site appears similar to the 1999 aerial photograph.</li> <li>New industrial properties have been developed to the north and northeast. Airplanes can be seen at the property to the northeast.</li> </ul>
2019	<ul style="list-style-type: none"> <li>The Site appears similar to the 2007 aerial photograph.</li> <li>New industrial properties have been developed to the north and northeast.</li> </ul>

Based on the reviewed aerial photographs, the following PCAs were identified:

- Potential industrial use at the neighbouring properties to north, east and south.
- Potential airplane storage/maintenance at the neighbouring property to the northeast.

#### 4.3.2 Topography, Hydrology and Geology

The following physiographic, geological and soil maps were reviewed:

- Ontario Geological Survey 2010. Surficial geology of southern Ontario; Ontario Geological Survey, Miscellaneous Release— Data 128 – Revised
- Ontario Geological Survey 2011. 1:250 000 scale bedrock geology of Ontario; Ontario Geological Survey, Miscellaneous Release---Data 126-Revision 1
- Chapman, L.J. and Putnam, D.F. 2007. Physiography of Southern Ontario; Ontario Geological Survey, Miscellaneous Release — Data 22

Based on the review of the above maps, the following information was obtained:

- Regional groundwater flow across the Site is expected to be directed southward, towards the Etobicoke Creek and Lake Ontario, located approximately 330 m southeast, and 22 km south of the Site, respectively.
- The Site is located in the physiographic region known as the Peel Plain. The surficial geology of the Site is comprised of clay to silt-textured till (derived from glaciolacustrine deposits or shale).
- The bedrock in the general area consists of primarily shale, limestone, dolostone, and siltstone, and is part of the Georgian Bay Formation, Blue Mountain Formation, Billings Formation, Collingwood Member and Eastwood Member.

#### 4.3.3 Fill Materials

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property, and to backfill excavations.

It is possible that fill material is present on-Site. This aspect is associated with PCA#30– Importation of Fill Material of Unknown Quality.

#### **4.3.4 Areas of Natural Significance**

Based on the review of available resources from the Ministry of Natural Resources website (Ontario Ministry of Natural Resources), a wetland is located to the immediate northeast of the Site, adjacent to Derry Road East.

#### **4.3.5 Well Records**

##### **4.3.5.1 Water Wells**

A search of the water well database was conducted to identify water wells within the Phase One Study Area.

Based on the database records and the Ontario Well Record website, approximately 200 wells are located within the Phase One Study Area installed between 1952 and 2018.

##### **4.3.5.2 Oil, Gas, and Salt Wells**

Based on the ERIS report, no oil, gas and/or salt wells were located within the Phase One Study Area.

*Derry Road East and Bramalea Road, Mississauga, ON  
Phase One ESA  
STR-02018572-00  
December 17, 2021 (Revised on June 14, 2022)*

#### 4.4 Site Operating Records

In general, a request is usually made to the property representative for copies of any operating records pertaining to the environmental conditions at the Site. Records would include: regulatory permits; Material Safety Data Sheets (MSDS) for all chemicals that were handled on-Site; underground utility drawings; inventories of chemicals, chemical usage, and chemical storage areas; inventory of aboveground storage tanks (ASTs) and underground storage tanks (USTs); environmental monitoring data; correspondence pertaining to an order or request by the MECP or TSSA; waste management records; process, production, and maintenance documents; records of spills and records of discharges of chemicals; emergency response and contingency plans, including spill prevention and contingency plans; environmental audit reports; and site plans of the facility showing areas of production and manufacturing.

No records pertaining to on Site operations were available.

## 5. Interviews

An interview was conducted with the individual identified to be the most knowledgeable about both the current and historical site uses. The interview was conducted in order to obtain information to assist in identifying APECs and identify details of PCAs or potential contaminant pathways, in, on or below the site.

Ms. Chastity Smith, was interviewed by phone on November 10, 2021. Ms. Smith stated that she has worked for the Region of Peel for two years, and has no knowledge of any environmental concerns at the site.

## 6. Site Reconnaissance

### 6.1 General Requirements

The Phase One ESA Site reconnaissance was conducted on November 11, 2020, between 12:00 pm and 2:00 pm by Mr. Philip Gaggi under the supervision of Mr. Kelvin Lee, P.Eng., QP<sub>ESA</sub>, a Qualified Person as defined by O.Reg. 153/04, as amended. On the day of the Site reconnaissance, the weather was sunny and approximately 17 °C.

The Site and the adjoining properties were observed from the Site and/or publicly accessible areas. Photographs documenting the Site visit are included in Appendix H.

### 6.2 Specific Observations at Phase One ESA Property

#### 6.2.1 Site Description and Buildings

The Site is located in Mississauga, Ontario and consists of portions of the following roadways: Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court, in addition to a 5 metre stretch along each side of the roadways (see Figure 1). The Site has an area of approximately 12.28 hectares (30.34 acres) and no municipal address.

The majority of the Site consists of asphalt paved roadways, with sidewalks and landscaped areas.

No other buildings or structures were observed at the time of the Site visit.

#### 6.2.2 Heating and Cooling Systems

At the time of the Site visit, no structures were located at the Site.

#### 6.2.3 Site Utilities and Services

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance, markings noted on the survey drawing provided by the Client, and the information from the locates that were completed for the Site. The Site utilities are summarized in the table below, where available.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge Gas	Unknown	Unknown
Sanitary Sewer	Regional of Peel	Unknown	Unknown
Storm Sewer	Region of Peel (Derry Road right-of-way) /	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes	Several storm sewers were observed along the roadways.

Utility	Source	Location	Site Entry
	City of Mississauga	Drive and Menway Court	
Water	Region of Peel	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court	Fire hydrants were noted along the roadways
Electricity	Alectra	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court	Overhead hydro lines were located along the roadways
Telecommunications	Bell Rogers	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court	Communications boxes were noted along the roadways.

#### 6.2.4 Sewage and Wastewater Disposal

The Site is serviced by municipal storm sewer systems.

#### 6.2.5 Potable Water Sources

The Phase One Study Area is provided with municipal water, sourced from Lake Ontario.

#### 6.2.6 Abandoned and Existing Wells

No wells were observed on the Site during the Site visit.

#### 6.2.7 Site Production and Manufacturing

There are no on-Site production or manufacturing activities.

#### 6.2.8 Drains, Pits and Sumps

At the time of the Site visit, catchbasins were observed along the roadways.

### **6.2.9 Storage Tanks**

The presence/absence and condition (if present) of underground storage tanks (USTs) and aboveground storage tanks (ASTs) at the Site were assessed during the Site visit.

No evidence of ASTs or USTs was observed during the Site visit.

### **6.2.10 Water Wells**

No potable water wells were observed or reported at the time of the Site visit.

### **6.2.11 Site Housekeeping**

Housekeeping at the Site was generally considered to be good.

### **6.2.12 Chemical Storage and Handling and Floor Condition**

No chemicals were observed during the Site visit.

### **6.2.13 Areas of Stained Soil, Pavement or Stressed Vegetation**

No stressed vegetation or staining was observed during the Site visit.

### **6.2.14 Fill and Debris**

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property and to backfill excavations.

It is possible that fill material is present on-Site. This aspect is associated with PCA#30– Importation of Fill Material of Unknown Quality.

### **6.2.15 Air Emissions**

Regulatory control of air emissions in Ontario is the responsibility of the MECP. According to the Environmental Protection Act (EPA), a Certificate of Approval (CofA) or Environmental Compliance Approval (ECA) for air is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29th, 1988. Retroactive approval should be sought for equipment installed and unchanged between 1972 and June 29th, 1988 when the requirement for an ECA was added to the EPA. Unless explicitly exempted, most industrial processes or modifications to industrial processes and equipment require an ECA. The EPA provides a list of specific equipment and conditions, which are exempt from ECA (Air) requirements (i.e. fuel burning equipment for comfort heating in a building using natural gas or number 2 fuel oil at a rate of less than 1.5 million British Thermal Units per hour [BTU/hour]).

Based on the observations made at the time of the Site visit, an ECA is not likely required for the Site.

### **6.2.16 Polychlorinated Biphenyls (PCBs)**

At the time of the Site visit, no potential PCB oil containing transformers were observed at the Site.

### 6.3 Enhanced Investigation Property Observations

An Enhanced Investigation Property is “(i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry-cleaning equipment” (O.Reg. 153/04).

Based on the information reviewed on the historical use of the Site (roadways and vacant/agricultural lands), the Site is not classified as an Enhanced Investigation Property.

### 6.4 Adjacent and Surrounding Properties

A visual reconnaissance of the adjacent properties, and properties within the Phase One Study Area was conducted from publicly accessible areas to identify the occupants; and document any PCAs that may be contributing to an APEC at the Site.

Based on the visual reconnaissance of adjacent and surrounding properties within the Phase One Study Area, the following properties were identified to be associated with a PCAs as identified as per Table 2, Schedule D of O.Reg.153/04, as amended:

Direction	Address	Occupants	Associated PCA
Immediately northeast of the Site – Bramalea Road	6895 Bramalea Road	Fex Ex Ship Centre	PCA#11 – Commercial Trucking and Container Terminals
Immediately south of the Site – Bramalea Road and Boylen Road	1980 Boylen Road	Beatty and Woods Ltd.	PCA#57 – Vehicles and Associated Parts Manufacturing
Immediately southwest of the Site – Bramalea Road	7070 Bramalea Road	Davidson Precision Manufacturing	PCA#33 – Metal Treatment, Coating, Plating and Finishing
	7070 Bramalea Road	Eastern Machining Ltd.	PCA#33 – Metal Treatment, Coating, Plating and Finishing
Immediately northwest of the Site –Derry Road East and Bramalea Road	7050 Bramalea Road	RK Printing and Signs	PCA#31 – Ink Manufacturing, Processing and Bulk Storage
	7050 Bramalea Road	Espeut Auto Repair	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
Immediately southeast of the Site (Derry Road East)	1650 Derry Road East	Front End Specialists Ltd.	PCA#10 – Commercial Autobody Shops
Immediately south of the Site – Derry Road East and Menkes Drive	1700 Derry Road East	Husky Gas Station	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks

*Derry Road East and Bramalea Road, Mississauga, ON  
Phase One ESA  
STR-02018572-00  
December 17, 2021 (Revised on June 14, 2022)*

Direction	Address	Occupants	Associated PCA
Immediately southeast of the Site –Alstep Drive	1766 Alstep Drive	Car-Challenger Auto Repair Inc.	PCA#10 – Commercial Autobody Shops
Immediately adjacent – south of Alstep Drive and Menway Court	1780 Alstep Drive	Certified Cylinder	PCA#33 – Metal Treatment, Coating, Plating and Finishing
Immediately southeast of the Site –Alstep Drive	1840 Alstep Drive	Steelgate Security Products Ltd.	PCA#33 – Metal Treatment, Coating, Plating and Finishing
Immediately adjacent – northwest of Alstep Drive, southeast of Derry Road East and northeast of Menkes Drive	6975 Menkes Drive	Day and Ross	PCA#11 – Commercial Trucking and Container Terminals
Immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East	1850 Derry Road East	National Energy Equipment Inc.	PCA#19 – Electronic and Computer Equipment Manufacturing
Immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East	1900 Derry Road East	TORLYS Floors	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
Immediately adjacent – northwest of Alstep Drive, southeast of Derry Road East and southwest of Bramalea Road	1930 Derry Road East	UPS Canada	PCA#11 – Commercial Trucking and Container Terminals

## 6.5 Written Description of Investigation

A reconnaissance of the Site was conducted by EXP to examine the exterior portions of the Site. The exterior portions of the Site were examined for evidence of utilities and related infrastructure; water wells; Site drainage and related infrastructure; stained areas; stressed vegetation; and, evidence of fill material, as was any evidence of USTs and ASTs.

The reconnaissance of the Site included an examination of all properties within the Phase One Study Area from public access ways to document and characterize PCAs, water bodies and areas of natural significance.

## 7. Review and Evaluation of Information

### 7.1 Current and Past Uses

Based on a review of historical aerial photographs, historical maps, and other records, the Site was first developed with Derry Road East and Bramalea Road prior to the 1950s, with development of the remaining roadways in the 1990s.

### 7.2 Potentially Contaminating Activities (PCAs)

A list of all the PCAs identified at the Site and within the Phase One Study Area are listed in the CSM (Appendix I) and shown on Figure 2.

### 7.3 Areas of Potential Environmental Concern (APECs)

Since the inferred groundwater flow direction is anticipated to be to the south, the properties within the Phase One Study Area south of the Site were considered to be hydraulically down-gradient of the Site; and, the properties to the east and west of the Site were considered to be hydraulically trans-gradient to the Site. Furthermore, any PCAs located significantly distant from the Site (>60 m) were considered to be too distant to be contributing to an APEC on the Site.

The following PCAs were considered to contribute to an APEC:

PCAs identified at the Site; and, PCAs located on immediately adjacent properties (off-Site) or situated up-gradient to the Site with respect to the anticipated groundwater flow direction;

The APECs identified at the Site are summarized in the CSM (Appendix I) and on Figure 4.

## 8. Conclusions

### 8.1 Whether Phase Two ESA Required Before RSC Submitted

Given that no change in land use is proposed, filing of Record of Site Condition will not be required for the site. Based on the results and findings of the Phase One ESA, a Phase Two ESA is required to investigate the following APECs identified on the Phase One Property:

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Fill Material (PCA 1a)	Entire Site	PCA#30 – Importation of Fill Material of Unknown Quality	On-Site	PAHs, Metals, As, Sb, Se, Boron-Hot Water Soluble (B-HWS), Cyanide (CN <sup>-</sup> ), Mercury (Hg), Chromium (Cr) VI, EC, and SAR	Soil
APEC 1b: Salt Application (PCA 1b)	Entire Site	PCA#30 – Importation of Fill Material of Unknown Quality	On-Site	EC, and SAR	Soil
APEC 2: Spills at Derry Road East and Telford Way (PCA 2)	Intersection of Derry Road East and Telford Way	PCA#Other – Spill	On-Site	PHCs, BTEX	Soil and groundwater
APEC 3: Spills at Derry Road East and Bramalea Road (PCA 3)	Intersection of Derry Road East and Bramalea Road	PCA#Other – Spill	On-Site	PHCs, VOCs, PAHs	Soil and groundwater
APEC 4: Spill at Bramalea Road (PCA 4)	Bramalea Road, north of Derry Road East	PCA#Other – Spill	On-Site	PHCs, BTEX	Soil and groundwater
APEC 5: Commercial/Industrial uses at 1746, 1766, 1770 and 1780 Alstep Drive (PCAs 6a to 8b)	Alstep Drive and Menway Court	PCA#10 – Commercial Autobody Shops PCA#31 – Ink Manufacturing, Processing and Bulk Storage PCA#33 – Metal Treatment, Coating, Plating and Finishing	Off-Site	PHCs, VOCs, PAHs, Metals, As, Sb, Se, B-HWS, CN <sup>-</sup> , Hg, and Cr VI	Soil and Groundwater

(1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the PI ESA, including through (a) identification of post or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities. Refer to Appendix I, Table 2 for the distance and details description of PCAs.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site.

## 8.2 RSC Based on Phase One ESA Alone

Given that no change in land use is proposed, filing of Record of Site Condition will not be required for the Site at this time. A Phase Two ESA is required to investigate the APECs identified in this Phase One ESA, prior to filing an RSC, if required.

## Appendix A – Limitation of Liability, Scope of Report, and Third-Party Reliance

## LIMITATIONS AND USE OF REPORT

### BASIS OF REPORT

The Report is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or the Client has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Where applicable, recommended field services are the minimum necessary to ascertain that construction is being carried out in general conformity with building code guidelines, generally accepted practices and EXP's recommendations. Any reduction in the level of services recommended will result in EXP providing qualified opinions regarding the adequacy of the work. EXP can assist design professionals or contractors retained by the Client to review applicable plans, drawings, and specifications as they relate to the Report or to conduct field reviews during construction.

### RELIANCE ON INFORMATION PROVIDED

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to EXP.

### STANDARD OF CARE

This report ("Report") has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

### COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

## USE OF REPORT

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

## REPORT FORMAT

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

## Appendix B – Qualification of Assessors

**Kelvin Lee, P.Eng., M.Eng. (Project Manager)**

Kelvin Lee obtained a Bachelor of Chemical Engineering degree from McMaster University in 2010 and a Master of Chemical Engineering degree from University of Toronto in 2015. Mr. Lee is a professional engineer in Ontario, Manitoba, and Saskatchewan, and is a Qualified Person (QP) for environmental site assessments under Ontario Regulation 153/04. He has nine (9) years of experience in managing a variety of Phase One and Phase Two environmental site assessments (ESAs), delineation programs, fuel storage tank decommissioning projects, ex-situ and in-situ remediation projects, risk assessments and vapour intrusion assessments, and peer reviews. Mr. Lee has also managed various ESAs projects located across Canada and United State of America.

**Kate Miles, B.Sc. (Project Scientist)**

Kate Miles graduated from Queen's University with a Bachelor of Science in Chemical Engineering in 2010, and from Ryerson University's Chang School of Continuing Education with a certificate in Environmental Engineering Science in 2014. She has over four years of experience in environmental consulting. She is a licensed professional engineer in Ontario.

**Philip Gaggi, B.Sc. (Field Scientist)**

Philip Gaggi graduated from York University in 2017 with an Honours Bachelor of Science degree, specializing in Environmental Biology. Since joining EXP in 2018 Philip has worked on several Phase II environmental assessments, from conducting field work to the reporting phases.

## Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

## Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

## Entire Agreement

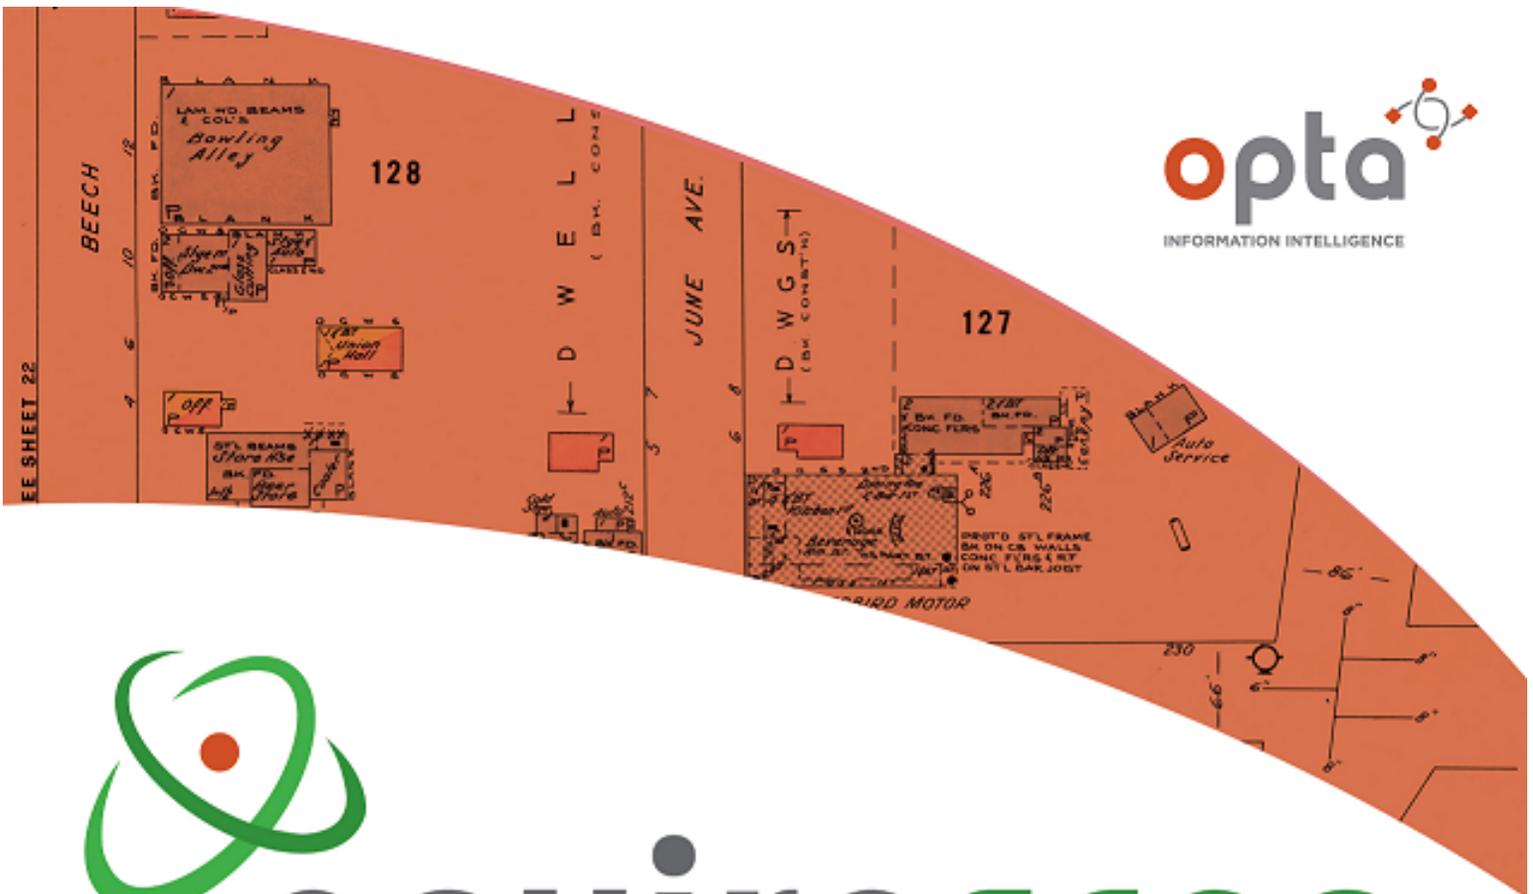

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

## Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

## Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

<b>Project Description:</b>		The proponent assembles gear reduction units at its facility located at 7860 Tranmere Drive in Mississauga. This application is for the use and operation of a paint spray booth, drying oven and gas fired comfort heating equipment. The paint spray booth uses solvent based paints and is equipped with filter media to control overspray. Solvent vapours are released to the atmosphere through a roof mounted stack.

<b>Project Description:</b>		This application is for modifications to the existing facility, approved under Certificate of Approval No. 8-3324-94-978. The company is proposing to replace the No. 1 Roland printing press with a new 55" KBA press. The new press will be served by two stacks. The emissions from the new press IR curing oven will be exhausted at a maximum proposed flow rate of 1.7 cubic meters per second.

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

## **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

## **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2020**

## **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

## **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

## **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

## **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jun 30, 2020**

## **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Jan 2004-Dec 2017**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Jun 30, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Sep 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Dec 2019**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Sep 30, 2020**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2019**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Jul 31, 2020**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Oct 31, 2020**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Sep 30, 2020**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Oct 31, 2020**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jul 31, 2020**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2019**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Apr 2020**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2020**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2018**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Mar 31, 2020**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2020**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2020**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Sep 30, 2020**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011-Oct 31, 2020**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Sep 30, 2020**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2020**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Jun 30, 2020**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Nov 2019**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Jul 31, 2020**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Oct 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Apr 30, 2020**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Good Afternoon,

I would like to request a preliminary search to determine if there are any records of petroleum operations, including records of underground storage tanks and products stored that you might have on file for the following municipal addresses:

1650 Derry Road East, Mississauga  
1700 Derry Road East, Mississauga  
1850 Derry Road East, Mississauga  
1900 Derry Road East, Mississauga  
2190 Derry Road East, Mississauga  
6895 Bramalea Road, Mississauga  
7050 Bramalea Road, Mississauga  
7070 Bramalea Road, Mississauga

Thank you!

## Appendix I – Phase One ESA Conceptual Site Model

## Phase One ESA Conceptual Site Model

### Derry Road East and Bramalea Road, Mississauga, Ontario

This section presents the Phase One Conceptual Site Model (P1CSM), as it relates to the Site designated as Derry Road East and Bramalea Road, Mississauga, Ontario, providing a narrative and graphical description integrating information related to the areas of potential environmental concern/potential contaminating activities and the presence and distribution of potential contaminants of concern. The P1CSM was completed in accordance with Ontario Regulation 153/04, as amended (O.Reg.153/04), as defined by the Ontario Ministry Environment, Conservation and Parks (MECP). There is no uncertainty or absence of information noted in the Phase One Environmental Site Assessment.

### 1.1 Introduction

The Site is located in Mississauga, Ontario and consists of portions of the following roadways: Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court, in addition to a 5 metre stretch along each side of the roadways, as shown on Figure 1.

**Table 1:** Site Identification Information

Municipal Address	n/a
Current Land Use	Commercial/Industrial
Proposed Land Use	Commercial/Industrial
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 607617 m E 4837530 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	Google Earth
Site Area	12.28 hectares (30.34 acres)
Property Owners, Owner Contact and Address	City of Mississauga/Region of Peel

### 1.2 Background

Based on a review of historical aerial photographs, historical maps, and other records, the Site was first developed with Derry Road East and Bramalea Road prior to the 1950s, with development of the remaining roadways in the 1990s.

### 1.3 Geological and Hydrogeological Conditions

The Site and surrounding areas are expected to consist of clay to silt-textured till (derived from glaciolacustrine deposits or shale). The bedrock in the general area consists of primarily shale, limestone, dolostone, and siltstone, and is part of the Georgian Bay Formation, Blue Mountain Formation, Billings Formation, Collingwood Member and Eastwood Member.

According to the topographic map from Natural Resources of Canada (Toporama), regional groundwater flow across the Site is expected to be directed southward, towards Lake Ontario.

Based on the review of available resources from the Ministry of Natural Resources and Forestry website on December 1, 2020, a wetland is located to the immediate northeast of the Site, adjacent to Derry Road East.

## 1.4 Previous Investigations

No reports were available for review at the time of this Phase One ESA.

## 1.5 Underground Utilities

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance, markings noted on the survey drawing provided by the Client, and the information from the locates that were completed for the Site. The Site utilities are summarized in the table below, where available.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge Gas	Unknown	Unknown
Sanitary Sewer	Region of Peel	Unknown	Unknown
Storm Sewer	Region of Peel (Derry Road right-of-way) / City of Mississauga	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court	Several storm sewers were observed along the roadways.
Water	Region of Peel	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court	Fire hydrants were noted along the roadways
Electricity	Alectra	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court	Overhead hydro lines were located along the roadways
Telecommunications	Bell, Rogers	Along Bramalea Road, Derry Road East, Telford Way, Alstep Drive, Menkes Drive and Menway Court	Communications boxes were noted along the roadways.

## 1.6 Potentially Contaminating Activities and Areas of Potential Environmental Concern:

Refer to Table 2 and Figure 2 for the list of potentially contaminating activities (PCAs) that have occurred within the Phase One Study Area, which includes the Site and properties within 250 m radius of the Site boundaries.

**Table 2:** Potentially Contaminating Activities

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
<b>Site</b>					
1a	n/a	On-Site	PCA#30 - Importation of Fill Material of Unknown Quality	As the Site consists of roadways, it is possible that fill material was imported during construction.	Yes, as this was on-Site.
1b	n/a	On-site	Other – Salt Application	Salt is applied on the Site during the winter season	Yes, as this was on-Site
2	Derry Road and Telford Way	On-Site	PCA#Other - Spill	Based on the ERIS report, two spills occurred at this intersection; a 45 litre diesel spill and a 15 litre diesel spill.	Yes, as this was on-Site.
3	Derry Road East and Bramalea Road	On-Site	PCA#Other - Spill	Based on the ERIS report, three spills occurred at this intersection; 500 litres of concrete sealing compound, 60 litres of hydraulic oil and 100 litres of diesel.	Yes, as this was on-Site.
4	Bramalea Road, north of Derry Road	On-Site	PCA#Other - Spill	Based on the ERIS report, a 20 litre diesel spill occurred at this location.	Yes, as this was on-Site.
<b>Surrounding Properties</b>					
5	1746 Alstep Drive	Immediately south of the Site – Menkes Drive and Alstep Drive	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report, a printing company (Turbo Images Inc.) was listed as a waste generator at the property from 2016 to 2018.	Yes, based on the close proximity to the Site.
6a	1766 Alstep Drive	Immediately southeast of the Site – Alstep Drive	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report and City Directories, Martin Stainless Technology and Canadian BJ Screw Products were located at the property from 1994 to 2000.	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
6b	1766 Alstep Drive	Immediately southeast of the Site –Alstep Drive	PCA#10 – Commercial Autobody Shops	Based on the ERIS report and City Directories, Lally's Auto Service and Unitech Enterprises were located at the property, in addition, based on the Site inspection Car-Challenger Auto Repair Inc. is currently located at the property.	Yes, based on the close proximity to the Site.
6c	1766 Alstep Drive	Immediately southeast of the Site –Alstep Drive	PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing	Based on the ERIS report Nu-Tech Moulding was registered as a waste generator at the property from 2007 to 2015 and based on the city directories MS Magnum Mfg. was located at the property in 1994.	Yes, based on the close proximity to the Site.
7a	1770 Alstep Drive	Immediately southeast of the Site –Alstep Drive	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS Report Union Roto-Graving Inc./ URG Graphics Inc. was registered as a waste generator at the property.	Yes, based on the close proximity to the Site.
7b	1770 Alstep Drive	Immediately southeast of the Site –Alstep Drive	PCA#47 – Rubber Manufacturing and Processing	Based on the ERIS report, Union Roto-Graving Inc./ URG Graphics Inc. were listed for rubber manufacturing in Scott's Manufacturing Directory.	Yes, based on the close proximity to the Site.
7c	1770 Alstep Drive	Immediately southeast of the Site –Alstep Drive	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Based on the ERIS report, Aura Kitchens & Cabinetry Inc. was registered as a waste generator from 2014 to 2020.	Yes, based on the close proximity to the Site.
8a	1780 Alstep Drive	Immediately adjacent – south of Alstep Drive and Menway Court	PCA#Other – Spill	Based on the ERIS report, in 1998, Canada Cartage Systems Ltd. spilled 450 litres of diesel to the ground due to equipment failure. The contaminated soil was excavated.	Yes, based on the close proximity to the Site.
8b	1780 Alstep Drive	Immediately adjacent – south of Alstep Drive and Menway Court	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report and Site inspection, Certified Cylinder Services has been located at the property since 2016, and is listed as a waste generator.	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
9	1816 Alstep Drive	Immediately southeast of the Site – Alstep Drive	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Based on the ERIS report and city directories, Remac Door & Hardware Inc./Remac Builders Hardware was located at the property from 1994 to 2000.	Yes, based on the close proximity to the Site.
10a	1825 Alstep Drive	Immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East	PCA#Other – Spill	Based on the ERIS report, in 2006, Loxor Transport spilled 70 litres of diesel to the ground and storm sewer.	Yes, based on the close proximity to the Site.
10b	1825 Alstep Drive	Immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East	PCA#11 – Commercial Trucking and Container Terminals	Mass Cargo International Canada Inc. was listed in the 2000 city directory.	Yes, based on the close proximity to the Site.
11a	1840 Alstep Drive	Immediately southeast of the Site – Alstep Drive	PCA#34 – Metal Fabrication	Based on the ERIS report, Pierce-All Inc. and ElSCO Lighting Products were previously located at the property and Steelgate Security Products Ltd. is currently located at the property.	Yes, based on the close proximity to the Site.
11b	1840 Alstep Drive	Immediately southeast of the Site – Alstep Drive	PCA#57 – Vehicles and Associated Parts Manufacturing	Based on the ERIS report, Aviall Services Inc. was registered as a waste generator.	Yes, based on the close proximity to the Site.
12a	6895 Bramalea Road	Immediately northeast of the Site – Bramalea Road	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the ERIS report, Federal Express Canada Ltd. (Bramalea Road Vehicle Maintenance) was registered as a waste generator.	Yes, based on the close proximity to the Site.
12b	6895 Bramalea Road	Immediately northeast of the Site – Bramalea Road	PCA#11 – Commercial Trucking and Container Terminals	Based on the Site inspection, Fed Ex Ship Centre is located at this location.	Yes, based on the close proximity to the Site.
12c	6895 Bramalea Road	Immediately northeast of the Site – Bramalea Road	PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Based on the ERIS report, an aviation company (Morningstar Air Express Caravan) was registered as a waste generator from 2018 to 2020.	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
13a	6925 Bramalea Road	Immediately southeast of the Site – Derry Road East and Bramalea Road	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	Based on the ERIS report, gasoline and diesel USTs were located at the former Dufferin Construction property. In addition, in 1996 Dufferin Construction spilled 100 litres diesel fuel to the soil from an above-ground tank leak.	Yes, based on the close proximity to the Site.
13b	6925 Bramalea Road	Immediately southeast of the Site – Derry Road East and Bramalea Road	PCA#5 – Asphalt and Bitumen Manufacturing	Based on the ERIS report, an asphalt paving company (Dufferin Construction Co) was registered as a waste generator from 1992 to 1998.	Yes, based on the close proximity to the Site.
14a	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Based on the ERIS report, various wood product manufacturing companies (Skilled Railings & Stairs Inc., and Wood Encountered Custom-Built) were located at the property.	Yes, based on the close proximity to the Site.
14b	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report and city directories, Minuteman Press was located at this property in 2000; based on the Site inspection, RK Printing and Signs is currently located at the property.	Yes, based on the close proximity to the Site.
14c	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#49 – Salvage Yard, including automobile wrecking	Based on the ERIS report, New Era Rebuilder and Engine Land Japanese Auto Parts were listed at the property for used and rebuilt automotive parts and automobile wrecking and recycling.	Yes, based on the close proximity to the Site.
14d	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#42 – Pharmaceutical Manufacturing and Processing	Based on the ERIS report, Eco-Med Pharmaceutical Inc. was located at the property.	Yes, based on the close proximity to the Site.
14e	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, a machine shop (M-Tech Ltd.) was located at the property.	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
14f	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#39 – Paints Manufacturing, Processing and Bulk Storage	Based on the ERIS report, a paintball company (Champions Paint Balls Inc.) was located at the property.	Yes, based on the close proximity to the Site.
14g	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#10 – Commercial Autobody Shops	Based on the city directories, Derrick's Auto Centre was located at the property in 2000.	Yes, based on the close proximity to the Site.
14h	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	Based on the city directories, Nitrochem Lubricants was located at the property in 2000.	Yes, based on the close proximity to the Site.
14i	7050 Bramalea Road	Immediately northwest of the Site –Derry Road East and Bramalea Road	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the site inspection, Espeut Auto Repair is located at the property.	Yes, based on the close proximity to the Site.
15a	7070 Bramalea Road	Immediately southwest of the Site – Bramalea Road	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, city directories and site inspection, various machine shop/metal companies (Eastern Machining Ltd., Tool Technology Inc., Mercury Tool and Die and Precision Tool and Die) were located at the property.	Yes, based on the close proximity to the Site.
15b	7070 Bramalea Road	Immediately southwest of the Site – Bramalea Road	PCA#49 – Salvage Yard, including automobile wrecking	Based on the ERIS report, Neu Friend Auto Parts was listed at the property for used and rebuilt automobile parts & supplies and tire, battery, parts and supplies.	Yes, based on the close proximity to the Site.
15c	7070 Bramalea Road	Immediately southwest of the Site – Bramalea Road	PCA#11 – Commercial Trucking and Container Terminals	Based on the City Directories various transportation companies (Portage Logistics, Portage Trucking and Royal Crown Transport) were listed at the property in 1994.	Yes, based on the close proximity to the Site.
16a	1980 Boylen Road	Immediately south of the Site –	PCA#43 – Plastics (including Fibreglass)	Based on the ERIS report and city directories, a plastics company (Optek	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
		Bramalea Road and Boylen Road	Manufacturing and Processing	Precision Tooling Limited) was located at the property.	
16b	1980 Boylen Road	Immediately south of the Site – Bramalea Road and Boylen Road	PCA#57 – Vehicles and Associated Parts Manufacturing	Based on the ERIS report, city directories and site inspection, various vehicle parts manufacturing companies (Beatty & Woods Ltd., Canadian Pragmatics Ltd. and Automotive Alternatives) were located at the property.	Yes, based on the close proximity to the Site.
16c	1980 Boylen Road	Immediately south of the Site – Bramalea Road and Boylen Road	PCA#7 – Boat Manufacturing	Based on the ERIS report and city directories, a boat manufacturing company (Championship Marine Inc.) was located at the property from 1986 to 1998.	Yes, based on the close proximity to the Site.
17a	1981 Boylen Road	Immediately west of the Site – Bramalea Road and Boylen Road	PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing	Based on the ERIS report and city directories, various plastics companies (Beta Plastics Inc. and Trillium Labels & ID Systems Inc.) were located at the property.	Yes, based on the close proximity to the Site.
17b	1981 Boylen Road	Immediately west of the Site – Bramalea Road and Boylen Road	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report, various printing companies (M & M Business Forms Inc. and Trillium Labels & ID Systems Inc.) were located at the property.	Yes, based on the close proximity to the Site.
17c	1981 Boylen Road	Immediately west of the Site – Bramalea Road and Boylen Road	PCA#33 – Metal Treatment, Coating, Plating and Finishing	<p>Based on the ERIS report, various metal companies (Julien Enterprises Inc., and Eagle MHE Inc.) were located at the property.</p> <p>Based on the city directories a metal company (Kolmer Installation Inc.) was located at the property in 1989.</p> <p>Based on the city directories, aerospace coatings companies (Tristar Aerospace Ltd. and BSP Aerospace Products) were located at the property in 2000 and 1994.</p>	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
17d	1981 Boylen Road	Immediately west of the Site – Bramalea Road and Boylen Road	PCA#Other – Spill	Based on the ERIS report, in 2016, Pagonis Transport spilled 80 litres of fuel to the ground.	Yes, based on the close proximity to the Site.
17e	1981 Boylen Road	Immediately west of the Site – Bramalea Road and Boylen Road	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Based on the ERIS report, various woodworking and wood manufacturing companies (Canoak Woodworking Inc. Long Distance Packing Special, Send Me a Sign, Ace Kitchen & Cabinets Nourheaurd Specialty Woodworking and Rainbow Woodworking) were located at the property.	Yes, based on the close proximity to the Site.
18	1650 Derry Road East	Immediately southeast of the Site (Derry Road East)	PCA#10 – Commercial Autobody Shops	Based on the site inspection, an autobody shop is currently located at the property (Front End Specialists Ltd.)	Yes, based on the close proximity to the Site.
19	1700 Derry Road East	Immediately south of the Site – Derry Road East and Menkes Drive	PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks	Based on the ERIS report and site inspection a gasoline station with four gasoline USTs and one diesel UST is located at the property.	Yes, based on the close proximity to the Site.
20a	1850 Derry Road East	Immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East	PCA#19 – Electronic and Computer Equipment Manufacturing	Based on the ERIS report and site inspection, an electronics company (National Energy Equipment Ltd.) is located at the property.	Yes, based on the close proximity to the Site.
20b	1850 Derry Road East	Immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, a metal fixtures company (Maax Inc.) was located at the property in 2000.	Yes, based on the close proximity to the Site.
21a	1900 Derry Road East	Immediately adjacent – northwest of Alstep Drive and southeast of Derry Road East	PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Based on the ERIS report, and aerospace company, Bombardier Inc. was registered as a waste generator at the property from 2002 to 2004.	Yes, based on the close proximity to the Site.
21b	1900 Derry Road East	Immediately adjacent – northwest of Alstep Drive and	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of	Based on the ERIS Report and site inspection, a wood flooring warehouse (Torlys) was listed as a waste	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
		southeast of Derry Road East	Treated and Preserved Wood Products	generator at the property in 2010, and is still occupying the property.	
22a	1930 Derry Road East	Immediately adjacent – northwest of Alstep Drive, southeast of Derry Road East and southwest of Bramalea Road	PCA#11 – Commercial Trucking and Container Terminals	Based on the ERIS Report and site inspection, various couriers (UPS SCS Inc. and Menio Worldwide Forwarding) are/were located at the property.	Yes, based on the close proximity to the Site.
22b	1930 Derry Road East	Immediately adjacent – northwest of Alstep Drive, southeast of Derry Road East and southwest of Bramalea Road	PCA#21 – Explosives and Firing Range	Based on the city directories, a skeet club was located at the property in 1989.	Yes, based on the close proximity to the Site.
23	Adjacent to 1930 Derry Road	Immediately adjacent – northwest of Alstep Drive, southeast of Derry Road East and southwest of Bramalea Road	PCA#21 – Explosives and Firing Range	Based on the ERIS report, the property adjacent to the former skeet club is listed as a federal contaminated site.	Yes, based on the close proximity to the Site.
24a	2190 Derry Road East	Immediately southeast of the Site – Derry Road	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the ERIS report, the maintenance department of Federal Express Canada Ltd. was listed as a waste generator at the property from 2000 to 2016.	Yes, based on the close proximity to the Site.
24b	2190 Derry Road East	Immediately southeast of the Site – Derry Road East	PCA#11 – Commercial Trucking and Container Terminals	Based on the ERIS report, a courier (Federal Express Canada Ltd.) was located at the property.	Yes, based on the close proximity to the Site.
24c	2190 Derry Road East	Immediately southeast of the Site – Derry Road East	PCA#3 – Airstrips and Hangars Operation	Based on the ERIS report, and aerial photographs, there are airplanes parked on the property.	Yes, based on the close proximity to the Site.
25	2025 Logistics Drive	Immediately north of the Site – Bramalea Road and Logistics Drive	PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Based on the ERIS report, air flight simulator manufacturing (CAE Inc.) was registered as a waste generator at the property.	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
26	6975 Menkes Drive	Immediately adjacent – northwest of Alstep Drive, southeast of Derry Road East and northeast of Menkes Drive	PCA#11 – Commercial Trucking and Container Terminals	Based on the ERIS report, couriers (Sameday Rightaway and Sameday Worldwide) were listed as waste generators at the property. Based on the site inspection, a transportation company (Day and Ross) is currently located at the property.	Yes, based on the close proximity to the Site.
27	6895 Menway Court	Immediately northeast of the Site – Menway Court	PCA#Other – plaster company	Based on the ERIS report, a plaster company (Plasterform Inc.) was located at the property.	Yes, based on the close proximity to the Site.
28	6885 Menway Court	Immediately northeast of the Site – Menway Court	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, a metal closures company (BMP Canada Metal Products) was registered as a waste generator at the property from 1989 to 1998.	Yes, based on the close proximity to the Site.
29	6886 Menway Court	Immediately southwest of the Site – Menway Court	PCA#11 – Commercial Trucking and Container Terminals	Based on the ERIS report, a transportation company (Schneider National Inc.) was registered as a waste generator at the property in 2020.	Yes, based on the close proximity to the Site.
30a	7033 Telford Way	Immediately north/northeast, of the Site – Telford Way, Tranmere Drive, and Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report and city directories, various fireplace/ furnace and/or metal companies (Napoleon Home Comfort, Encore Heating & Air, Tri-Canada Industries Ltd. and Alpha Consumers Fireplace) were located at the property.	Yes, based on the close proximity to the Site.
30b	7033 Telford Way	Immediately north/northeast, of the Site – Telford Way, Tranmere Drive, and Derry Road East	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report and city directories, a printing company (Kwik Copy Printing) was located at the property from 1992 to 2001.	Yes, based on the close proximity to the Site.
30c	7033 Telford Way	Immediately north/northeast, of the Site – Telford Way, Tranmere Drive, and Derry Road East	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Based on the city directories, Alpha Woodworking was listed at the property in 1994 and 2000.	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
30d	7033 Telford Way	Immediately north/northeast, of the Site – Telford Way, Tranmere Drive, and Derry Road East	PCA#10 – Commercial Autobody Shops	Based on the city directories, Royal Autoglass was located at the property in 1994 and Royal Windshield was located at the property in 2000.	Yes, based on the close proximity to the Site.
31a	7050 Telford Way	Immediately southwest of the Site – Tranmere Drive, Telford Way and Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, various metal companies (Leybold Canada Inc., Vacuum Products Canada Inc., Canadian Parking Equipment, PowerCart Systems Inc. and MAG IAS Canada Inc.) were located at the property. Based on the ERIS report, Phil's Iron Works Ltd. was located at the property.	Yes, based on the close proximity to the Site.
31b	7050 Telford Way	Immediately southwest of the Site – Tranmere Drive, Telford Way and Derry Road East	PCA#11 – Commercial Trucking and Container Terminals	Based on the city directories, transportation companies (Brinks Canada, Bus Parcel Express and Greyhound Canada) were located at the property.	Yes, based on the close proximity to the Site.
32a	6900 Tranmere Drive	Immediately north of the Site – Tranmere Drive and Telford Way	PCA#Other – spill	Based on the ERIS report, four spills occurred at the property; a unknown volume of diesel to the road and sewer in 1994, a 5 litre 1,1,1-trichloroethane spill to the yard in 1990, a sediment spill to Etobicoke Creek in 2018, and an 80 litre isopropyl alcohol spill in 2019 to the parking lot and catch basin.	Yes, based on the close proximity to the Site.
32b	6900 Tranmere Drive	Immediately north of the Site – Tranmere Drive and Telford Way	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on the ERIS report Loomis Courier had a 4,000 litre retail fuel tank located at the property.	Yes, based on the close proximity to the Site.
32c	6900 Tranmere Drive	Immediately north of the Site – Tranmere Drive and Telford Way	PCA#11 – Commercial Trucking and Container Terminals	Based on the ERIS report and city directories, various couriers/trucking companies (Loomis Courier Service Ltd. and CCT Logistics/CCT Canada) were located at the property.	Yes, based on the close proximity to the Site.

				Sultan Auto) were located at the property.	
35d	7015 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report, various printing/publishing companies were located at the property (Aijit Newspaper Advertising Marketing & Communication Inc., Aijit Weekly, Aijit Broadcasting Corporation and Colourchrome Laboratories Ltd.)	Yes, based on the close proximity to the Site.
35e	7015 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#Other - spill	Based on the ERIS report, in 2008, 9 litres of solvent was spilled to the catchbasin.	Yes, based on the close proximity to the Site.
36a	7045 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing	Based on the ERIS report, a plastics company (Genaray Sunflower) was located at the property.	Yes, based on the close proximity to the Site.
36b	7045 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#11 – Commercial Trucking and Container Terminals	Based on the city directories, various transportation companies (All Makes Logistics, Floyd Motor Lines and Advantage Air Sea Shipping Ltd.) were located at the property.	Yes, based on the close proximity to the Site.
36c	7045 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on city directies, mobile door and promark aluminum ltd. were located at the property.	Yes, based on the close proximity to the Site.
36d	7045 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the city directories, Boss Printshop Co was located at the property in 1994.	Yes, based on the close proximity to the Site.
37a	7065 Tranmere Drive	Immediately northwest of the Site –Derry Road East	PCA#19 – Electronic and Computer Equipment Manufacturing	Based on the ERIS report and city directories, various electronics/computer companies were located at the property (Intermec Technologies and Embac Controls Inc.)	Yes, based on the close proximity to the Site.
37b	7065 Tranmere Drive	Immediately northwest of the Site –Derry Road East	PCA#39 – Paints Manufacturing, Processing and Bulk Storage	Based on the ERIS report, a paint and coating company (Furnace Mineral Products Inc.) was listed as a waste	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
				generator at the property from 2015 to 2016.	
37c	7065 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#2 – Adhesives and Resins Manufacturing, Processing and Bulk Storage	Based on the ERIS report, Eutectic Canada Inc. was registered as a waste generator at the property from 2018 to 2020.	Yes, based on the close proximity to the Site.
37d	7065 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the city directories, Bonhill Die Inc. was located at the property in 1989.	Yes, based on the close proximity to the Site.
38	7890 Tranmere Drive	Immediately northwest of the Site – Telford Way and Tranmere Drive	PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing	Based on the ERIS report, two plastics companies (Uniglobe (Canada) Inc. and Tanasons Holdings Limited) were listed as waste generators at the property.	Yes, based on the close proximity to the Site.
39a	7895 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, various metals companies (Corrpro Canada Inc., Addex Technologies Inc. and NISR Future Visions Inc.) were located at the property.	Yes, based on the close proximity to the Site.
39b	7895 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#57 – Vehicles and Associated Parts Manufacturing	Based on the ERIS report, Motion Concept Vehicles was located at the property.	Yes, based on the close proximity to the Site.
39c	7895 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing	Based on the ERIS report and city directory, various plastics companies (Factotum Plastics Technologies, Sig Plastic Technologies (Can) and Widescan Inc.) were located at the property.	Yes, based on the close proximity to the Site.
39d	7895 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#2 – Adhesives and Resins Manufacturing, Processing and Bulk Storage	Based on the ERIS report, Corrosion Interventions Ltd. was located at the property.	Yes, based on the close proximity to the Site.
39e	7895 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report, a commercial printing company, T N T Graphix Inc. was located at the property.	Yes, based on the close proximity to the Site.

PCA Identifier	Address	Location of Activity (in relation to Site) <sup>(1)</sup>	Potentially Contaminating Activity (PCA) <sup>(2)</sup>	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
39f	7895 Tranmere Drive	Immediately northwest of the Site – Derry Road East	PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Based on the ERIS report, an aviation company (Aeropol Aviation Services Corp.) was registered as a waste generator at the property from 1998 to 2013.	Yes, based on the close proximity to the Site.
40	1804 Alstep Drive	Immediately southeast of the Site – Alstep Drive and Menway Court	PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Based on the ERIS report and city directories, Deca Aviation Engineering was located at this property.	No, as the property consists of a commercial office building, it unlikely that any industrial activities occurred.
41	1970 Boylen Road	Approximately 50 metres southwest of the Site – Bramalea Road	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report and city directories, Alumet Mfg was located at the property.	No, based on the separation distance and cross-gradient location relative to the Site.
42	2000 Drew Road	Approximately 230 metres northwest of the Site – Bramalea Road and Boylen Road	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, various metal stamping/manufacturing businesses were located at the property (Ascent Tool Corporation, Jitsu Mfg. Inc, and Hi-Lite Systems Inc.)	No, based on the separation distance from the Site.
43	1930 Drew Road	Approximately 225 metres northwest of the Site – Bramalea Road and Boylen Road	PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing.	Based on the ERIS report, Star Plastics Inc. was located at the property.	No, based on the separation distance from the Site.
44a	7017 Fir Tree Drive	Approximately 80 metres northeast of the Site – Derry Road East	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the ERIS report, Lincoln Canada was listed as a waste generator at the property.	No, based on the separation distance from the Site.
44b	7017 Fir Tree Drive	Approximately 80 metres northeast of the Site – Derry Road East	PCA#2 – Adhesives and Resins Manufacturing, Processing and Bulk Storage	Based on the ERIS report Kleiberit Adhesives was registered as a waste generator of graphic art wastes from 1998 to 2001.	No, based on the separation distance from the Site.
45	7040 Fir Tree Drive	Approximately 175 metres north of the Site – Derry Road East	PCA#34 – Metal Fabrication	Based on the ERIS report, various metal fabrication companies (DiPaolo Machine Works Ltd.,	No, based on the separation distance from the Site.

66c	7220 Tranmere Drive	Approximately 225 metres northwest of the Site – Bramalea Road and Boylen Road	PCA#11 – Commercial Trucking and Container Terminals	Based on the city directories, Levis Cartage was located at the property in 1989.	No, based on the separation distance from the Site.
67	7225 Tranmere Drive	Approximately 145 metres northwest of the Site – Boylen Road and Bramalea Road	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, FH Welding Machines Ltd. was registered as a waste generator from 1988 to 2019 and was listed in the 1994 and 2000 city directories.	No, based on the separation distance from the Site.
68a	7830 Tranmere Drive	Approximately 190 metres northwest of the Site – Telford Way and Tranmere Drive	PCA#45 – Pulp, Paper and Paperboard Manufacturing and Processing	Based on the ERIS report and city directories, various paperboard manufacturing companies (Paperboard, Somerville Packaging, Cascades Boxboard Inc. and Graphic Packaging International Canada ULC) were located at the property.	No, based on the separation distance from the Site.
68b	7830 Tranmere Drive	Approximately 190 metres northwest of the Site – Telford Way and Tranmere Drive	PCA#29 – Glass Manufacturing	Based on the ERIS report and city directories, various glass companies (Technolite Glass Inc., Indalglass and State Contractors Inc.) were located at the property.	No, based on the separation distance from the Site.
69a	7832 Tranmere Drive	Approximately 150 metres northwest of the Site – Derry Road East	PCA#42 – Pharmaceutical Manufacturing and Processing	Based on the ERIS report and city directories, various pharmaceutical manufacturing companies (Mallinckrodt Medical Inc., Dupont Pharma, Bistol-Myers Squibb, Lantheus Medical Imaging and Puritan Bennett) were located at the property.	No, based on the separation distance from the Site.
69b	7832 Tranmere Drive	Approximately 150 metres northwest of the Site – Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report and city directories, a machine shop, Addex Inc. was located at the property from 1994 to 1998.	No, based on the separation distance from the Site.
70	7840 Tranmere Drive	Approximately 150 metres northwest of the Site – Derry Road East	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, a machinery company, Calmec Precision Limited was a waste generator from 1992 to 2014 and was listed in the 1994 and 2000	No, based on the separation distance from the Site.

76b	7885 Tranmere Drive	Approximately 145 metres west of the Site – Telford Way and Tranmere Drive	PCA#7 – Boat Manufacturing	Based on the ERIS report, a canoe manufacturing company (Canadian Canoes) was located at the property.	No, based on the separation distance from the Site.
76c	7885 Tranmere Drive	Approximately 145 metres west of the Site – Telford Way and Tranmere Drive	PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing	Based on the ERIS report and city directories, Multimedia Replication Canada and Sunny Plastics were located at the property.	No, based on the separation distance from the Site.
76d	7885 Tranmere Drive	Approximately 145 metres west of the Site – Telford Way and Tranmere Drive	PCA#49 – Salvage Yard, including automobile wrecking	Based on the ERIS report, Nick's Auto Parts was listed for automobile wrecking and recycling.	No, based on the separation distance from the Site.
76e	7885 Tranmere Drive	Approximately 145 metres west of the Site – Telford Way and Tranmere Drive	PCA#11 – Commercial Trucking and Container Terminals	Based on the ERIS report, a trucking company, A-Industrial Lift Truck Service was registered as a waste generator at the property from 1997 to 2001.	No, based on the separation distance from the Site.
76f	7885 Tranmere Drive	Approximately 145 metres west of the Site – Telford Way and Tranmere Drive	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Based on the ERIS report, Star Custom Shutters Inc. was located at the property.	No, based on the separation distance from the Site.

(1) Distances are approximate. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg 153/04, as amended) that is occurring or has occurred in a phase one Study area.

## 1.7 Areas of Potential Environmental Concern

Based on the evaluation of the PCAs located within the Phase One Study Area, the following areas of potential environmental concern (APECs) were identified, as presented in Figure 4.

**Table 3: Areas of Potential Environmental Concern**

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Fill Material (PCA 1a)	Entire Site	PCA#30 – Importation of Fill Material of Unknown Quality	On-Site	PAHs, Metals, As, Sb, Se, Boron-Hot Water Soluble (B-HWS), Cyanide (CN <sup>-</sup> ), Mercury (Hg), Chromium (Cr) VI, EC, and SAR	Soil
APEC 1b: Salt Application (PCA 1b)	Entire Site	PCA#30 – Importation of Fill Material of Unknown Quality	On-Site	EC, and SAR	Soil
APEC 2: Spills at Derry Road East and Telford Way (PCA 2)	Intersection of Derry Road East and Telford Way	PCA#Other – Spill	On-Site	PHCs, BTEX	Soil and groundwater
APEC 3: Spills at Derry Road East and Bramalea Road (PCA 3)	Intersection of Derry Road East and Bramalea Road	PCA#Other – Spill	On-Site	PHCs, VOCs, PAHs	Soil and groundwater
APEC 4: Spill at Bramalea Road (PCA 4)	Bramalea Road, north of Derry Road East	PCA#Other – Spill	On-Site	PHCs, BTEX	Soil and groundwater

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
<p>APEC 5: Commercial/ Industrial uses at 1746, 1766, 1770 and 1780 Alstep Drive (PCAs 6a to 8b)</p>	<p>Alstep Drive and Menway Court</p>	<p>PCA#10 – Commercial Autobody Shops  PCA#31 – Ink Manufacturing, Processing and Bulk Storage  PCA#33 – Metal Treatment, Coating, Plating and Finishing  PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing  PCA#47 – Rubber Manufacturing and Processing  PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products  PCA#Other – Spill</p>	<p>Off-Site</p>	<p>PHCs, VOCs, PAHs, Metals, As, Sb, Se, B-HWS, CN<sup>-</sup>, Hg, and Cr VI</p>	<p>Soil and Groundwater</p>
<p>APEC 6: Commercial/ Industrial uses at 1816, 1825 and 1840 Alstep Drive (PCAs 9 to 11b)</p>	<p>Alstep Drive and Menway Court</p>	<p>PCA#11 – Commercial Trucking and Container Terminals  PCA#34 – Metal Fabrication  PCA#57 – Vehicles and Associated Parts Manufacturing  PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products  PCA#Other – Spill</p>	<p>Off-Site</p>	<p>PHCs, VOCs, PAHs, Metals, As, Sb, Se, B-HWS, CN<sup>-</sup>, Hg, and Cr VI</p>	<p>Soil and Groundwater</p>

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
<p>APEC 7: Commercial/ Industrial uses at 6895 and 6925 Bramalea Road  (PCAs 12a to 13b)</p>	<p>Southern portion of Bramalea Road</p>	<p>PCA#5 – Asphalt and Bitumen Manufacturing  PCA#11 – Commercial Trucking and Container Terminals  PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles  PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks  PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems</p>	<p>Off-Site</p>	<p>PHCs, VOCs, PAHs, Metals, As, Sb, Se, B- HWS, CN<sup>-</sup>, Hg, and Cr VI</p>	<p>Soil and Groundwater</p>

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
<p>APEC 8: Commercial/ Industrial uses at 7050 and 7070 Bramalea Road and 1980 Boylan Road (PCAs 14a to 16c)</p>	<p>Northern portion of Bramalea Road and Derry Road East</p>	<p>PCA#7 – Boat Manufacturing PCA#10 – Commercial Autobody Shops PCA#11 – Commercial Trucking and Container Terminals PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks PCA#31 – Ink Manufacturing, Processing and Bulk Storage PCA#33 – Metal Treatment, Coating, Plating and Finishing PCA#39 – Paints Manufacturing, Processing and Bulk Storage PCA#42 – Pharmaceutical Manufacturing and Processing PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing PCA#49 – Salvage Yard, including automobile wrecking PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems PCA#57 – Vehicles and Associated Parts Manufacturing PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products</p>	<p>Off-Site</p>	<p>PHCs, VOCs, PAHs, Metals, As, Sb, Se, B- HWS, CN<sup>-</sup>, Hg, and Cr VI</p>	<p>Soil and Groundwater</p>

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
<p>APEC 9: Commercial/ Industrial uses at 1981 Boylen Road and 2025 Logistics Drive (PCAs 17a to 17e and 25)</p>	<p>Northern portion of Bramalea Road</p>	<p>PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles  PCA#31 – Ink Manufacturing, Processing and Bulk Storage  PCA#33 – Metal Treatment, Coating, Plating and Finishing  PCA#39 – Paints Manufacturing, Processing and Bulk Storage  PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing  PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products  PCA#Other – Spill</p>	<p>Off-Site</p>	<p>PHCs, VOCs, PAHs, Metals, As, Sb, Se, B- HWS, CN<sup>-</sup>, Hg, and Cr VI</p>	<p>Soil and Groundwater</p>

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
<p>APEC 10: Commercial/ Industrial uses at 1650 and 1700 Derry Road East and 7895 Tranmere Drive (PCAs 18, 19, and 39a to 39f)</p>	<p>Western portion of Derry Road East</p>	<p>PCA#10 – Commercial Autobody Shops                      PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles                      PCA#28 - Gasoline and Associated Products Storage in Fixed Tanks                      PCA#31 – Ink Manufacturing, Processing and Bulk Storage                      PCA#33 – Metal Treatment, Coating, Plating and Finishing                      PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing                      PCA#57 – Vehicles and Associated Parts Manufacturing</p>	<p>Off-Site</p>	<p>PHCs, VOCs, PAHs, Metals, As, Sb, Se, B-HWS, CN<sup>-</sup>, Hg, and Cr VI</p>	<p>Soil and Groundwater</p>

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 11: Commercial/ Industrial uses at 1850, 1900 and 1930 Derry Road East (PCAs 20a to 23)	Central portions of Derry Road East and Bramalea Road	PCA#11 – Commercial Trucking and Container Terminals  PCA#19 – Electronic and Computer Equipment Manufacturing  PCA#21 – Explosives and Firing Range  PCA#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles  PCA#33 – Metal Treatment, Coating, Plating and Finishing  PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products  PCA#3 – Airstrips and Hangars Operation	Off-Site	PHCs, VOCs, PAHs, Metals, As, Sb, Se, B- HWS, CN <sup>-</sup> , Hg, and Cr VI	Soil and Groundwater
APEC 12: Commercial/ Industrial uses at 2190 Derry Road East (PCAs 24a to 24c)	Eastern portion of Derry Road East	PCA#11 – Commercial Trucking and Container Terminals  PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Off-Site	PHCs, VOCs, PAHs, Metals, As, Sb, Se, B- HWS, CN <sup>-</sup> , Hg, and Cr VI	Soil and Groundwater
APEC 13: Commercial/ Courier at 6975 Menkes Drive (PCA 26)	Derry Road East, Menkes Drive and Alstep Drive	PCA#11 – Commercial Trucking and Container Terminals	Off-Site	PHCs, VOCs	Soil and Groundwater

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 14: Commercial/ Industrial uses at 6895, 6885 and 6886 Menway Court (PCAs 27 to 29)	Menway Court	PCA#11 – Commercial Trucking and Container Terminals PCA#33 – Metal Treatment, Coating, Plating and Finishing PCA#Other – plaster company	Off-Site	PHCs, VOCs, PAHs, Metals, As, Sb, Se, B- HWS, CN <sup>-</sup> , Hg, and Cr VI	Soil and Groundwater
APEC 15: Commercial/ Industrial uses at 7033 and 7050 Telford Way, 6900 and 7890 Tranmere Drive (PCAs 30a to 32c, and 38)	Telford Way and Derry Road East	PCA#10 – Commercial Autobody Shops PCA#11 – Commercial Trucking and Container Terminals PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks PCA#31 – Ink Manufacturing, Processing and Bulk Storage PCA#33 – Metal Treatment, Coating, Plating and Finishing PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products PCA#Other – food manufacturing PCA#Other – spill	Off-Site	PHCs, VOCs, PAHs, Metals, As, Sb, Se, B- HWS, CN <sup>-</sup> , Hg, and Cr VI	Soil and Groundwater

Area of Potential Environmental Concern (APEC) <sup>1</sup>	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA) <sup>2</sup>	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
<p>APEC 16: Commercial/ Industrial uses at 6975, 6991, 7015, 7045 and 7065 Tranmere Drive (PCAs 33a to 37d)</p>	<p>Derry Road East</p>	<p>PCA#2 – Adhesives and Resins Manufacturing, Processing and Bulk Storage  PCA#11 – Commercial Trucking and Container Terminals  PCA#19 – Electronic and Computer Equipment Manufacturing  PCA#13 – Cosmetics Manufacturing, Processing and Bulk Storage  PCA#31 – Ink Manufacturing, Processing and Bulk Storage  PCA#33 – Metal Treatment, Coating, Plating and Finishing  PCA#39 – Paints Manufacturing, Processing and Bulk Storage  PCA#43 – Plastics (including Fibreglass) Manufacturing and Processing  PCA#45 – Pulp, Paper and Paperboard Manufacturing and Processing  PCA#47 – Rubber Manufacturing and Processing  PCA#49 – Salvage Yard, including automobile wrecking  PCA#57 – Vehicles and Associated Parts Manufacturing  PCA#Other - spill</p>	<p>Off-Site</p>	<p>PHCs, VOCs, PAHs, Metals, As, Sb, Se, B-HWS, CN, Hg, and Cr VI</p>	<p>Soil and Groundwater</p>

(1) Area of Potential Environmental Concern means the area on, in or under a phase one study area where one or more contaminants are potentially present, as determined through the PI ESA, including through (a) identification of past or present uses on, in or under the phase one property, and (b) identification of potentially contaminating activities. Refer to Appendix I, Table 2 for the distance and details description of PCAs.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site.
