#### Substance Release Report

**Category Type ID:** 1  
**Category Type Desc:** Stack / Point  
**Category Type Desc (fr):** Rejets de cheminée ou ponctuels  
**Grouping:** Total Air  
**Trans Code:** ASta  
**Chem:** 1,2,4-Trimethylbenzene  
**Chem (fr):** 1,2,4-Triméthylbenzène  
**Quantity:** 8.79  
**Unit:** tonnes  
**Basis of Estimate Cd:** O  
**Basis of Estimate Desc:** O- Engineering Estimates

**Category Type ID:** 1  
**Category Type Desc:** Stack / Point  
**Category Type Desc (fr):** Rejets de cheminée ou ponctuels  
**Grouping:** Total Air  
**Trans Code:** ASta  
**Chem:** Toluene  
**Chem (fr):** Toluène  
**Quantity:** 5.84  
**Unit:** tonnes  
**Basis of Estimate Cd:** O  
**Basis of Estimate Desc:** O- Engineering Estimates

**Category Type ID:** 1  
**Category Type Desc:** Stack / Point  
**Category Type Desc (fr):** Rejets de cheminée ou ponctuels

<b>Incident Summary:</b>	TransX: 300 to 400 L diesel fuel leak to multiple roadways; contd & clng		
<b>Contaminant Qty:</b>	400 L		

<a href="#"><u>339</u></a>	1 of 27	W/247.1	198.8 / 19.02	95 Biscayne Crescent Brampton ON L6W 4R2	CA
----------------------------	---------	---------	---------------	---------------------------------------------	----

**Certificate #:** 8065-4KPPSP  
**Application Year:** 00  
**Issue Date:** 5/29/00  
**Approval Type:** Industrial air  
**Status:** Approved  
**Application Type:** New Certificate of Approval  
**Client Name:** Amcor Pet Packaging North America  
**Client Address:** 910 Central Parkway West  
**Client City:** Mississauga  
**Client Postal Code:** L5C 2V5  
**Project Description:** This application is for an air Certificate of Approval for three Burg Cooling Towers. The site will include blow

Map Key	Number of Records	Direction/ Distance (m)	Elev/Diff (m)	Site	DB
				moulding facilities for the manufacture of beverage containers. The cooling towers will be used to supply cooling water to the blow moulding process, compressors and other auxiliary equipment. Each cooling tower will have an air flowrate of 39, 500 cfm or 18 m3/s. The cooling tower water will be treated with Biosperse 250 and CSW 825 to control biological growth and the corrosion inhibitor Performax 4401. To control the buildup of solids within the cooling tower water, the manufacturer recommends a bleed off rate of 3.2 US gallons pr minute or 12.1 litres per minute.

**File No:**  
**Crown Brief No:**  
**Court Location:** Mississauga  
**Publication City:**  
**Publication Title:** Two Individuals fined \$5000 each for Environmental Protection Act Violations  
**Act:** Environmental Protection Act  
**Act(s):**  
**First Matter:**  
**Second Matter:**  
**Investigation 1:**  
**Investigation 2:**  
**Penalty Imposed:** On February 2, 2021, Mr. Safarli Vaquif was fined \$5,000 plus a victim fine surcharge of \$1,250 with 18 months to pay the fine.  
On June 22, 2021, Mirkomol Khidoyatov was fined \$5,000 plus a victim fine surcharge of \$1,250, with one year to pay the fine.  
The convictions against Mr. Vaquif and Mr. Khidoyatov relate to permitting the discharge of oil and/or grease waste, into the natural environment, that was likely to cause an adverse effect.

**Description:** The convictions relate to permitting the discharge of a contaminant, namely oil and/or grease waste, into the natural environment.

**Background:** At the time of the violations, Mississauga headquartered company O&B Corporation was in the business of collecting waste cooking oil from restaurants, and then removing water/impurities to render a product known as "yellow grease". This product was then sold for use in the production of biodiesel fuel.  
Safarli Musa Vaqif and Mirkomol Khidoyatov were occasionally hired by O&B Corporation.  
The waste cooking oil rendering process creates substantial quantities of liquid waste, which must then be disposed of at an approved waste disposal site.  
On or about September 30, 2018, the company enlisted Safarli Musa Vaqif and Mirkomol Khidoyatov to assist with the disposal of a waste grease mixture that the company had accumulated.  
Between 3,000 and 4,000 litres of accumulated waste grease mixture was loaded onto a vacuum tanker truck operated by O&B, and Safarli Musa Vaqif drove the truck to a parking lot at the back of a commercial property on Davand Drive in Mississauga, and then parked it next to a railing overlooking a Mississauga owned marsh/ravine greenspace.  
Safarli Musa Vaqif and Mirkomol Khidoyatov along with the owner of O&B, used a hose connected to the vacuum truck to discharge all of the waste grease mixture from the vacuum truck over the railing and down into the ravine/marsh.  
The greenspace area is designated a "significant natural area" and includes a tributary that flows through the ravine/marsh directly into Etobicoke Creek. The ravine provides habitat for a variety of birds, mammals, amphibians and reptiles.  
The waste grease mixture discharged into the ravine is a contaminant and was likely to cause adverse effects including interference with the respiration of plants and invertebrates resulting in the death of these organisms. The discharges also caused foul odours as the rancid grease began to decompose, which impacted neighbouring businesses.  
The ministry's Environmental Investigations and Enforcement Branch investigated and laid charges which resulted in the convictions.
