## Phase One Environmental Site Assessment

---

Acronym	Definition
PCB	polychlorinated biphenyl
Phase One Property (or Site)	a portion of the properties located at 2001 and 2195 Langstaff Road in Vaughan, Ontario
Phase One Study Area	lands within 250 m of the Phase One Property
PHC	petroleum hydrocarbon
ppm	part(s) per million
QPESA	qualified person for environmental site assessment, according to the MECP
Region	Regional Municipality of Peel
RSC	Record of Site Condition
Site (or Phase One Property)	from Kennedy Road South, across Highway 410 and 407, and just past Dixie Road to Derry Road.
TSSA	Technical Standards and Safety Authority
UST	underground storage tank
VOC	volatile organic compound

## 1. Executive Summary

The Region of Peel (Region) retained CHM HILL Canada Limited (now part of Jacobs Engineering Group Inc. [Jacobs]) to complete a Phase One Environmental Site Assessment (ESA) for the chosen alternative of the trunk sewer alignment, which includes all temporary and permanent easements for construction work areas which include shaft locations.

The existing Etobicoke Creek Trunk Sewer, from Kennedy Road to south of Highway 407, consists of primarily twin sanitary sewers ranging in size from 1050-millimetre (mm)- to 1350-mm-diameter pipes constructed as early as 1957. The former Brampton wastewater treatment plant (WWTP), northeast of Highways 410 and 407, also contains trunk sewers that form a key part of the East Trunk System. Several operational and maintenance issues have been reported in the existing sewer, including surcharging, defects in previous rehabilitation efforts, abandoned infrastructure on the former treatment plant site, and difficulty accessing certain sections of the sewer for required operations and maintenance.

The Site will consist of temporary and permanent easements for a total linear length of approximately 4.12 kilometres (km), which includes seven work areas ranging from approximately 650 metres squared (m<sup>2</sup>) to 2,400 m<sup>2</sup>. The Phase One Property consists of crosses from Kennedy Road South, across Highway 410 and 407, and just past Dixie Road to Derry Road. The Phase One Property consists of multiple easements that run through various individual municipal addresses and underneath roadways, the majority of which is owned by The Region of Peel or the City of Mississauga. The Phase One Property consists mainly of forested or grassed vegetated land except for the work area located on the south side of Dixie Road (shaft 5), which is cleared dirt parking area, and the work area located on the north of Dixie Road (shaft 6) which consists of an area associated with a ballpark.

This Phase One ESA report was prepared in general accordance with Schedule D, Part VI, Table 1 of Ontario Regulation (O. Reg.) 153/04, including guidance provided regarding the report format and contents, and is interpreted to satisfy the objectives for a Phase One ESA report (MECP 2011). The Phase One ESA forms part of the Etobicoke Creek Trunk Sewer Project. Jacobs understands that at this time, the Region does not intend to file a Record of Site Condition (RSC) under O. Reg. 153/04.

### 1.1 Site Description and Use

The Phase One Property is a vegetated strip of land that is approximately 4.12 km in length, running from Kennedy Road (south of First Gulf Boulevard), east to Dixie Road, and south to Derry Road East. The municipal addresses of the Phase One Property have historically been vegetated land. Portions of the Phase One Property are commercial or industrial in use and are currently transportation (trucking) facilities (7280 Dixie Road, Mississauga), packaging facilities (15 Westcreek Blvd, Brampton and 12 Clipper Ct, Brampton), and previous vehicle manufacturing (201 Westcreek Boulevard, Brampton).

Based on a records review, and a Site reconnaissance, Jacobs identified 14 APECs within the Phase One Property: 7 attributable to onsite PCAs, and 7 attributable to various offsite PCAs within the Phase One Study Area that were considered to have the potential to impact the Phase One Property.

The 14 identified APECs are summarized as follows:

- APEC-01: Former pesticide use - Aerial photographs show that large portions of the Phase One Property were agricultural from before 1945 until at least 1975.
- APEC-02: Fill of unknown quality - Fill was encountered below the topsoil in the most of referenced historical boreholes in the study area. The thickness or the fill ranged from about 0.8 m to 8.0 m.
- APEC-03: The use of salt on roadways for vehicular and pedestrian safety on highway 410
- APEC-04: The use of salt on roadways for vehicular and pedestrian safety on Westcreek Blvd.
- APEC-05: The use of salt on roadways for vehicular and pedestrian safety on Highway 407.

## Phase One Environmental Site Assessment

---

- APEC-06: The use of salt on roadways for vehicular and pedestrian safety on Tomken Road.
- APEC-07: The use of salt on roadways for vehicular and pedestrian safety on Dixie Road.
- APEC-08: Offsite PCAs that result in an APEC:
  - PCA #57 - Vehicles and Associated Parts Manufacturing: Arvin Meritor Canada, an automobile and light duty motor vehicle manufacturer, was listed at 350 First Gulf Blvd as a waste generator for paint/pigment/coating residues, petroleum distillates, oil skimming's and sludges, organic laboratory chemicals, waste oils and lubricants, and organic acids (2004 to 2010). The property was also listed with NPRI for storage of various VOCs and the release of particulate matter
  - PCA #57 - Vehicles and Associated Parts Manufacturing: Meritor Aftermarket Canada, Inc. , an automobile and light duty motor vehicle manufacturer, (2010 to 2016) was listed at 350 First Gulf Blvd as a waste generator for oil skimming's and sludges, waste oils and lubricants, petroleum distillates, and paint/pigment/coating residues.
  - PCA # 49 - Salvage Yard, including automobile wrecking: Automobile Wrecker Records at 14 Casper Cres. Had 2 Records for ATL Towing and Scrap Car Removal.
  - Other - Mascot Truck Parts - Reported as a used motor vehicle parts and accessories wholesaler and distributor at 350 First Gulf Blvd which was listed as a waste generator of waste oils and lubricants, paint/pigment/coatings residues, petroleum distillates, and oil skimming's and sludges.
- APEC-09: Offsite PCAs that result in an APEC:
  - PCA # 42 - Pharmaceutical Manufacturing and Processing: Pharmaceuticals - Apotex Inc was listed at 250 First Gulf Blvd was a waste generator of pharmaceuticals.
  - Other - Waste generator - 250 First Gulf Blvd was listed under Agfa Inc, were listed as waste generators of alkaline solution containing other metals and non-metals (not cyanide), miscellaneous waste chemicals, and organic acids.
  - Other - DSV Solutions Inc, Virtual Distribution Inc, UTI Contract Logistics and Distributions were listed as a warehouse and storage facility at 250 First Gulf Blvd as a waste generator of organic laboratory chemicals, acid waste - heavy metals, alkaline wastes - heavy metals, pharmaceuticals, aliphatic solvents, and detergents/soaps.
- APEC-10: Offsite PCAs that result in an APEC:
  - PCA # 11 - Commercial Trucking and Container Terminals: Airoute Cargo Ltd., located at 200 First Gulf Blvd, was listed as a waste generator of oils, detergents and soaps, and waste organic chemicals (2018 to 2019).
  - PCA # 11 - Commercial Trucking and Container Terminals: Dicom Express, located at 300 Biscayne Cr, was listed as general freight trucking, local general freight trucking, long distance trucking terminal with a waste generator record. Seven records for Dicom Transportation Group Canada Inc. (2014 to 2022) the waste generator of solvents, light fuels, heavy metals, waste oils, and paint and pigment residues. Gojit was listed at 300 Biscayne Crescent, a s aerospace product and part manufacturing or trucking facility, with a waste generator record. Eight records for (2002 to 2013) the generation of various wastes, including inorganic wastes, solvents, photo processing wastes, light fuels, heavy metals, waste oils, and metals.
  - PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: Dicom Express, located at 300 Biscayne Cr was listed with an expired private fuel outlet. A record indicated that a steel, single wall, diesel fuel AST was installed January 5, 1996
  - PCA # 34 - Metal Fabrication: Magnum Integrated Technologies Inc, located at 200 First Gulf Blvd, was listed as metalworking and machinery manufacturing business, and as a waste generator of paint/pigments/coating residues and waste oils and lubricants.
  - Other - Spills Records - Go Jet spill of 40 L of motor oil to ground from a storage tank overflow in 2005. Gojit Trans spill of 20 L of formaldehyde in 2007 and a 90-L diesel spill to the ground in 2010. One fuel oil spill and leak record was identified for this location. A diesel spill in 2010. Amount not noted.
- APEC-11: Offsite PCA that result in an APEC:

## Phase One Environmental Site Assessment

---

- Other - Frito-Lay Canada/PepsiCo Canada, located at 12 Clipper Court, was identified as a specialty-Line Food Wholesaler-Distributor in Scotts Manufacturing Directory. 13 records for Frito-Lay Canada/PepsiCo Canada (2002 to 2022) as a waste generator of oil skimmings and sludges, petroleum distillates, waste oils, and lubricants.
- APEC-12: Offsite PCA that result in an APEC:
  - PCA # 8 - Chemical Manufacturing, Processing and Bulk Storage: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns, UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons
  - PCA # 11 - Commercial Trucking and Container Terminals: Various business were listed as couriers, including Company 6586856 Canada Inc, DHL Express Canada Limited, Loomis Courier Services and Mayne Logistics Loomis Inc. Company 6586856 Canada Inc, was listed with a total of 9 records (2010 to 2022) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. DHL Express Canada Limited was listed with a total of 2 records (2003 to 2009) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. Loomis Courier Services and Mayne Logistics Loomis Inc was listed with 2 records (2001 and 2002) for waste generation of inorganic laboratory chemicals, aromatic solvents, aliphatic solvents, petroleum distillates, waste oils and lubricants, and organic laboratory chemicals.
  - PCA # 11 - Commercial Trucking and Container Terminals: Clark Transport Inc was listed at 201 Westcreek Blvd as a general freight trucking company. A total of four records (2016 - 2021) for waste generation of miscellaneous waste organic chemicals, light fuels, and/or miscellaneous waste organic chemicals.
  - PCA # 11 - Commercial Trucking and Container Terminals: 12 records for Transex Ltd. (2001 to 2019) for various contaminants, including inorganic wastes, solvents, petroleum distillates, fuels, and heavy metals.
  - PCA #28 - Gasoline and Associated Products Storage in Fixed Tanks (four instances): Aboveground storage tank - petroleum. No other information provided.
  - PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:
    - Former UST-residual fuel impacts
    - PHC impacts at former chlorine contact chambers
    - Active UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons
  - PCA # 30 - Importation of Fill Material of Unknown Quality: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:
    - Unknown fill quality related to area of former septic and sewage system treatment area
    - Metals impacts in soils in garden plot area
    - Storage of contaminated soil
  - PCA # 34 - Metal Fabrication: F-H Welding Machines Ltd was listed at 150-201 Westcreek Blvd as a waste generator of petroleum distillates, waste crankcase oils and lubricants, and/or emulsified oils.
  - PCA # 55 - Transformer Manufacturing, Processing and Use: Three records for Ministry of Environment, Conservation and Parks (2007 to 2011) for PCBs and waste oils and lubricants.
  - PCA # 55 - Transformer Manufacturing, Processing and Use: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:
    - Potential former PCB-containing transformer
    - Improper storage of PCB ballasts
    - Storage of contaminated soil
  - PCA # 56 - Treatment of Sewage equal to or greater than 10,000 litres per day: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:

## Phase One Environmental Site Assessment

---

- Storage of contaminated soil
- Metals impacts in soils in garden plot area
- PCA # 57 - Vehicles and Associated Parts Manufacturing: ABB Inc. (1954 to 1963) was listed at 201 Westcreek Blvd in Scotts Manufacturing Directory for chemical machinery manufacturing, wire manufacturing, and automobile vehicle manufacturing. ABB was also listed as a waste generator with 15 records (2000 to 2021) for paints pigment coatings, waste oils, resins, oils, and other metals and chemicals.
- Other: Spills Record - DHL Express Canada Ltd reported a spill of 2 L of Gasoline to catch basin July 29, 2008.
- Other: Waste Generator Records - Artis Westcreek Ltd, a real estate property manager located at 201 Westcreek Blvd, was listed in 2015 as a waste generator of oil skimmings and sludges.
- APEC-13: Offsite PCA that result in an APEC:
  - PCA # 18 - Electricity Generation, Transformation and Power Stations: Hydro One Networks Inc is listed at 7365 Tomken Road as electric power distribution center and a waste generator. A total of six records were listed (2015 to 2021) for generation of oil skimming's and sludges.
  - PCA # 58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners: Various Numbered Ontario Companies was registered at 7280 Dixie Road as a waste management system and industrial sewage works.
  - Other: Waste Generator Records - 8 records for UTI Contract Logistics & Distribution (2010 to 2018) for solvents, heat metals, and laboratory chemicals.
- APEC-14: Offsite PCA that result in an APEC:
  - PCA # 11 - Commercial Trucking and Container Terminals: Various trucking companies were listed at 7280 Dixie Road. A total of three waste generator records for Autlink Express (2010 to 2013) for waste oils, 5 records for 4 Refuel (2014 to 2019) for light fuels, and 4 records for 2253457 Ontario Inc. were reported for waste oils and sludges and light fuels (2006 to 2022).
  - PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: 7 records for fuel storage tanks for Aecon Utilities (2 records) and 2215296 Ontario Inc. (5 records). Additionally, two historical fuel tanks were identified for Aecon Utilities. For Aecon Utilities, two records for two diesel, steel, double-walled USTs were identified. The USTs were installed in 2001 with a capacity of 11,350 each. The historical fuel tanks match the same description. For 2215296 Ontario Inc., five records for three diesel and two gasoline fiberglass, double walled USTs. All five USTs were installed in 2012. The three diesel and one gasoline USTs have a capacity of 90,000 and one gasoline tank has a capacity of 65,000.
  - PCA # 39 - Paints Manufacturing, Processing and Bulk Storage: Corrosion Free North America Inc. (1979) was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a paint and coating manufacturing.
  - PCA # 50 - Soap and Detergent Manufacturing, Processing and Bulk Storage: EAZE OUT (no date) - was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a soap and cleaning compound manufacturing business.

## 1.2 Conclusions

Based on the findings of the Phase One ESA investigation, PCAs were identified in association with the Phase One Study Area, which resulted in 14 APECs identified across the Phase One Property. Whether or not an RSC is required for the Phase One Property, a Phase Two ESA would be necessary, as PCAs have been identified on the Phase One Property. Depending on the findings of the Phase Two ESA, an additional subsurface ESA, risk assessment, risk management, or remedial work, or some combination thereof, may also potentially be necessary.

## 2. Introduction

The Region of Peel (Region) retained CHM HILL Canada Limited (now part of Jacobs Engineering Group Inc. [Jacobs]) to complete a Phase One Environmental Site Assessment (ESA) for the chosen alternative of the trunk sewer alignment, which includes all temporary and permanent easements for construction work areas which include shaft locations.

The drainage area serviced by the Etobicoke Creek Trunk Sewer is projected to grow significantly, with the current *Water and Wastewater Master Plan Update* forecasting residential and employment populations to increase by 27 percent and 46 percent, respectively, by 2041. Further, in 2018, the City of Brampton endorsed a vision for growth that would transform the local area around Kennedy Road (including the CAA Centre lands, formerly the Powerade Centre), north of Highway 407 and south of Steeles Avenue. Currently, there are no trunk sanitary sewers on Kennedy Road to service this growth.

The existing Etobicoke Creek Trunk Sewer, from Kennedy Road to south of Highway 407, consists of primarily twin sanitary sewers ranging in size from 1050-millimetre (mm)- to 1350-mm-diameter pipes constructed as early as 1957. The former Brampton wastewater treatment plant (WWTP), northeast of Highways 410 and 407, also contains trunk sewers that form a key part of the East Trunk System. Several operational and maintenance issues have been reported in the existing sewer, including surcharging, defects in previous rehabilitation efforts, abandoned infrastructure on the former treatment plant site, and difficulty accessing certain sections of the sewer for required operations and maintenance. The Phase One Property encompasses the chosen alternative of the trunk sewer alignment, which includes all temporary and permanent easements for construction laydown work areas and shaft locations. The Phase One Property is linear in form, running from Kennedy Road South, across Highway 410 and 407, and just past Dixie Road to Derry Road.

This Phase One ESA report was prepared in general accordance with Schedule D, Part VI, Table 1 of Ontario Regulation (O. Reg.) 153/04, including guidance provided regarding the report format and contents, and is interpreted to satisfy the objectives for a Phase One ESA report (MECP 2011). The Phase One ESA forms part of the Etobicoke Creek Trunk Sewer Project. Jacobs understands that at this time, the Region does not intend to file a Record of Site Condition (RSC) under O. Reg. 153/04.

### 2.1 Phase One Property Information

The Site will consist of temporary and permanent easements for a total linear length of approximately 4.12 kilometres (km) which includes seven work areas ranging from approximately 650 metres squared (m<sup>2</sup>) to 2,400 m<sup>2</sup>. The Phase One Property crosses from Kennedy Road South, across Highway 410 and 407, and just past Dixie Road to Derry Road. The Phase One Property consists of multiple easements that run through various individual municipal addresses and underneath roadways, the majority of which is owned by The Region of Peel or the City of Mississauga, and through a small portion (less than 1 percent of the total municipal address) of five private landowners including:

- 201 Westbrook Blvd, Brampton - owned by Artis Westcreek Ltd.
- 7280 Dixie Road, Mississauga – owned by Pier Property Inc.
- 15 Westcreek Blvd, Brampton – owned by Coca-Cola Canada Bottling Ltd
- 7080 Dixie Road, Mississauga – owned by Ontario Khalsa Darbar
- 12 Clipper Ct, Brampton – owned by PepsiCo Canada Inc.

The Phase One Property consists mainly of forested or grassed vegetated parkland except for the work area located on the south side of Dixie Road (shaft 5), which is cleared dirt parking area, and the work area (shaft 6) located on the north of Dixie Road which consists of an area associated with a ballpark.

## Phase One Environmental Site Assessment

---

The Site is generally bound along its length as follows:

- To the north: South of First Gulf Road, Tomkin Road, and Tranmere Drive
- To the west: Kennedy Road South
- To the east: Derry Road
- To the south: Etobicoke Creek

Exhibit 2-1 presents the contact information for the Phase One Property.

Exhibit 2-1. Contact Information for Owner of Phase One Property

Agency	Role	Contact Information
The Corporation of the City of Brampton	Project Representative	Italia Ponce, P. Eng. Project Manager - Infrastructure Planning Water & Wastewater Division 10 Peel Centre Dr. Suite A Brampton L6T 4B9 <a href="tel:905-791-7800">905-791-7800</a> ext.4583

Table 2-1 summarizes the legal descriptions and related Property Identification Number for the Phase One Property. Figure 2-1 shows the Site location, and Figure 2-2 provides a Site plan. The Phase One Study Area includes properties within 250 m of the Phase One Property. Figure 2-1 shows the limits of the Phase One Property and the limits of the Phase One Study Area.

## 2.2 Report Format

This Phase One ESA report has been prepared in general accordance with O. Reg. 153/04, including Part VII, Phase One ESAs, and Schedule D, Part VI, Table 1, "Mandatory Requirements for Phase One ESA Reports." As specified in Schedule D, Part VI, Table 1, this Phase One ESA report has been prepared with the following section headings (MECP 2011):

- Section 1 Executive Summary
- Section 2 Introduction
- Section 3 Scope of Investigation
- Section 4 Records Review
- Section 5 Interviews
- Section 6 Site Reconnaissance
- Section 7 Review and Evaluation of Information
- Section 8 Conclusions
- Section 9 References

The appendices, identified as Section 10 by O. Reg. 153/04, Part VI, Schedule D, Table 1 (MECP 2011), are included after the text of the report, and a copy of Jacobs' standard limitations for Phase One ESAs is included as Section 10.

## 2.3 Key Project Personnel and Qualified Persons

Ms. Jennifer Mannisto, B.Sc. completed the Site reconnaissance visit. The report was written by Nadine Hanneson, M.Env.Sc., P.Geo., Qualified Person for ESA (QPESA), as defined by O. Reg. 153/04 (MECP 2011), with the assistance of Alanna Mills. The report was reviewed by Mr. Kurt Hansen, MES, P.Geo., QPESA. Exhibit 2-3 summarizes these individuals' qualifications.

Exhibit 2-2. Key Project Personnel and Qualified Persons

Alanna Mills, B.Sc	Alanna is an Environmental Engineering student at the University of Guelph completing her second summer internship with Jacobs. Previously, she completed a Bachelor of Science degree at the same institution. She has worked on Phase One/I ESAs in Ontario and specializes in technical report writing.
Jennifer Mannisto, B.Sc.	Jennifer has over 4 years of environmental consulting experience, completing Phase One/I ESAs in Ontario, British Columbia, Alberta, and Manitoba. She has worked on various aspects of project delivery, including analytical analyses, risk calculations, data interpretation, technical report writing, and client communications.
Nadine Hanneson, M.Env.Sc., P.Geo., QPESA	Nadine has over 12 years of experience coordinating and executing multiple Phase One and Two ESAs and remediation projects in Ontario, Manitoba, Saskatchewan, and Nunavut. She has worked on all aspects of project delivery, from planning and implementation, analytical analysis, and data interpretation, to technical report writing and editing. Her most recent work has focused on Phase One and Two ESAs according to O. Reg 153/04 in Ontario. Nadine serves as QPESA for a variety of environmental projects across Ontario.
Kurt Hansen, MES, P.Geo., QPESA	Kurt has more than 31 years of experience in: Phase One, Two, and Three ESAs; environmental audits, and class ESAs; site remediation programs; and field investigations involving soil and groundwater sampling and monitoring. Kurt has extensive experience in environmental consulting, and is experienced in all aspects of project development and implementation, including project planning, site investigation, design and implementation, liaison with clients and regulatory agencies, data analysis and interpretation, technical reporting, and project management. Kurt is designated as a QPESA. He routinely serves as a QPESA on many large and complex brownfield sites in Ontario, including award-winning brownfields projects.

### 3. Scope of Investigation

In accordance with the requirements of O. Reg. 153/04, Section 24 (MECP 2011), a Phase One ESA includes the following general objectives:

- i. To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in, or under the Phase One Property*
- ii. To determine the need for a Phase Two ESA*
- iii. To provide a basis for carrying out any Phase Two ESA required*
- iv. To provide adequate preliminary information about environmental conditions in the land or water on, in or under the phase one property for the conduct of a risk assessment following completion of a Phase Two ESA"*

To meet these objectives, O. Reg. 153/04 (MECP 2011) requires a Phase One ESA to include the following components:

- i. A records review*
- ii. Interviews*
- iii. Site reconnaissance*
- iv. An evaluation of the information gathered from the records review, interviews, and site reconnaissance*
- v. A Phase One ESA report*
- vi. The submission of the Phase One ESA report to the owner of the Phase One Property"*

This section summarizes the scope of investigation for these components.

#### 3.1 Records Review

As part of the records review, reasonable inquiries were made to obtain readily available information pertaining to the Phase One Property and Phase One Study Area, including the following sources of information:

- Federal, provincial, and private source database records for the Phase One Study Area available through an Environmental Risk Information Services (ERIS) database search
- Fire insurance plans (FIPs) for the Phase One Property and the Phase One Study Area, as available from ERIS and existing reports
- Information regarding operating or abandoned water wells in the Phase One Study Area, from the Ontario Ministry of Environment, Conservation, and Parks (MECP) and the ERIS report
- Aerial photographs for the Phase One Property and the Phase One Study Area, as available from the Regions' website
- Site operating records, or other information pertaining to environmental conditions onsite, from the Region, as available
- Information readily available from the MECP for the Phase One Property, obtained through a Freedom of Information (FOI) request

## Phase One Environmental Site Assessment

---

- Current and historical information regarding retail fuel storage tanks for the Phase One Property, as maintained by the Technical Standards and Safety Authority (TSSA)
- Physiographical and geological mapping for the Phase One Study Area

The information obtained from the records review is summarized in Section 4 and included in Section 7, where applicable.

### 3.2 Interviews

Interviews are intended to be completed as identified in Schedule D, Part III, Section 4 of O. Reg. 153/04 (MECP 2011):

- To obtain information to assist in determining if any area of potential environmental concern (APEC) exists*
- To identify details of potentially contaminating activities (PCAs) or potential contaminant pathways in, on or under the phase one property"*

Section 5 provides information regarding the rationale for selection of the interviewee, where applicable.

### 3.3 Site Reconnaissance

A Site reconnaissance was completed as identified in Schedule D, Part IV, Section 9 of O. Reg. 153/04 (MECP 2011):

- To determine if APEC exist through observation about current and past uses and potentially contaminating activity on, in or under the phase one property and, as practicable, current and past uses and activities and PCA in the phase one study area*
- To identify details of potential contaminant pathways on, in or under the phase one property and APEC and contaminants of potential concern"*

Section 6 provides the results of the Site reconnaissance. Where PCAs or APECs were identified, Section 7 includes additional relevant information from the records review or the interviews.

### 3.4 Review and Evaluation of Information

Jacobs evaluated the information obtained from the records review, interviews, and Site reconnaissance and interpreted it to satisfy the general objectives of a Phase One ESA, as listed in Section 3. Section 7 provides the results of the review and evaluation of information, including the following details:

- A summary of current and past Site uses
- Identified PCAs onsite and within the Phase One Study Area
- Identified APECs onsite
- The conceptual site model (CSM) for the Phase One Property
- Uncertainties associated with the final Phase One ESA report

### 3.5 Phase One Environmental Site Assessment Report

The specific objectives for a Phase One ESA report are listed in Schedule D, Part VI, Section 18 of O. Reg. 153/04 (MECP 2011) and include the following:

- To document the presence or absence of APEC*
- To provide a record of a phase one ESA of a phase one property that demonstrates, in a manner that is clear and can be assessed, tested and reconstructed, how the phase*

## Phase One Environmental Site Assessment

---

*one ESA of the property was carried out, and, in particular, to document and demonstrate:*

- a. Whether further investigation is required in order to submit an RSC for filing*
- b. That there exists an adequate basis for any further investigation that may be needed*
- c. That there is a basis for any required certifications"*

Section 8 provides Jacobs' conclusions, based on the scope of investigation completed and the information obtained and documented herein (including the resulting uncertainties).

This Phase One ESA report was prepared in accordance with Schedule D, Part VI, Table 1 of O. Reg. 153/04, including guidance provided regarding the report format and contents, and is interpreted to satisfy the objectives for a Phase One ESA report.

### 3.6 Submission of Phase One Environmental Site Assessment Report to the Owner of the Site

This Phase One ESA report was prepared for the Region. The final Phase One ESA will be submitted to the Region and if required by the Region, to the property owner before any portion of the land is redeveloped. Before any such redevelopment, one or more of additional subsurface ESA, risk assessment, risk management, or remedial work may be necessary.

## 4. Records Review

### 4.1 General

#### 4.1.1 Phase One Study Area Determination.

Figure 2-1 shows the boundaries of the Phase One Property and the Phase One Study Area. The Phase One Study Area is defined by O. Reg. 153/04 as (MECP 2011):

*"...the area that includes a phase one property, any other property that is located, wholly or partly, within 250 m from the nearest point on a boundary of the phase one property and any property that the qualified person determines should be included as a part of the phase one study area..."*

The Phase One Study Area includes all properties within 250 m from the Phase One Property boundary (Figure 2-1).

#### 4.1.2 First Developed Use Determination

Based on a review of aerial photographs, portions of the Phase One Property were used as agricultural land from before 1946 to approximately 1975, which likely resulted in the previous use of pesticides onsite. Based on O. Reg. 153/04, the first developed use means the earlier of the first developed building or structure on the property or the first potentially contaminating use or activity on the Phase One Property. As no buildings or structures have been identified at any time on any portion of the Phase One Property, the potential use of pesticides has been used to identify the first developed use of the Site. Based on the aerial photograph review, 1946 has been identified as the first developed use of the Phase One property.

#### 4.1.3 Chain of Title

A chain of title was not completed for any portion of the Phase One Property currently owned by a municipal or provincial landowner because based on the aerial photograph review, these areas were previously agricultural in land use, which would only list private ownership. The QPESA is of the opinion that a chain of title would not provide additional details pertaining to the Site's first developed uses or past uses as relevant to this Phase One ESA for these properties. However, if an RSC is to be filed, the chain of title information will be required at that time.

A chain of title search was completed for the portions of the Phase One Property which were listed with private ownership. The title search, completed via ONland Help Centre, was completed to identify owner(s) and title documents of potential environmental significance back to when the property was owned by the municipality. Appendix A provides the results.

Based on the title information obtained, the following applies:

- 7080 Dixie Road has been owned by Ontario Khalsa Darbar since 1977, prior to which it was owned by the Ontario Water Resources Commission. .
- 7280 Dixie Road has been owned by Piers Property since 1999, prior to which it was owned by 1191612 Ontario Limited. Prior to this the property was owned by the Ontario Water Resources Commission in 1971.
- 201 Westcreek Blvd has been owned by Westcreek Holdings since 2021, prior to which it was owned by ABB Olofstrom Automation Ltd. Prior to this, the Ministry of Transport owned the property since 1981.

## Phase One Environmental Site Assessment

---

- 15 Westcreek Blvd has been owned by Coca-Cola Canada Bottling Ltd since 2000, prior to which it was owned by the Orlando Corporation. The property was previously owned by the Minister of Transport from 1982.
- 12 Clipper Court has been owned by PepsiCo Canada Ltd since 2001, prior to which it was owned by Her Majesty the Queen in Right of the Department of Transport Canada. The property was originally owned by the Corporation of the City of Brampton, The Regional Municipality of Peel as of 1991.

### 4.1.4 Fire Insurance Products

Fire insurance products, which include FIPs, inspection reports, and Site-specific reports, are generally available for lands developed for commercial or industrial purposes before the 1980s. Based on the aerial photograph review, the Phase One Property was generally not developed before 1975 and therefore no fire insurance products would be available for the area.

### 4.1.5 Environmental Reports

The Region provided six historical reports related to the former Brampton wastewater treatment plant (WWTP). Based on the historical reports noting former underground storage tanks (USTs), polychlorinated biphenyl (PCB)-containing transformers, fill of unknown quality, and metals impacts in the garden areas, PCAs were identified for the former WWTP. The following list provides details of the environmental reports reviewed as a part of the Phase One ESA.

*SPL Consultants Limited. 2011. Peer Review - 7510 Farmhouse Court, Brampton. Prepared for the Region of Peel. April 11.*

No PCAs were identified, the report is a peer review of environmental reports, including a 1997 Phase I and 2 ESA and 1998 Environmental Investigation program, prepared for 7510 Farmhouse Court in

## Phase One Environmental Site Assessment

---

Brampton, Ontario (former WWTP). Both reports were completed by Proctor & Redfern Limited. The 1997 Phase I and 2 ESA and 1998 Environmental Investigation program reports are summarized below.

*ECOH Management Inc. 2009. Sewage Sludge Characterization - 220 Westcreek Boulevard, Brampton, Ontario. Prepared for the SNC Lavalin Profac. May 15.*

One PCA was identified. The report is an investigation of the water and sludge from the four digesters slated for demolition at the former Brampton WWTP. Sampling was completed to characterize the sludge and water for disposal options. PCBs were identified as being present in two of the four digesters.

- PCA Other – PCB Usage: PCBs were identified as being present in two of the four digesters.

*The Thompson Rosemount Group. 2008. Proposed Method of Digesters Demolition. Prepared for the Region of Peel. November 27.*

No PCAs were identified, the report details a description of the four digesters at the former Brampton WWTP and their planned demolition.

*ECOH Management Inc. 2008. Pre-Demolition Survey for Designated Substances. Prepared for SNC Lavalin Profac. November 26.*

No PCAs identified. The report was a designated substance survey for the demolition of the four digester tanks to identify the presence of possible designated substances (including lead, asbestos, mercury, PCBs, and mould). Asbestos, lead, mercury, and silica were identified.

*Proctor & Redfern Limited. 1999. Environmental Investigation Program. Prepared for the Ontario Realty Corporation. May.*

One PCA was identified. The report was a 1998 Environmental Investigation program for the Brampton WWTP. The following PCA was identified.

- PCA #55 – Transformer Use: the active transformers did not contain PCB oils.

Additional investigations did not identify impacts for soils used as backfill near the active transformers. The Environmental Investigation Program installed four monitoring wells and determined groundwater generally flows southeast.

*Proctor & Redfern Limited. 1997. Phase 1 and Phase 2 Environmental Site Assessment - 7510 Farmhouse Court. Prepared for the Ontario Realty Corporation. July.*

Four PCAs were identified. The report was 1997 Phase I and II ESA with findings based on soil data only; no groundwater testing was completed. 7510 Farmhouse Court is located in the north-central section. The following environmental concerns were identified: Metals impacts in soils in garden plot area, improper

## Phase One Environmental Site Assessment

---

storage of PCB ballasts, PHC impacts at former chlorine contact chambers, and storage of contaminated soil. In addition, the following PCAs were identified.

- PCA #28 - Former UST: potential residual fuel impacts,
- PCA #28 – Active UST: failed cathodic system (1981) reported to have a capacity of 2,000 gallons,
- PCA #55 – Transformer Use: potential former PCB containing transformer,
- PCA #30 – Fill of Unknown Quality: Unknown fill quality related to area of former septic and sewage system treatment area,

The Phase II ESA program included 40 boreholes. Bedrock was encountered from 3 to 3.5 mbgs. Buried concrete pads are present onsite. The fill material contained asphalt, and other mixed materials and hydrocarbon odours were noted.

## 4.2 Environmental Source Information

### 4.2.1 Environmental Risk Information Services Database Search

On July 27, 2022, Jacobs retained ERIS to complete a database search for the Phase One Property and for properties identified within the Phase One Study Area. The search included over 60 federal, provincial, and private source databases containing information and records relevant to potential environmental conditions on a property. Appendix B provides the database search results.

The following subsections summarize the records obtained from the database search.

#### 4.2.1.1 Database Records for the Phase One Property Municipal Addresses

The ERIS (2022) report did not identify any database records for the Phase One Property.

#### 4.2.1.2 Database Records for Offsite Properties Within the Phase One Study Area

ERIS reported on records identified within 500 m of the Phase One Property; however, only those identified within the Study Area (250 m from the Phase One Property) have been included in the review. Based on the ERIS database search, 567 records were identified for properties within the Phase One Study Area, outside of the Phase One Property municipal addresses. These records were assessed for information about possible PCAs associated with past or current operations at offsite properties. The following were identified as PCAs, discussed by address:

- 7765 Tranmere Drive
  - PCA #31 - Ink Manufacturing, Processing and Bulk Storage: Various business were listed as printing facilities in Scotts Manufacturing Directory, these included Data Business Forms Limits, Multiple /Parkfold Business Forms. Data Business was listed with 3 records from 1992 to 2001 for aliphatic solvents, waste oils and lubricants, and photo processing wastes. Multiple was listed as a waste generator of aliphatic solvents. Multiple Forms was listed at 7765 Tranmere Drive as printing from 2002 to 20179 with seven records for waste generation of graphic art wastes. petroleum distillates, paint/pigments/coating residues, photocopying wastes, aliphatic solvents, other polymeric waste, waste oils and lubricants.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: WireWorx Displays Inc was listed as a waste generator of waste crankcase oils and lubricants from 2018 to 2022.
- 7785 Tranmere Drive
  - PCA #57 - Vehicles and Associated Parts Manufacturing: Spar Aerospace Limited (1989) was listed in Scotts Manufacturing Directories for Aircraft engines and parts. Spar Aerospace Ltd. was also

## Phase One Environmental Site Assessment

---

listed as a waste generator (1989 to 2009) for heavy metals, laboratory chemicals, solvents, and light fuels. Additionally, L-3 Communications MAS (Canada) Inc. was listed as a waste generator (2010 to 2013) for oils, heavy metals, laboratory chemicals, solvents, and light fuels.

- 7805 Tranmere Drive
  - PCA #57 - Vehicles and Associated Parts Manufacturing: Koss Aerospace Ltd. and Koss Machine & Tool Co. (1975) was listed in Scotts Manufactory Directory for Aerospace Products and parts manufacturing and Mining and Oil and Gas Field Machinery Manufacturing. Koss was also listed as a waste generator (2009 to 2019) for waste oils, fuels, solvents, and paint and pigment residues.
- 7825 Tranmere Drive
  - PCA #34 - Metal Fabrication: Diform Tool Inc. (1984) was listed in Scotts Manufacturing Directories for Metalworking Machinery Manufacturing.
- 7855 Tranmere Drive
  - PCA #34 - Metal Fabrication: Telco Sensors Canada (1999) was listed in Scotts Manufacturing Directories for Machinery Manufacturing.
- 7875 Tranmere Drive
  - PCA #43 - Plastics (including Fiberglass) Manufacturing and Processing: Proven Plastics (1988) was listed in Scotts Manufacturing Directory for plastic, concrete, and glass products Manufacturing.
  - PCA #34 - Metal Fabrication: Alm Architectural Lighting (1998) was listed in Scotts Manufacturing Directory for fixture Manufacturing. R.W. Wheel Wizards (1992) - Metal Products Manufacturing.
  - PCA #57 - Vehicles and Associated Parts Manufacturing: Turn-o-matic Screw Machine Pro (1998) was listed in Scotts Manufacturing Directory for automobile and light-duty motor vehicle manufacturing
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Spill - Transport Max spill of 100L of diesel to catch basin in 2005.
- 7885 Tranmere Drive
  - PCA #34 - Metal Fabrication: Precision Production and Engineering (1980) was listed in Scotts Manufacturing Directory for Metalworking Machinery Manufacturing. Total Structural Detailing Inc was also listed in Scotts Manufacturing Directory for Metal Doors, Sash, Frames Molding and Trim. 20 records for various companies related to metal fabrication with waste generation of paint and pigment residues and petroleum distillates.
  - PCA # 43 - Plastics (including Fiberglass) Manufacturing and Processing: Tron International Industries (1994) was listed in Scotts Manufacturing Directory for Rubber and Plastics Machinery Manufacturing, Metalworking, and Mould Manufacturing.
  - PCA # 49 - Salvage Yard, including automobile wrecking: One Record Automobile wrecking at 7885 Tranmere Drive for Nick's Auto Parts.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Spill - Unknown quantity of hydraulic fluid spill by Canadian Waste Services in 2001.
- Dixie Road North of Derry
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: A spill of 15 litres of waste cooking oil was report at Dixie North of Derry on the east side in 2018. A second spill of 45 L of grease was report in 2006. A spill of diesel fuel (sheen only) was reported in 2019. A spill of 100 L of hydraulic oil was reported in 1994. A spill of 300 L of diesel fuel to the road in 2019 was reported.
- 6995 Dixie Road
  - PCA #28 - Gasoline and Associated Products Storage in Fixed Tanks: Various Fuel Stations were identified at 6995 Dixie Road. Fuel Tank Records included the following: 10 records for expired fuel safety facilities for Tamim Gas Bar (liquid fuel tanks) were identified, 1 record for a private and retail fuel storage tank for Dixie Derry Self Serve Gas Bar (1996), 4 records for fuel storage tanks for Suncor Energy Products Partnership. Three records were identified for double-walled fiberglass

## Phase One Environmental Site Assessment

---

gasoline USTs that were installed in 2006 and had capacity of 50,000. One record was identified for a double-walled fiberglass diesel UST that was installed in 2006 and had a capacity of 50,000., 2 historical fuel tank records for Tamim Gas Bar were identified. One record lists 5 single-walled USTs from 1989, listed as removed. Four of the USTs were listed as gasoline with a capacity of 27,280. The final USTs was listed as diesel with a capacity of 36,370.

- 1510 Drew Road
  - PCA # 34 - Metal Fabrication: Ram Maintenance and Machine (1996) was listed in Scotts Manufactures Directory as a machine shops and other metal product manufacturing, and industrial machinery and equipment repair and maintenance.
  - PCA # 8 - Chemical Manufacturing, Processing and Bulk Storage: Kenetic Corp was listed on the chemical register.
  - PCA #50 - Soap and Detergent Manufacturing, Processing and Bulk Storage: Cleaning Solutions Inc. (1976) was listed in Scotts Manufacturing Directory with soap and other detergents, specialty cleaning, and chemical and allied products.
  - PCA # 31 - Ink Manufacturing, Processing and Bulk Storage: Famous Printing (1997) was listed in Scotts Manufacturing Directory as Other Printing.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Woodworking - Kabbani Custom Woodworking was listed in Scotts Manufacturing Directory at 1510 Drew Road as cabinet maker and manufacturer.
- 1530 Drew Road
  - PCA #43 - Plastics (including Fiberglass) Manufacturing and Processing: JJF Dynamic Tool Inc was listed in Scotts Manufacturing Directory as a plastics products facility and industrial moulding facility. JJF Dynamic Tool Inc was listed as a waste generator of oil skimming's and sludges, waste oils and lubricants, and emulsified oil from 1999 to 2022.
  - PCA #10 - Commercial Autobody Shops: Commet Towing was identified as a vehicle towing and other vehicle services business. Commet Towing was listed as a waste generator of petroleum products and waste oils and lubricants. Alumni Bunk Corporation was listed in Scotts Manufacturing Directory as motor vehicle body manufacturing. Aux Generators Inc was listed in Scotts Manufacturing Directory as a motor and generator manufacturing and motor vehicle electrical and electronic manufacturing. Can-am Hydraulics Products Ltd was listed as current-carrying wiring devices and industrial supplies.
  - PCA #34 - Metal Fabrication: D&A Mould and Die limited., was listed as a waste generator from 2002-2004. D&A Mould and Die Ltd was also listed in Scotts Manufacturing Directory as a machine shop and other metal work Machinery Manufacturing. Ray-Lifts Inc was listed as a commercial and industrial machinery repair and maintenance facility (Except automotive and electronic) facility. Ray lifts was listed as a waste generator of waste oils and lubricants and petroleum distillates from 2013 to 2014.
  - PCA #33 - Metal Treatment, Coating, Plating and Finishing: Flo Components Limited, was listed as a repair service facility. Flo Component was listed as a waste generator of petroleum distillates and halogenated solvents from 1990 - 2001. Flow Components Ltd was listed in Scotts Manufacturing Directory as an general industrial machinery and equipment or industrial machinery and equipment facility. Gal Power Systems Toronto Ltd was listed as other repair services. Gal Power was listed from 2001 to 2006 as a waste generator of aliphatic solvents, petroleum hydrocarbons, and waste oils and lubricants. Gal Power Systems reported a 30 litre spill of diesel fuel in 2005 and 80 litres of oil from a tank in 2006. Infinity Assets was listed at 1530 Drew Road as a waste generator of waste crank oils and lubricants in 2019.
  - PCA #42 - Pharmaceutical Manufacturing and Processing: Seafood Pharmaceuticals was listed as general warehouse and storage. Seafood Pharmaceuticals was listed as a waste generator from 2006 to 2021 of pharmaceuticals.
- 1600 Drew Road
  - Canadian Bearings Ltd. Was listed as a waste generator (2005 to 2019) for solvents, oils, petroleum distillates, and laboratory chemicals.

## Phase One Environmental Site Assessment

---

- 15 Westcreek Blvd
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Coca-Cola Bottling CO was listed as a soft drink distributor and a waste generator from 2001 to 2022 (16 records) of inert organic wastes, aliphatic solvents, petroleum distillates, light fuels, oil skimmings and sludges, waste oils and lubricants, graphic arts wastes, and acid heavy metals.
  
- 200 Westcreek Blvd
  - PCA # 11 - Commercial Trucking and Container Terminals: Various business were listed as couriers, including Company 6586856 Canada Inc, DHL Express Canada Limited, Loomis Courier Services and Mayne Logistics Loomis Inc. Company 6586856 Canada Inc, was listed with a total of 9 records (2010 to 2022) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. DHL Express Canada Limited was listed with a total of 2 records (2003 to 2009) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. Loomis Courier Services and Mayne Logistics Loomis Inc was listed with 2 records (2001 and 2002) for waste generation of inorganic laboratory chemicals, aromatic solvents, aliphatic solvents, petroleum distillates, waste oils and lubricants, and organic laboratory chemicals.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Spills Record - DHL Express Canada Ltd reported a spill of 2 L of Gasoline to catch basin July 29, 2008.
  
- 201 Westcreek Blvd
  - PCA # 57 - Vehicles and Associated Parts Manufacturing: ABB Inc. (1954 to 1963) was listed in Scotts Manufacturing Directory for chemical machinery manufacturing, wire manufacturing, and automobile vehicle manufacturing. ABB was also listed as a waste generator with 15 records (2000 to 2021) for paints pigment coatings, waste oils, resins, oils, and other metals and chemicals.
  - PCA # 11 - Commercial Trucking and Container Terminals: Clark Transport Inc was listed as a general freight trucking company. A total of four records (2016 - 2021) for waste generation of miscellaneous waste organic chemicals, light fuels, and/or miscellaneous waste organic chemicals.
  - PCA # 34 - Metal Fabrication: F-H Welding Machines Ltd was listed as a waste generator of petroleum distillates, waste crankcase oils and lubricants, and/or emulsified oils.
  - PCA # 11 - Commercial Trucking and Container Terminals: 12 waste generator records for Transex Ltd. (2001 to 2019) listed as a commercial trucking facility for various contaminants, including inorganic wastes, solvents, petroleum distillates, fuels, and heavy metals.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Waste generation - Artis Westcreek Ltd, a real estate property manager located at 201 Westcreek Blvd, was listed in 2015 as a waste generator of oil skimmings and sludges.
  
- 220 Westcreek Blvd
  - PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks: Four petroleum above ground storage tanks were identified in the ERIS report. It is assumed they were associated with the former Brampton Waste Water Treatment Plant (WWTP). No other information was provided.
  - PCA # 55 - Transformer Manufacturing, Processing and Use: Three records for Ministry of Environment, Conservation and Parks (2007 to 2011) for PCBs and waste oils and lubricants.
  
- 7365 Tomken Road

## Phase One Environmental Site Assessment

---

- PCA # 18 - Electricity Generation, Transformation and Power Stations: Hydro One Networks Inc is listed as electric power distribution center and a waste generator. A total of six records were listed (2015 to 2021) for generation of oil skimming's and sludges.
- Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Waste Generator Records - 8 records for UTI Contract Logistics & Distribution (2010 to 2018) for solvents, heat metals, and laboratory chemicals. No other information was available for these businesses.
- 7010 Dixie Road
  - PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: Braver Fuels Management was listed with one record for expired fuel safety facilities for Beaver Fuels Management Limited plus 1 record for a private and retail fuel storage tank. Shell Canada spill to ground with unknown quantity in 1988 and Trimac Transportation Services, spill to ground of 10 L of gasoline in 1993.
- 7280 Dixie Road
  - PCA #28 - Gasoline and Associated Products Storage in Fixed Tanks: Aecon Utilities was listed for two records for two diesel, steel, double-walled USTs were identified. The USTs were installed in 2001 with a capacity of 11,350 each. Additional historical fuel tanks match the same description. 2215296 Ontario Inc., was listed with five records for three diesel and two gasoline fiberglass, double walled USTs. All five USTs were installed in 2012. The three diesel and one gasoline USTs have a capacity of 90,000 and one gasoline tank has a capacity of 65,000.
  - PCA # 11 - Commercial Trucking and Container Terminals: Various trucking companies were listed at 7280 Dixie Road. A total of three waste generator records for Autlink Express (2010 to 2013) for waste oils, 5 records for 4 Refuel (2014 to 2019) for light fuels, and 4 records for 2253457 Ontario Inc. were reported for waste oils and sludges and light fuels (2006 to 2022).
  - PCA # 50 - Soap and Detergent Manufacturing, Processing and Bulk Storage: EAZE OUT was listed in Scotts Manufacturing Directory as a soap and cleaning compound manufacturing business.
  - PCA # 39 - Paints Manufacturing, Processing and Bulk Storage: Corrosion Free North America Inc. (1979) was listed in Scotts Manufacturing Directory as a paint and coating manufacturing.
  - PCA # 58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners: Various Numbered Ontario Companies was registered at 7280 Dixie Road as a waste management system and industrial sewage works.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Spills Records - Spill of 200vL of diesel and 20 L of engine oil to road in 2016.
- 300 Biscayne Crescent
  - PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: Dicom Express was listed with an expired private fuel outlet. A record indicated that a steel, single wall, diesel fuel AST was installed January 5, 1996
  - PA # 11 - Commercial Trucking and Container Terminals: Dicom Express was listed as general freight trucking, local general freight trucking, long distance trucking terminal with a waste generator record. Seven records for Dicom Transportation Group Canada Inc. (2014 to 2022) the waste generator of solvents, light fuels, heavy metals, waste oils, and paint and pigment residues. Gojit was listed at as aerospace product and part manufacturing or trucking facility, with a waste generator record. Eight records for (2002 to 2013) the generation of various wastes, including inorganic wastes, solvents, photo processing wastes, light fuels, heavy metals, waste oils, and metals.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Spills Records - Go Jet spill of 40 L of motor oil to ground from a storage tank overflow in 2005. Gojit Trans spill of 20 L of formaldehyde in 2007 and a 90-L diesel spill to the ground in 2010. One fuel oil spill and leak record was identified for this location. A diesel spill in 2010. Amount not noted.
- 200 First Gulf Blvd

## Phase One Environmental Site Assessment

---

- PCA # 11 - Commercial Trucking and Container Terminals: Airoute Cargo Ltd., a trucking company, was listed as a waste generator of oils, detergents and soaps, and waste organic chemicals (2018 to 2019).
- PCA # 34 - Metal Fabrication: Magnum Integrated Technologies Inc, located was listed as metalworking and machinery manufacturing business, and as a waste generator of paint/pigments/coating residues and waste oils and lubricants.
- 250 First Gulf Blvd
  - PCA # 42 - Pharmaceutical Manufacturing and Processing: Apotex Inc was listed as a waste generator of pharmaceuticals.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Agfa Inc, were listed as waste generators of alkaline solution containing other metals and non-metals (not cyanide), miscellaneous waste chemicals, and organic acids.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: DSV Solutions Inc, Virtual Distribution Inc, UTI Contract Logistics and Distributions were listed as a warehouse and storage facility as a waste generator of organic laboratory chemicals, acid waste - heavy metals, alkaline wastes - heavy metals, pharmaceuticals, aliphatic solvents, and detergents/soaps.
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Waste Generator Records - 4 records for Peel Board of Education (1976 to 1998) for petroleum distillates, laboratory chemicals, oil skimming's, and waste oils.
- 350 First Gulf Boulevard
  - PCA # 57 - Vehicles and Associated Parts Manufacturing: Arvin Meritor Canada, an automobile and light duty motor vehicle manufacturer was listed as a waste generator for paint/pigment/coating residues, petroleum distillates, oil skimming's and sludges, organic laboratory chemicals, waste oils and lubricants, and organic acids (2004 to 2010). The property was also listed with NPRI for storage of various VOCs and the release of particulate matter
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Mascot Truck Parts - Reported as a used motor vehicle parts and accessories wholesaler and distributor which was listed as a waste generator of waste oils and lubricants, paint/pigment/coatings residues, petroleum distillates, and oil skimming's and sludges.
  - PCA # 57 - Vehicles and Associated Parts Manufacturing: Meritor Aftermarket Canada, Inc. , an automobile and light duty motor vehicle manufacturer, (2010 to 2016) was listed as a waste generator for oil skimming's and sludges, waste oils and lubricants, petroleum distillates, and paint/pigment/coating residues.
- 14 Casper Crescent
  - PCA #49 - Salvage Yard, including automobile wrecking: Automobile Wrecker Records at 14 Casper Cres. Had 2 Records for ATL Towing and Scrap Car Removal.
- 82 Hartford Trail
  - PCA #40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications: Pesticide Registry listed one record for MB's Garden Maintenance and Service at 82 Hartford Trail. No operator number was included in the record.
- 7735 Kennedy Road South
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Waste Generator - Rice Development Corp was listed at 7735 Kennedy Road South as a waste generator of waste oils/sludges.
- Biscayne Cres and First Gulf Road
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Spill - 80 litres of diesel was spilled to the road by Finley W McL. In 2003 at Biscayne Cres and First Gulf Road

## Phase One Environmental Site Assessment

---

- 8 Clipper Court
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Company 1176909 Ontario Inc, was listed as a waste generator oil waste oils/sludges in 2021 and 2022. No other information about the company was available.
- 12 Clipper Court
  - Frito-Lay Canada/PepsiCo Canada, located at 12 Clipper Court, was identified as a specialty-Line Food Wholesaler-Distributor in Scotts Manufacturing Directory. Thirteen records for Frito-Lay Canada/PepsiCo Canada (2002 to 2022) were identified as a waste generator of oil skimmings and sludges, petroleum distillates, waste oils, and lubricants.
- Khalsa Drive and Dixie Road
  - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D: Spill - Khalsa Drive and Dixie Road report a spill of unknown oil in June 2020.

Table 7-2 includes the PCAs identified from the ERIS report, which are presented on Figure 7-1.

### 4.2.2 Freedom of Information Request, Ontario Ministry of the Environment and Climate Change

As Jacobs submitted an FOI request for the portion of the property Phase One Property to the MECP,; however, the results of the search have not been received. Once the results of the FOI request are received, the information will be submitted under separate cover if it will alter the conclusions of this Phase One ESA. Appendix C includes the communication with the MECP.

### 4.2.3 Technical Standards and Safety Authority

Through delegation from the Government of Ontario, the TSSA administers and enforces public safety laws in various industry sectors, including fuel storage and dispensing, under Ontario's Technical Standards and Safety Act.

Jacobs submitted an email request to query the TSSA database for information related to the Phase One Property and adjacent municipal addresses, and received correspondence from the TSSA on August 9, 2022. The TSSA information indicated the following records:

- 7280 Dixie Road was listed with 7 active fuel tanks registered to the property, related to a self serve private fuel outlet and a self serve gas station. Based on a review of the aerial photographs, these tanks and fuel stations are on the northern portion of 7280 Dixie Road, which is located outside of the Study Area, approximately 275 m from the Phase One Property, and therefore not considered a PCA.
- 7010 Dixie Road is listed as an expired full serve gasoline station.  
  
6995 was listed with 5 expired liquid fuel tanks and four active liquid fuel tanks associated with a self serve gasoline station.
- 300 Biscayne Cr was listed with listed one expired liquid fuel tank associated with one expired self serve private fuel outlet.

Appendix C provides the correspondence from the TSSA.

## 4.3 Physical Settings Sources

### 4.3.1 Aerial Photographs

Jacobs reviewed aerial photographs from 1946 to 1960, available on ERIS (ERIS 2022), 1966 to 1975, available on the City of Toronto's website (City of Toronto 2020), 1980 to 1996 from the Region of Peels e-mail correspondence, and from 2003 to 2021, available on Google Earth Pro.

Table 4-1 summarizes the information obtained through the review of aerial photographs. Appendix D contains the historical aerial photographs Jacobs reviewed. Four new PCAs were identified from the aerial photographs:

- PCA #18 – Electricity Generation, Transformation and Power Stations
- PCA #30 - Importation of Fill Material of Unknown Quality
- PCA # 40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
- Activity not defined in O. Reg. 153/04 Table 2 of Schedule D – application of salt for vehicular and pedestrian safety

### 4.3.2 Topography, Hydrology, and Geology

The following sections describe the topography, physiology, geology, and hydrology of the Study Area, based on the *Geotechnical Desktop Review* (2019) completed.

#### 4.3.2.1 Topography

*The Physiography of Southern Ontario* by Chapman and Putnam (1984) indicates the Study Area is situated in the physiographical region identified as the Peel Plains, which generally consists of glacial till soils; and is characterized as a level to undulating tract of clayey soils covering approximately 800 square kilometres (km<sup>2</sup>) across central portions of the Regional Municipalities of York, Peel, and Halton. These sediments represent the bottom of the former glacial Lake Peel, which formed between an ice front to the north, the Niagara Escarpment to the west, and the Trafalgar Moraine to the east.

The Study Area is underlain by the Peel Plain Sediments, which gradually slope towards Lake Ontario, following the topography of the underlying Halton Till. The general elevation ranges from 186 metres above sea level (masl) to 210 masl, followed by a gradual and uniform slope towards Lake Ontario.

#### 4.3.2.2 Geology

The Quaternary Geology of Ontario, Southern Sheet, Map 2556, issued by the Ontario Ministry of Northern Development and Mines (MNDM) (Barnett 1991), indicates the overburden soils in the Study Area consist of Halton Till deposits. The Halton Till is formed by the last major advance of the Lake Ontario basin ice lobe (Sharpe and Russel 2013). These deposits are primarily composed of a dense, sandy to silty clay till that is clast poor and reddish brown in colour and is often interbedded with silt, clay, sand, and gravel. The Halton Till is typically 3 m to 6 m thick, but locally can range from 15 m to 30 m in thickness.

Isolated glaciolacustrine deposits are also identified in the Etobicoke Creek area, which is within the Study Area. These deposits consist of massive to laminated silt and clay and may contain poorly sorted diamicton (unsorted to poorly sorted and contains particles ranging in size from clay to boulders) layers, based on Ontario Geological Society (OGS) Map 2223 (Barnett 1991).

#### 4.3.2.3 Hydrology

The Study Area is partially located in Mississauga and partially in Brampton, and is part of the Etobicoke Creek watershed. A water body, Etobicoke Creek, transverses through the Site from northwest to

## Phase One Environmental Site Assessment

---

southwest. Based on the ERIS borehole and water well information system records, the static water levels ranged from 1.5 to 3.7 mbgs for the Site (ERIS 2020a).

Proctor & Redfern (1999) identified groundwater in the Study Area as flowing southeast. Regional groundwater flow is assumed to be southeasterly towards Lake Ontario, based on the topography (Government of Canada 2020).

### 4.3.3 Fill Materials

Fill was encountered below the topsoil in the most of referenced historical boreholes in the study area. The thickness or the fill ranged from about 0.8 m to 8.0 m.

Both cohesive and cohesionless fill soils were encountered in the referenced historical boreholes. The cohesive portion of the fill consists of clayey silt with sand to some sand, containing trace gravel and Silty clay to gravelly sandy silty clay as well as organic matter and rootlets. The Atterberg testing results indicates the material is classified as silty clay of low plasticity to intermediate plasticity. The cohesionless portion of the fill consists of silty sand containing some gravel and trace clay and gravelly silty sand to gravelly sand to sand and gravel, as well as organic material and rootlets in some boreholes.

### 4.3.4 Water Bodies and Areas of Natural and Scientific Interest

The Etobicoke Creek flows west to east through the Site and Study Area, then flows approximately 2 km south east of the Site (Region 2022).

Jacobs reviewed the Land Information Ontario (LIO) Area of Natural and Scientific Interest (ANSI) maps (LIO 2022), and did not identify an ANSI within the Phase One Study Area. The nearest ANSI property is Meadowvale Station Woods, which is 6 km south of the Site.

### 4.3.5 Well Records

As Section 4.3.1.1 discussed, no well records exist for the Phase One Property, based on the ERIS database search (2022) and a review of the Ontario Well Records available online (MECP 2021a). Based on the ERIS (2022) report, 135 well records exist within the Phase One Study Area, of which, the following 9 wells were listed as water supply wells:

- Well ID 4902383 at lot 13 con 3
- Well ID 4902381 at lot 13 con 3
- Well ID 4902379 at lot 13 con 3
- Well ID 4902394 at lot 11 con 4
- Well ID 4902374 at lot 10 con 3
- Well ID 4902373 at lot 10 con 3
- Well ID 4902397at lot 11 con 4
- Well ID 4902352 at lot 14 con 1
- Well ID 4902382 at lot 12 on 3

There were no Permits to Take Water identified within the Study Area (MECP 2021b).

#### 4.4 Site Operating Records

The municipal address of the Phase One Property currently includes parkland land use, plus a small portion of properties which are owned by industrial business, the portion which is included in the Phase One Property are not being used for industrial uses. Site operation records is only required if the Phase One Property is currently being used, in whole or in part, for a use specified in Clause 32 (1) (b) of the regulation. Since the Site is generally vegetated or vacant land, no Site operating records information or documentation were available for review.

## 5. Interviews

Because the Phase One Property is a small parcel of undeveloped land, there is little information beyond that identified through the records review that would be expected in an interview. An interview with a Region representative was requested to fulfill the requirement of an interview for the Phase One ESA. As no one has currently been identified as a representative of the Phase One Property who would be able to provide information directly relevant to the Phase One Property, in this instance the lack of an interview response is not anticipated to materially alter or change the conclusions and findings of this Phase One ESA in the opinion of the QP ESA and has therefore not been considered to be a limitation in this instance. Information as provided from other sources and the general records review and site visit and discussions with project personnel was incorporated into the Phase One ESA Report as applicable.

## 6. Site Reconnaissance

### 6.1 General Requirement

Jacobs completed a Site reconnaissance on July 27, 2022 for approximately 3 hours, to inspect the Phase One Property and to view additional properties within the Phase One Study Area from publicly accessible areas. The weather was partly cloudy and approximately 25 degrees Celsius. The weather did not pose a hindrance to the Site reconnaissance.

During the Site reconnaissance, the Phase One Property was mostly vegetated land, with occasionally areas that cross through the Etobicoke Creek, the Etobicoke Creek Recreational Trail, and Dixie Road. The Site was viewed from the publicly accessible Etobicoke Recreational Trail, and therefore some portions of the Site were inaccessible due to dense vegetation and the Etobicoke Creek.

The Site has been classified as Agricultural or Other Land Use, and therefore, as listed in Clause 32 (1) (b) of O. Reg. 153/04, the Phase One Property has not been considered an enhanced investigation property.

The Site reconnaissance was completed by Ms. Jennifer Mannisto, B.Sc. Exhibit 2-3 provides her qualifications. Appendix E provides representative photographs taken onsite and within the Phase One Study Area.

### 6.2 Specific Observations at Phase One Property

Exhibit 6-1 summarizes Site-specific observations related to the Phase One Property.

Exhibit 6-1. Site Reconnaissance Summary

Specific Observation		Phase One Property
<b>1.0</b>	<b>Site Structures</b>	
1.1	Buildings	There are no buildings located on the Phase One Property.
1.2	Belowgrade Structures	There are no known below grade structures located along the Phase One Property.
1.3	Sump, pits, or drains	There are no sumps, pits, or drains located on the Phase One Property.
1.4	Current or former heating systems	As no buildings are currently or have historically been present on the Phase One Property, there are no current or former heating systems associated with the Phase One Property.
1.5	Hydraulic Equipment	There was no hydraulic equipment identified along the Phase One Property.
<b>2.0</b>	<b>Site Operations</b>	
2.1	Current site operations	The Phase One Property is a vegetated strip of land that is approximately 4.12 km in length, running from Kennedy Road (south of First Gulf Boulevard), east to Dixie Road, and south to Derry Road East.
2.2	Historical operations	The municipal addresses of the Phase One Property have historically been vegetated land. Portions of the Phase One Property are commercial or industrial in use and are currently transportation (trucking) facilities (7280 Dixie Road, Mississauga), packaging facilities (15 Westcreek Blvd, Brampton and 12 Clipper Ct, Brampton), and previous vehicle manufacturing (201 Westcreek Boulevard Brampton).

## Phase One Environmental Site Assessment

Specific Observation		Phase One Property
<b>3.0</b>	<b>Exterior Areas</b>	
3.1	Ground cover	The ground cover of the majority of the Phase One Property consists of grassed and vegetated land. Portions of the Phase One Property consist of Etobicoke Creek and the asphalt cover of the Etobicoke Recreational Trail.
3.2	Spills, stains, and surface observations	No spills or stains were observed along the Phase One Property.
3.3	Current and former railway lines and spurs	No current or former railway lines or spurs were identified within the Phase One Property.
<b>4.0</b>	<b>Utility Services</b>	
4.1	General service connections	As there are no buildings located on the Phase One Property, there are presumed to be no service connections to the Site.
4.2	Potable and nonpotable water sources	Vaughan is serviced by a municipal water source. The records review identified 9 domestic water supply wells within the vicinity of the Phase One Study Area.
4.3	Sewage system and sanitary discharges	As there are no buildings located on the Phase One Property, there are presumed to be no sewage system or sanitary discharge areas on the Site.
4.4	Stormwater discharge	Etobicoke Creek transverses through the Site from northwest to southwest. Surface water is expected to infiltrate the ground cover, or flow overland toward the creek. No storm drains or sewer catch basins were observed on the Phase One Property; however, storm drains may exist along portions of the Phase One Property which cross municipal roadways (i.e., Dixie Road).
4.5	Utility corridors	As portions of the Phase One Property are located adjacent to roadways or commercial businesses, it is presumed there are utility corridors running throughout the Site.
<b>5.0</b>	<b>Material Storage and Management</b>	
5.1	Underground storage tanks	There were no indicators of USTs (such as vent pipes) identified within the Phase One Property.
5.2	Above ground storage tanks	There were no aboveground storage tanks (ASTs) observed on the Phase One Property.
5.3	Chemical use and storage	There was no chemical use or storage observed within the Phase One Property.
5.4	Subject or hazardous waste	There was no subject of hazardous waste observed within the Phase One Property.
5.5	Solid wastes	There was no solid waste observed within the Phase One Property.
5.6	Polychlorinated biphenyls	There were no indicators of polychlorinated biphenyls observed within the Phase One Property.

### 6.2.1 Potentially Contaminating Activities

No new PCAs were identified on the Phase One Property during the Site reconnaissance.

### 6.3 Investigation of Accessible Lands Within Phase One Study Area

Figure 2-1 shows the properties within the Phase One Study Area, and the limits of the referenced cardinal directions. Figure 6-1 identified the land use of the Phase One Study Area.

## Phase One Environmental Site Assessment

---

A description of the accessible lands within the Phase One Study Area is as follows:

- East: vegetated land, and construction activities occurring adjacent to the east of the southeastern portion of the Site.
- West: Kennedy Road, followed by residential properties, and the Peel Village Golf Course.
- North:
  - Between Kennedy Road and Highway 410: Commercial, industrial, and community properties, including a truck parts supplier, a logistics service business, transportation services, a school, and Pepsi Co Foods distribution service.
  - Between Highway 410 and Highway 407: Weston Road, followed by commercial and industrial properties including an office building, transportation service businesses, and an industrial equipment supplier.
  - East of Highway 407: vegetated land, truck and material storage (followed by a gasoline station), Dixie Road, and baseball diamonds.
- South:
  - Between Kennedy Road and Highway 410: Commercial, community and parkland properties including a credit union, and the CAA centre, including cricket grounds, baseball diamonds, and a safety office.
  - Between Highway 410 and Highway 407: Etobicoke Creek and vegetated land.
  - East of Highway 407: vacant land, commercial properties (including transportation services, a parking lot, and office spaces), Mount Charles Park, a community building (Ontario Khalsa Darbar), Derry Road, and a gasoline station.

## 7. Review and Evaluation of Information

Based on the OPESA's review, evaluation, and interpretation of the information obtained from the records review and Site reconnaissance components of the Phase One ESA, Jacobs offers the following conclusions and findings.

### 7.1 Current and Past Uses

The Phase One Property is a vegetated strip of land that is approximately 4.12 km in length, running from Kennedy Road (south of First Gulf Boulevard), east to Dixie Road, and south to Derry Road East. The municipal addresses of the Phase One Property have historically been vegetated land. Portions of the Phase One Property are commercial or industrial in use and are currently transportation (trucking) facilities (7280 Dixie Road, Mississauga), packaging facilities (15 Westcreek Blvd, Brampton and 12 Clipper Ct, Brampton), and previous vehicle manufacturing (201 Westcreek Boulevard Brampton).

Table 7-1 summarizes the historical and current land uses at the Phase One Property, based on the results of the records review (Section 4), and where applicable, includes the inferred historical occupant or activity.

### 7.2 Potentially Contaminating Activities

Based on a records review, interviews, and a Site reconnaissance, Jacobs identified the following PCAs, as defined in Schedule D, Table 2 of O. Reg. 153/04. Figure 7-1 shows the PCA locations, and Table 7-2 summarizes the PCAs within the Phase One Study Area.

The following PCA was identified within the Phase One Property, and resulted in an APEC:

- 30 – Importation of Fill Material of Unknown Quality
- 40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
- Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (application of salt)

The following PCAs were identified outside of the Phase One Property, but within the Phase One Study Area:

- 8 – Chemical Manufacturing, Processing and Bulk Storage
- 10 – Commercial Autobody Shops
- 11 - Commercial Trucking and Container Terminals
- 18 - Electricity Generation, Transformation and Power Stations
- 28 – Gasoline and Associated Products Storage in Fixed Tanks
- 31 – Ink Manufacturing, Processing and Bulk Storage
- 33 – Metal Treatment, Coating, Plating and Finishing
- 34 – Metal Fabrication
- 39 - Paints Manufacturing, Processing and Bulk Storage
- 40 – Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
- 42 - Pharmaceutical Manufacturing and Processing
- 43 – Plastics (including Fibreglass) Manufacturing and Processing
- 49 - Salvage Yard, including automobile wrecking
- 50 - Soap and Detergent Manufacturing, Processing and Bulk Storage
- 55 - Transformer Manufacturing, Processing and Use
- 56 - Treatment of Sewage equal to or greater than 10,000 litres per day
- 57 – Vehicles and Associated Parts Manufacturing

- 58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
- Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (Waste Generation)
- Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (Woodworking)
- Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (Spills)
- Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (General Warehousing)
- Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (application of salt)
- 

### 7.3 Areas of Potential Environmental Concern

Based on a records review, interviews, and a Site reconnaissance, Jacobs identified 14 APECs within the Phase One Property: 7 attributable to onsite PCAs, and 7 attributable to various offsite PCAs within the Phase One Study Area that were considered to have the potential to impact the Phase One Property.

Figure 7-2 shows the APEC locations, which are summarized in Table 7-3. Contaminants of potential concern (COPCs) have been identified for each APEC in Table 7-3, based on the historical operations and type of PCA associated with the APEC.

The 14 identified APECs are summarized as follows:

- APEC-01: Former pesticide use - Aerial photographs show that large portions of the Phase One Property were agricultural from before 1945 until at least 1975.
- APEC-02: Fill of unknown quality - Fill was encountered below the topsoil in the most of referenced historical boreholes in the study area. The thickness of the fill ranged from about 0.8 m to 8.0 m.
- APEC-03: The use of salt on roadways for vehicular and pedestrian safety on highway 410
- APEC-04: The use of salt on roadways for vehicular and pedestrian safety on Westcreek Blvd.
- APEC-05: The use of salt on roadways for vehicular and pedestrian safety on Highway 407.
- APEC-06: The use of salt on roadways for vehicular and pedestrian safety on Tomken Road.
- APEC-07: The use of salt on roadways for vehicular and pedestrian safety on Dixie Road.
- APEC-08: Offsite PCAs that result in an APEC:
  - PCA #57 - Vehicles and Associated Parts Manufacturing: Arvin Meritor Canada, an automobile and light duty motor vehicle manufacturer, was listed at 350 First Gulf Blvd as a waste generator for paint/pigment/coating residues, petroleum distillates, oil skimming's and sludges, organic laboratory chemicals, waste oils and lubricants, and organic acids (2004 to 2010). The property was also listed with NPRI for storage of various VOCs and the release of particulate matter
  - PCA #57 - Vehicles and Associated Parts Manufacturing: Meritor Aftermarket Canada, Inc. , an automobile and light duty motor vehicle manufacturer, (2010 to 2016) was listed at 350 First Gulf Blvd as a waste generator for oil skimming's and sludges, waste oils and lubricants, petroleum distillates, and paint/pigment/coating residues.
  - PCA # 49 - Salvage Yard, including automobile wrecking: Automobile Wrecker Records at 14 Casper Cres. Had 2 Records for ATL Towing and Scrap Car Removal.
  - Other - Mascot Truck Parts - Reported as a used motor vehicle parts and accessories wholesaler and distributor at 350 First Gulf Blvd which was listed as a waste generator of waste oils and lubricants, paint/pigment/coatings residues, petroleum distillates, and oil skimming's and sludges.
- APEC-09: Offsite PCAs that result in an APEC:
  - PCA # 42 - Pharmaceutical Manufacturing and Processing: Pharmaceuticals - Apotex Inc was listed at 250 First Gulf Blvd was a waste generator of pharmaceuticals.
  - Other - Waste generator - 250 First Gulf Blvd was listed under Agfa Inc, were listed as waste generators of alkaline solution containing other metals and non-metals (not cyanide), miscellaneous waste chemicals, and organic acids.

## Phase One Environmental Site Assessment

---

- Other - DSV Solutions Inc, Virtual Distribution Inc, UTI Contract Logistics and Distributions were listed as a warehouse and storage facility at 250 First Gulf Blvd as a waste generator of organic laboratory chemicals, acid waste - heavy metals, alkaline wastes - heavy metals, pharmaceuticals, aliphatic solvents, and detergents/soaps.
- APEC-10: Offsite PCAs that result in an APEC:
  - PCA # 11 - Commercial Trucking and Container Terminals: Airoute Cargo Ltd., located at 200 First Gulf Blvd, was listed as a waste generator of oils, detergents and soaps, and waste organic chemicals (2018 to 2019).
  - PCA # 11 - Commercial Trucking and Container Terminals: Dicom Express, located at 300 Biscayne Cr, was listed as general freight trucking, local general freight trucking, long distance trucking terminal with a waste generator record. Seven records for Dicom Transportation Group Canada Inc. (2014 to 2022) the waste generator of solvents, light fuels, heavy metals, waste oils, and paint and pigment residues. Gojit was listed at 300 Biscayne Crescent, a aerospace product and part manufacturing or trucking facility, with a waste generator record. Eight records for (2002 to 2013) the generation of various wastes, including inorganic wastes, solvents, photo processing wastes, light fuels, heavy metals, waste oils, and metals.
  - PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: Dicom Express, located at 300 Biscayne Cr was listed with an expired private fuel outlet. A record indicated that a steel, single wall, diesel fuel AST was installed January 5, 1996
  - PCA # 34 - Metal Fabrication: Magnum Integrated Technologies Inc, located at 200 First Gulf Blvd, was listed as metalworking and machinery manufacturing business, and as a waste generator of paint/pigments/coating residues and waste oils and lubricants.
  - Other - Spills Records - Go Jet spill of 40 L of motor oil to ground from a storage tank overflow in 2005. Gojit Trans spill of 20 L of formaldehyde in 2007 and a 90-L diesel spill to the ground in 2010. One fuel oil spill and leak record was identified for this location. A diesel spill in 2010. Amount not noted.
- APEC-11: Offsite PCA that result in an APEC:
  - Other - Frito-Lay Canada/PepsiCo Canada, located at 12 Clipper Court, was identified as a specialty-Line Food Wholesaler-Distributor in Scotts Manufacturing Directory. 13 records for Frito-Lay Canada/PepsiCo Canada (2002 to 2022) as a waste generator of oil skimmings and sludges, petroleum distillates, waste oils, and lubricants.
- APEC-12: Offsite PCA that result in an APEC:
  - PCA # 8 - Chemical Manufacturing, Processing and Bulk Storage: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns, UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons
  - PCA # 11 - Commercial Trucking and Container Terminals: Various business were listed as couriers, including Company 6586856 Canada Inc, DHL Express Canada Limited, Loomis Courier Services and Mayne Logistics Loomis Inc. Company 6586856 Canada Inc, was listed with a total of 9 records (2010 to 2022) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. DHL Express Canada Limited was listed with a total of 2 records (2003 to 2009) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. Loomis Courier Services and Mayne Logistics Loomis Inc was listed with 2 records (2001 and 2002) for waste generation of inorganic laboratory chemicals, aromatic solvents, aliphatic solvents, petroleum distillates, waste oils and lubricants, and organic laboratory chemicals.

## Phase One Environmental Site Assessment

---

- PCA # 11 - Commercial Trucking and Container Terminals: Clark Transport Inc was listed at 201 Westcreek Blvd as a general freight trucking company. A total of four records (2016 - 2021) for waste generation of miscellaneous waste organic chemicals, light fuels, and/or miscellaneous waste organic chemicals.
- PCA # 11 - Commercial Trucking and Container Terminals: 12 records for Transex Ltd. (2001 to 2019) for various contaminants, including inorganic wastes, solvents, petroleum distillates, fuels, and heavy metals.
- PCA #28 - Gasoline and Associated Products Storage in Fixed Tanks (four instances): Aboveground storage tank - petroleum. No other information provided.
- PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:
  - Former UST-residual fuel impacts
  - PHC impacts at former chlorine contact chambers
  - Active UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons
- PCA # 30 - Importation of Fill Material of Unknown Quality: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:
  - Unknown fill quality related to area of former septic and sewage system treatment area
  - Metals impacts in soils in garden plot area
  - Storage of contaminated soil
- PCA # 34 - Metal Fabrication: F-H Welding Machines Ltd was listed at 150-201 Westcreek Blvd as a waste generator of petroleum distillates, waste crankcase oils and lubricants, and/or emulsified oils.
- PCA # 55 - Transformer Manufacturing, Processing and Use: Three records for Ministry of Environment, Conservation and Parks (2007 to 2011) for PCBs and waste oils and lubricants.
- PCA # 55 - Transformer Manufacturing, Processing and Use: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:
  - Potential former PCB-containing transformer
  - Improper storage of PCB ballasts
  - Storage of contaminated soil
- PCA # 56 - Treatment of Sewage equal to or greater than 10,000 litres per day: Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns:
  - Storage of contaminated soil
  - Metals impacts in soils in garden plot area
- PCA # 57 - Vehicles and Associated Parts Manufacturing: ABB Inc. (1954 to 1963) was listed at 201 Westcreek Blvd in Scotts Manufacturing Directory for chemical machinery manufacturing, wire manufacturing, and automobile vehicle manufacturing. ABB was also listed as a waste generator with 15 records (2000 to 2021) for paints pigment coatings, waste oils, resins, oils, and other metals and chemicals.
- Other: Spills Record - DHL Express Canada Ltd reported a spill of 2 L of Gasoline to catch basin July 29, 2008.
- Other: Waste Generator Records - Artis Westcreek Ltd, a real estate property manager located at 201 Westcreek Blvd, was listed in 2015 as a waste generator of oil skimmings and sludges.
- APEC-13: Offsite PCA that result in an APEC:
  - PCA # 18 - Electricity Generation, Transformation and Power Stations: Hydro One Networks Inc is listed at 7365 Tomken Road as electric power distribution center and a waste generator. A total of six records were listed (2015 to 2021) for generation of oil skimming's and sludges.
  - PCA # 58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners: Various Numbered Ontario Companies was registered at 7280 Dixie Road as a waste management system and industrial sewage works.
  - Other: Waste Generator Records - 8 records for UTI Contract Logistics & Distribution (2010 to 2018) for solvents, heat metals, and laboratory chemicals.
- APEC-14: Offsite PCA that result in an APEC:

## Phase One Environmental Site Assessment

- PCA # 11 - Commercial Trucking and Container Terminals: Various trucking companies were listed at 7280 Dixie Road. A total of three waste generator records for Autlink Express (2010 to 2013) for waste oils, 5 records for 4 Refuel (2014 to 2019) for light fuels, and 4 records for 2253457 Ontario Inc. were reported for waste oils and sludges and light fuels (2006 to 2022).
- PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks: 7 records for fuel storage tanks for Aecon Utilities (2 records) and 2215296 Ontario Inc. (5 records). Additionally, two historical fuel tanks were identified for Aecon Utilities. For Aecon Utilities, two records for two diesel, steel, double-walled USTs were identified. The USTs were installed in 2001 with a capacity of 11,350 each. The historical fuel tanks match the same description. For 2215296 Ontario Inc., five records for three diesel and two gasoline fiberglass, double walled USTs. All five USTs were installed in 2012. The three diesel and one gasoline USTs have a capacity of 90,000 and one gasoline tank has a capacity of 65,000.
- PCA # 39 - Paints Manufacturing, Processing and Bulk Storage: Corrosion Free North America Inc. (1979) was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a paint and coating manufacturing.
- PCA # 50 - Soap and Detergent Manufacturing, Processing and Bulk Storage: EAZE OUT (no date) - was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a soap and cleaning compound manufacturing business.

### 7.4 Phase One Conceptual Site Model

Jacobs developed the Phase One CSM, which consists of five figures (Figure 2-1, Figure 2-2, Figure 6-1, Figure 7-1, and Figure 7-2) and four tables (Table 4-1, Table 7-1, Table 7-2, and Table 7-3). The purpose of the CSM is to assist with organizing, presenting, and understanding the potential environmental concerns related to the subsurface within the Phase One Study Areas. Exhibit 7-1 summarizes the CSM.

Exhibit 7-1. Phase One Conceptual Site Model

Phase One CSM Element	Summary
Existing Buildings and Structures	No buildings or structures are currently or have historically been present on the Site.
Identify Water Bodies in the Phase One Study Area	The Etobicoke Creek flows west to east through the Site and Study Area, then flows approximately 2 km south east of the Site (Region 2022).
Areas of Natural and Scientific Interest	Jacobs reviewed the Land Information Ontario (LIO) Area of Natural and Scientific Interest (ANSI) maps (LIO 2022), and did not identify an ANSI within the Phase One Study Area. The nearest ANSI property is Meadowvale Station Woods, which is 6 km south of the Site.
Presence of Drinking Water Wells	No potable water wells are present on the Phase One Property; however, records review identified 9 domestic water supply wells within the vicinity of the Phase One Study Area. To be conservative, the Site would be considered in a potable water condition.
Identify Roads within the Phase One Study Area	Figure 2-1 presents the roadways and land use within the Phase One Study Area.
Adjacent Property Uses	Figure 6-1 presents the current adjacent property use which consist of community, commercial, or industrial use in the Study Area.
Identify PCAs in the Phase One Study Area	The following PCA was identified within the Phase One Property: <ul style="list-style-type: none"> <li>▪ 30 – Importation of Fill Material of Unknown Quality</li> <li>▪ 40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications</li> <li>▪ Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (application of salt)</li> </ul>

## Phase One Environmental Site Assessment

Phase One CSM Element	Summary
	<p>The following PCAs were identified outside of the Phase One Property, but within the Phase One Study Area, and would result in an APEC on the Phase One Property:</p> <ul style="list-style-type: none"> <li>▪ 8 – Chemical Manufacturing, Processing and Bulk Storage</li> <li>▪ 11 - Commercial Trucking and Container Terminals</li> <li>▪ 18 - Electricity Generation, Transformation and Power Stations</li> <li>▪ 28 – Gasoline and Associated Products Storage in Fixed Tanks</li> <li>▪ 30 - Importation of Fill Material of Unknown Quality</li> <li>▪ 34 – Metal Fabrication</li> <li>▪ 39 - Paints Manufacturing, Processing and Bulk Storage</li> <li>▪ 42 - Pharmaceutical Manufacturing and Processing</li> <li>▪ 43 – Plastics (including Fibreglass) Manufacturing and Processing</li> <li>▪ 49 - Salvage Yard, including automobile wrecking</li> <li>▪ 50 - Soap and Detergent Manufacturing, Processing and Bulk Storage</li> <li>▪ 55 - Transformer Manufacturing, Processing and Use</li> <li>▪ 56 - Treatment of Sewage equal to or greater than 10,000 litres per day</li> <li>▪ 57 – Vehicles and Associated Parts Manufacturing</li> <li>▪ 58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners</li> <li>▪ Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (Waste Generation)</li> <li>▪ Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (Woodworking)</li> <li>▪ Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (Spills)</li> <li>▪ Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (General Warehousing)</li> <li>▪ Other – Activity not defined in O. Reg. 153/04 Table 2 of Schedule D (application of salt)</li> </ul> <p>Table 7-2 summarizes the details of the PCAs identified in the Phase One Study Area, Figure 7-1 shows the locations.</p>
Identify APECs	14 APECs were identified across the Phase One Property. Table 7-3 summarizes the details of the APECs, and Figure 7-2 shows the locations.
COPCs	The COPCs identified within the Phase One Study Areas are presented on Table 7-3 and include metals, ABNs, organochloro pesticides, PAHs, PHCs, and VOCs.
Presence of Underground Utilities	There is potential for utility corridors to be acting as contaminant sources, or to be providing a preferential route of contaminant migration.
Regional and Local Geology	<p>The Quaternary Geology of Ontario, Southern Sheet, Map 2556, issued by the Ontario Ministry of Northern Development and Mines (MNDM) (Barnett 1991), indicates the overburden soils in the Study Area consist of Halton Till deposits. The Halton Till is formed by the last major advance of the Lake Ontario basin ice lobe (Sharpe and Russel 2013). These deposits are primarily composed of a dense, sandy to silty clay till that is clast poor and reddish brown in colour and is often interbedded with silt, clay, sand, and gravel. The Halton Till is typically 3 m to 6 m thick, but locally can range from 15 m to 30 m in thickness.</p> <p>Isolated glaciolacustrine deposits are also identified in the Etobicoke Creek area, which is within the Study Area. These deposits consist of massive to laminated silt and clay, and may contain poorly sorted diamicton (unsorted to poorly sorted and contains particles ranging in size from clay to boulders) layers, based on Ontario Geological Society (OGS) Map 2223 (Barnett 1991).</p>

## Phase One Environmental Site Assessment

---

Phase One CSM Element	Summary
Regional and Local Hydrogeology	<p>The Study Area is partially located in Mississauga and partially in Brampton, and is part of the Etobicoke Creek watershed. A water body, Etobicoke Creek, transverses through the Site from northwest to southwest. Based on the ERIS borehole and water well information system records, the static water levels ranged from 1.5 to 3.7 mbgs for the Site (ERIS 2020a).</p> <p>Proctor &amp; Redfern (1999) identified groundwater in the Study Area as flowing southeast. Regional groundwater flow is assumed to be southeasterly towards Lake Ontario, based on the topography (Government of Canada 2020).</p>
Uncertainties Affecting the Validity of the Phase One CSM	<p>On the basis of the uncertainties presented within the Phase One ESA report, it is possible that a PCA, APEC, or land use has not been identified within the individual components of the Phase One ESA. Information was gathered from numerous sources (that is, aerial photographs, database searches, historical reports, and a Site reconnaissance), which decreases the chance that a major PCA or land use was not identified in this Phase One ESA. Many aspects of the CSM have been previously studied; these aspects are not directly affected by the noted uncertainties, which can be summarized as follows:</p> <p>Quality of aerial photographs may not allow some features to be clearly identified, and professional judgment was used to relate the historical features identified in the aerial photographs to present-day locations</p> <p>Municipal addresses are known to change</p>

## 8. Conclusions

### 8.1 Requirement for Phase Two Environmental Site Assessment Before Record of Site Condition Submittal

Based on the findings of the Phase One ESA investigation, 7 PCA was identified on the Phase One Property and 5 PCAs were identified offsite with the potential to impact the Phase One Property, which resulted in 14 APECs being identified across the Phase One Property. Five APECs (APEC-03 to APEC-08) were related to the use of salt of pedestrian or vehicular safety on roadways. The use of salt has been identified as an APEC in these instances in order to rely upon the exemption set out under Paragraph 1 of Section 49.1 of the revised O. Reg. 153/04, which indicates the Site Condition Standard is deemed to not be exceeded for the purpose of Part XV.1 of the *Environmental Assessment Act* should a substance be applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. Additionally, these APECs have been identified as per Section 2 (3) (14) (iii) of the *Rules for Soil Management and Excess Soil Quality Standards*, under O. Reg 406/19, these APECs would require electrical conductivity and sodium adsorption ratio sampling as a part of excess soil management.

Whether or not an RSC is required for the Phase One Property, a Phase Two ESA will be necessary, given the Site has PCAs identified on the Phase One Property. Depending on the findings of the Phase Two ESA, an additional subsurface ESA, risk assessment, risk management, or remedial work, or some combination thereof, may also potentially be necessary.

### 8.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone

If an RSC is required for any portion of the Phase One Property, a Phase Two ESA will be necessary. The property is considered an enhanced investigation property, as listed in Clause 32 (1) (b) of O. Reg. 153/04. Therefore, the filing of an RSC based on this Phase One ESA alone is not acceptable based on the information presently available.

### 8.3 Signatures

The findings and conclusion of this report have been supervised and reviewed by the undersigned Qualified Person and senior technical consultant.

As QPESA, I (Nadine Hanneson) confirm I have carried out a review of the Phase One ESA, findings, and conclusions of this report.

Sincerely,

*DRAFT*

## 10. Limitations

This Phase One ESA report deals specifically with a portion of the properties located along the Etobicoke Creek Trunk Sewer Program that is approximately 4.12 km in length, running from Kennedy Road (south of First Gulf Boulevard), east to Dixie Road, and south to Derry Road East. (Phase One Property), and was prepared by Jacobs for the exclusive use of the Region.

Phase One ESAs completed in accordance with the O. Reg. 153/04, have inherent limitations. The findings and conclusions regarding impacts at the Site are based solely on the extent of observations and information gathered during the Phase One ESA.

The Phase One ESA did not include any intrusive sampling or analysis of the following additional issues:

- Asbestos-containing material
- Radon
- Lead-based paint
- Lead in drinking water
- Wetlands
- Detailed regulatory compliance
- Cultural and historic resources
- Industrial hygiene
- Detailed health and safety compliance
- Biological resources
- Endangered species
- Indoor air quality
- Biological agents or moulds
- Liabilities associated with the offsite management of solid or hazardous wastes originating from the Site

The findings and conclusions stated in this report are based on facts and circumstances as they existed when the report was prepared. Changes in fact or the circumstances the report was based on may change the findings reported. Should additional environmental condition information become available after the date of this report, the opinions presented in this report may no longer be valid and would require re-evaluation. Jacobs cannot report on, or accurately predict, events that may change the Site conditions after the described services are performed, whether occurring naturally or caused by external forces.

Other considerations and limitations applicable to this Phase One ESA also include the following.

### 10.1 Standard of Care and Limitation of Liability

Jacobs's services are governed by the negligence standard for professional services, measured as of the time and in the location those services are performed; Jacobs will not be liable to the Region or for any damages, where we have exercised a reasonable standard of care.

### 10.2 No Third-party Beneficiaries

This Phase One ESA report gives no rights or benefits to anyone other than the Region and Jacobs, and has no third-party beneficiaries. All work products prepared are for the sole and exclusive use of the Region for specific application to the property described in the agreement; are not for the benefit of any third party; and may not be distributed to, disclosed in any form to, used by, or relied upon by any third party without Jacobs' prior written consent, which consent may be withheld in its sole discretion.

The use of this Phase One ESA report, or any information contained herein, if by any party other than the Region, will be at the sole risk of such party and will constitute a release and agreement by such party to defend and indemnify Jacobs and its affiliates, officers, employees, and subcontractors from and against

## Phase One Environmental Site Assessment

---

any liability for direct, indirect, incidental, consequential, or special loss or damage, or other liability of any nature arising from its use of the report, or reliance upon any of its content. To the maximum extent permitted by law, such release from and indemnification against liability will apply in contract, tort (including negligence), strict liability, or any other theory of liability.

No warranty, expressed or implied, is made regarding the services performed.

If the Region requests Jacobs' consent for a third party to depend upon the Phase One ESA report in connection with decisions regarding redevelopment, sales, or acquisitions, such consent will be considered given upon the third-party's execution of a Reliance Letter, as provided by Jacobs.

### 10.3 Existing Site Conditions

Any opinions or recommendations presented apply to site conditions existing when services were performed. Jacobs cannot report on, or accurately predict, events that may change the Site conditions after the described services are performed, whether occurring naturally or caused by external forces.

Jacobs assumes no responsibility for conditions we are not authorized to investigate, or which are not in our specific scope of work. Unknown contamination may be exposed during excavation.

Jacobs' investigations of site conditions consisted of record searches and interviews, which may not provide complete information about underground conditions.

In preparing this Phase One ESA report, Jacobs relied, in whole or in part, on data and information provided by the Region and third parties, and has not independently verified that information; Jacobs has assumed the information to be accurate, complete, reliable, and current. Therefore, while Jacobs has used its best efforts in preparing this Phase One ESA report, Jacobs does not warrant or guarantee the conclusions set forth in this Phase One ESA report that are dependent or based on data, information, or statements supplied by third parties or the Region.

## Etobicoke Creek Trunk Sewer Project, Brampton and Mississauga, Ontario

Table 4-1. Aerial Photograph Summary

*Phase One Environmental Site Assessment, Etobicoke Creek Trunk Sewer Project, Brampton and Mississauga, Ontario*

Year <sup>a, b, c, d</sup>	Observations on Phase One Property	Observations on Study Area <sup>e</sup>
<i>Kennedy Road to Highway 410</i>		
1946	The Site is vacant, and sparsely treed. The Etobicoke Creek weaves through the Site, generally oriented northeast to southwest.	Kennedy Road is visible as a municipal roadway west of the Site. An unnamed road (later becomes Highway 410) is visible as a municipal roadway east of the Site. Additional, unnamed roadways are present north and south of the Site. The Etobicoke Creek crosses the Site from the southwest end of the Study Area to the northeastern end. Various residential buildings are located on the western edge of the Site with roadways connecting to Kennedy Road. Similarly, residential buildings are present on the eastern edge of the Site connecting to Highway 410. The Study Area mainly consists of sparsely treed agricultural land.
1954	No significant changes to the Phase One Property since the 1946 aerial photograph. The Site remains grassed, treed, and vacant.	The Study Area appears relatively consistent with the land use observed in the 1946 aerial photograph, except for the following: <ul style="list-style-type: none"> <li>▪ Numerous additional unnamed roadways are present south of the Site.</li> </ul> The Study Area remains predominantly vacant, agricultural land.
1960	No significant changes to the Phase One Property since the 1954 aerial photograph.	The Study Area appears relatively consistent with the land use observed in the 1954 aerial photograph, except for the following: <ul style="list-style-type: none"> <li>▪ Additional residential structures have been built west of Kennedy Road.</li> <li>▪ Significant erosion has altered the course of the Etobicoke Creek near where Highway 410 will be built.</li> </ul>
1966	No significant changes to the Phase One Property since the 1960 aerial photograph.	The Study Area appears relatively consistent with the land use observed in the 1960 aerial photograph, except for the following: <ul style="list-style-type: none"> <li>▪ A water treatment facility is visible near where Highway 410 will be built.</li> </ul>
1975	No significant changes to the Phase One Property since the 1966 aerial photograph.	The Study Area appears relatively consistent with the land use observed in the 1966 aerial photographs, except for the following: <ul style="list-style-type: none"> <li>▪ Vegetation in the Study Area has increased.</li> </ul>
1980	No significant changes to the Phase One Property since the 1975 aerial photograph.	The Study Area appears relatively consistent with the land use observed in the 1966 aerial photographs. <ul style="list-style-type: none"> <li>▪ Highway 410 is visible running north south.</li> </ul>
1996	No significant changes to the Phase One Property since the 1980 aerial photograph. Highway 407 pass	The Study Area appears relatively consistent with the land use observed in the 1980 aerial photograph. <ul style="list-style-type: none"> <li>▪ Highway 407 is present running east to west.</li> </ul>

## Etobicoke Creek Trunk Sewer Project, Brampton and Mississauga, Ontario

Year <sup>a, b, c, d</sup>	Observations on Phase One Property	Observations on Study Area <sup>e</sup>
		<ul style="list-style-type: none"> <li>▪ Highway 410 has been expanded and now possesses on ramps.</li> </ul>
2003	<p>Highway 407 and Highway 410 pass through the Site and bridge over Etobicoke Creek.</p> <p>No other significant changes to the Phase One Property since the 1975 aerial photograph.</p>	<p>The Study Area appears relatively consistent with the land use observed in the 1975 aerial photograph.</p> <ul style="list-style-type: none"> <li>▪ A golf course is present west of Kennedy Road.</li> <li>▪ A community area has been constructed near the intersection of Kennedy Road and Highway 407. Five baseball diamonds and a large building with a parking lot are present.</li> <li>▪ First Gulf Boulevard is present north of the Study Area.</li> <li>▪ Construction is taking place at the intersection of First Gulf Boulevard and Kennedy Road.</li> <li>▪ North and south of the Site, commercial/industrial/residential development has taken place.</li> <li>▪ Parkland trails are visible running the length of Etobicoke Creek.</li> </ul>
2012	<p>No significant changes to the Phase One Property since the 2003 aerial photograph.</p>	<p>The Study Area appears relatively consistent with the land use observed in the 2003 aerial photograph.</p> <ul style="list-style-type: none"> <li>▪ The development north and south of the Site has increased in density.</li> <li>▪ Numerous electrical transmission structures have been built south of Highway 407.</li> </ul>
2021	<p>No significant changes to the Phase One Property since the 2012 aerial photograph.</p>	<p>The Study Area appears relatively consistent with the land use observed in the 2012 aerial photograph.</p> <ul style="list-style-type: none"> <li>▪ Vegetation density along the Etobicoke Creek has increased.</li> </ul>
<i>Highway 410 to Dixie Road</i>		
1946	<p>The Site is vacant, and sparsely treed. The Etobicoke Creek weaves through the Site, generally oriented east to west.</p>	<p>The precursor to Highway 410, Dixie Road, and Derry Road East are visible as municipal roadways west, east, and south of the Site, respectively. Steeles Avenue East is present north of the Site, outside the Study Area. The Etobicoke Creek crosses the Site from the east end of the Study Area to the west.</p> <p>Various residential buildings are located along Dixie Road. The Study Area mainly consists of sparsely treed agricultural land.</p>
1954	<p>No significant changes to the Phase One Property since the 1946 aerial photograph.</p> <p>The Site remains grassed, treed, and vacant.</p>	<p>The Study Area appears relatively consistent with the land use observed in the 1946 aerial photograph, except for the following:</p> <ul style="list-style-type: none"> <li>▪ A few residential dwellings have been constructed along near where Highway 410 will be built and Dixie Road.</li> <li>▪ Mount Charles is labelled west of the intersection of Dixie Road and Derry Avenue East.</li> </ul> <p>The Study Area remains predominantly vacant, agricultural land.</p>
1960	<p>No significant changes to the Phase One Property since the 1954 aerial photograph.</p>	<p>The Study Area appears relatively consistent with the land use observed in the 1954 aerial photograph, except for the following:</p>

11 - Commercial Trucking and Container Terminals	26	Airoute Cargo Ltd., located at 200 First Gulf Blvd, was listed as a waste generator of oils, detergents and soaps, and waste organic chemicals (2018 to 2019).	Off-site	Yes	APEC-10	PCA is located upgradient of the Site.	PHC, BTEX, PAH, metals
34 - Metal Fabrication	27	Magnum Integrated Technologies Inc, located at 200 First Gulf Blvd, was listed as metalworking and machinery manufacturing business, and as a waste generator of paint/pigments/coating residues and waste oils and lubricants.	Off-site	Yes	APEC-10	PCA is located upgradient of the Site.	metal, PAH, VOC
11 - Commercial Trucking and Container Terminals	28	Company 6586856 Canada Inc, was listed at 200 Westcreek Blvd as a courier. A total of 9 records were listed (2010 to 2022) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. DHL Express Canada Limited was listed at 200 Westcreek Blvd as a courier. A total of 2 records were listed (2003 to 2009) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. Loomis Courier Services and Mayne Logistics Loomis Inc was listed at 200 Westcreek Drive as a courier. Two records were listed (2001 and 2002) for waste generation of inorganic laboratory chemicals, aromatic solvents, aliphatic solvents. Spills Record - DHL Express Canada Ltd reported a spill of 2 L of Gasoline to catch basin July 29, 2008.	Off-site	Yes	APEC-12	PCA is located upgradient of the Site.	PHC, BTEX, PAH, metals
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	29	Spills Record - DHL Express Canada Ltd reported a spill of 2 L of Gasoline to catch basin July 29, 2008.	Off-site	Yes	APEC-12	PCA is located upgradient of the Site.	PHC, BTEX
57 - Vehicles and Associated Parts Manufacturing	30	ABB Inc. (1954 to 1963) was listed at 201 Westcreek Blvd in Scotts Manufacturing Directory for chemical machinery manufacturing, wire manufacturing, and automobile vehicle manufacturing. ABB was also listed as a waste generator with 15 records (2000 to 2021) for paints pigment coatings, waste oils, resins, oils, and other metals and chemicals.	Off-site	Yes	APEC-12	PCA is located upgradient of the Site.	PAH, PHC, VOC
11 - Commercial Trucking and Container Terminals	31	Clark Transport Inc was listed at 201 Westcreek Blvd as a general freight trucking company. A total of four records (2016 - 2021) for waste generation of miscellaneous waste organic chemicals, light fuels, and/or miscellaneous waste organic chemicals.	Off-site	Yes	APEC-12	PCA is located upgradient of the Site.	PHC, BTEX, PAH, metals
34 - Metal Fabrication	32	F-H Welding Machines Ltd was listed at 150-201 Westcreek Blvd as a waste generator of petroleum distillates, waste crankcase oils and lubricants, and/or emulsified oils.	Off-site	Yes	APEC-12	PCA is located upgradient of the Site.	metal, PAH, VOC
11 - Commercial Trucking and Container Terminals	33	12 records for Transex Ltd. (2001 to 2019) for various contaminants, including inorganic wastes, solvents, petroleum distillates, fuels, and heavy metals.	Off-site	Yes	APEC-12	PCA is located upgradient of the Site.	PHC, BTEX, PAH, metals
55 - Transformer Manufacturing, Processing and Use	34	Waste Generator Records Three records for Ministry of Environment, Conservation and Parks (2007 to 2011) for PCBs and waste oils and lubricants.	Off-site	Yes	APEC-12	PCA is located downgradient but directly adjacent to the Site.	PCB, PAH
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	35	Waste generator - 250 First Gulf Blvd was listed under Agfa Inc, were listed as waste generators of alkaline solution containing other metals and non-metals (not cyanide), miscellaneous waste chemicals, and organic acids.	Off-site	Yes	APEC-09	PCA is located upgradient of the Site.	PAH, PHC, VOC, metals, ORP (Hg)
42 - Pharmaceutical Manufacturing and Processing	36	Pharmaceuticals - Apotex Inc was listed at 250 First Gulf Blvd was a waste generator of pharmaceuticals.	Off-site	Yes	APEC-09	PCA is located upgradient of the Site.	VOC, metals, ABN
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	37	DSV Solutions Inc, Virtual Distribution Inc, UTI Contract Logistics and Distributions were listed as a warehouse and storage facility at 250 First Gulf Blvd as a waste generator of organic laboratory chemicals, acid waste - heavy metals, alkaline wastes - heavy metals, pharmaceuticals, aliphatic solvents, and detergents/soaps.	Off-site	Yes	APEC-09	PCA is located upgradient of the Site.	PAH, PHC, VOC, metals, ORP (Hg)
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	38	Waste Generator Records - 8 records for UTI Contract Logistics & Distribution (2010 to 2018) for solvents, heat metals, and laboratory chemicals.	Off-site	Yes	APEC-13	PCA is located upgradient of the Site.	PAH, PHC, VOC, metals, ORP (Hg)
18 - Electricity Generation, Transformation and Power Stations	39	Hydro One Networks Inc is listed at 7365 Tomken Road as electric power distribution center and a waste generator. A total of six records were listed (2015 to 2021) for generation of oil skimming's and sludges.	Off-site	Yes	APEC-13	PCA is located upgradient of the Site.	PAH, PHC

Table 7-2. Potentially Contaminating Activities within the Phase One Study Area  
Phase One Environmental Site Assessment, Etobicoke Creek Trunk Sewer Project, Brampton and Mississauga, Ontario

PCA <sup>a</sup>	Unique PCA ID	Descriptions of PCAs	Location of PCA <sup>b</sup>	PCA Results in APEC	Resulting APEC	Rationale	COPCs
28 - Gasoline and Associated Products Storage in Fixed Tanks	40	Braver Fuels Management was listed at 7010 Dixie Road with 1 record for expired fuel safety facilities for Beaver Fuels Management Limited was identified for the Site. 1 record for a private and retail fuel storage tank. Spill Records - Shell Canada spill to ground with unknown quantity in 1988 and Trimac Transportation Services, spill to ground of 10 L of gasoline in 1993. The TTTSA listed this property as an expired full serve gasoline station.	Off-site	No	NA	PCA is not hydraulically connected to the Site (other side of Creek)	NA
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	41	Spills Records - Spill of 200vL of diesel and 20 L of engine oil to road in 2016.	Off-site	No	NA	PCA is greater than 150 m from the Site.	NA
28 - Gasoline and Associated Products Storage in Fixed Tanks	42	Fuel Tank Records 7 records for fuel storage tanks for Aecon Utilities (2 records) and 2215296 Ontario Inc. (5 records). Additionally, two historical fuel tanks were identified for Aecon Utilities. For Aecon Utilities, two records for two diesel, steel, double-walled USTs were identified. The USTs were installed in 2001 with a capacity of 11,350 each. The historical fuel tanks match the same description. For 2215296 Ontario Inc., five records for three diesel and two gasoline fiberglass, double walled USTs. All five USTs were installed in 2012. The three diesel and one gasoline USTs have a capacity of 90,000 and one gasoline tank has a capacity of 65,000.	Off-site	Yes	APEC-14	PCA is located upgradient of the Site.	PHC, BTEX
11 - Commercial Trucking and Container Terminals	43	Various trucking companies were listed at 7280 Dixie Road. A total of three waste generator records for Autlink Express (2010 to 2013) for waste oils, 5 records for 4 Refuel (2014 to 2019) for light fuels, and 4 records for 2253457 Ontario Inc. were reported for waste oils and sludges and light fuels (2006 to 2022).	Off-site	Yes	APEC-14	PCA is located upgradient of the Site.	PHC, BTEX, PAH, metals
50 - Soap and Detergent Manufacturing, Processing and Bulk Storage	44	EAZE OUT (no date) - was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a soap and cleaning compound manufacturing business.	Off-site	Yes	APEC-14	PCA is located upgradient of the Site.	PAH, VOC, ABN
39 - Paints Manufacturing, Processing and Bulk Storage	45	Corrosion Free North America Inc. (1979) was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a paint and coating manufacturing.	Off-site	Yes	APEC-14	PCA is located upgradient of the Site.	VOC
58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	46	Various Numbered Ontario Companies was registered at 7280 Dixie Road as a waste management system and industrial sewage works.	Off-site	Yes	APEC-13	PCA is located upgradient of the Site.	PAH, ABN, metals, ORP
28 - Gasoline and Associated Products Storage in Fixed Tanks	47	Dicom Express, located at 300 Biscayne Cr was listed with an expired private fuel outlet. A record indicated that a steel, single wall, diesel fuel AST was installed January 5, 1996. The TSSA listed this address with one expired liquid fuel tank associated with one expired self serve private fuel outlet.	Off-site	Yes	APEC-10	PCA is located upgradient of the Site.	PHC, BTEX
11 - Commercial Trucking and Container Terminals	48	Dicom Express, located at 300 Biscayne Cr, was listed as general freight trucking, local general freight trucking, long distance trucking terminal with a waste generator record. Seven records for Dicom Transportation Group Canada Inc. (2014 to 2022) the waste generator of solvents, light fuels, heavy metals, waste oils, and paint and pigment residues. Gojit was listed at 300 Biscayne Crescent, a s aerospace product and part manufacturing or trucking facility, with a waste generator record. Eight records for (2002 to 2013) the generation of various wastes, including inorganic wastes, solvents, photo processing wastes, light fuels, heavy metals, waste oils, and metals.	Off-site	Yes	APEC-10	PCA is located upgradient of the Site.	PHC, BTEX, PAH, metals
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	49	Spills Records - Go Jet spill of 40 L of motor oil to ground from a storage tank overflow in 2005. Gojit Trans spill of 20 L of formaldehyde in 2007 and a 90-L diesel spill to the ground in 2010. One fuel oil spill and leak record was identified for this location. A diesel spill in 2010. Amount not noted.	Off-site	Yes	APEC-10	PCA is located upgradient of the Site.	PAH, PHC, VOC
57 - Vehicles and Associated Parts Manufacturing	50	Arvin Meritor Canada, an automobile and light duty motor vehicle manufacturer, was listed at 350 First Gulf Blvd as a waste generator for paint/pigment/coating residues, petroleum distillates, oil skimming's and sludges, organic laboratory chemicals, waste oils and lubricants, and organic acids (2004 to 2010). The property was also listed with NPRI for storage of various VOCs and the release of particulate matter	Off-site	Yes	APEC-08	PCA is located upgradient of the Site.	PAH, PHC, VOC
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	51	Mascot Truck Parts - Reported as a used motor vehicle parts and accessories wholesaler and distributor at 350 First Gulf Blvd which was listed as a waste generator of waste oils and lubricants, paint/pigment/coatings residues, petroleum distillates, and oil skimming's and sludges.	Off-site	Yes	APEC-08	PCA is located upgradient of the Site.	PAH, PHC, VOC
57 - Vehicles and Associated Parts Manufacturing	52	Meritor Aftermarket Canada, Inc. , an automobile and light duty motor vehicle manufacturer, (2010 to 2016) was listed at 350 First Gulf Blvd as a waste generator for oil skimming's and sludges, waste oils and lubricants, petroleum distillates, and paint/pigment/coating residues.	Off-site	Yes	APEC-08	PCA is located upgradient of the Site.	PAH, PHC, VOC
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	53	Waste Generator Records - 4 records for Peel Board of Education (1976 to 1998) for petroleum distillates, laboratory chemicals, oil skimming's, and waste oils.	Off-site	No	NA	PCA is greater than 150 m from the Site.	NA
49 - Salvage Yard, including automobile wrecking	54	Automobile Wrecker Records at 14 Casper Cres. Had 2 Records for ATL Towing and Scrap Car Removal.	Off-site	Yes	APEC-08	PCA is located upgradient of the Site.	PAH, PHC, metals, ABN, VOC
40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agen	55	Pesticide Registry listed one record for MB's Garden Maintenance and Service at 82 Hartford Trail. No operator number was included in the record.	Off-site	No	NA	PCA is greater than 150 m from the Site.	NA
30 - Importation of Fill Material of Unknown Quality	56	Fill was encountered below the topsoil in the most of referenced historical boreholes in the study area. The thickness or the fill ranged from about 0.8 m to 8.0 m.	Onsite	Yes	APEC-02	PCA is located upgradient of the Site.	PAH, PHC, ABN, metals
43 - Plastics (including Fiberglass) Manufacturing and Processing	57	JJF Dynamic Tool Inc was listed at 1530 Drew Road in Scotts Manufacturing Directory as a plastics products facility and industrial moulding facility. JJF Dynamic Tool Inc was listed at unit 25 of 1530 Drew Road as a waste generator of oil skimming's and sludges, waste oils and lubricants, and emulsified oil from 1999 to 2022.	Off-site	No	NA	PCA is located cross-gradient and great than 150 m from the Site.	NA

Table 7-2. Potentially Contaminating Activities within the Phase One Study Area  
Phase One Environmental Site Assessment, Etobicoke Creek Trunk Sewer Project, Brampton and Mississauga, Ontario

PCA <sup>a</sup>	Unique PCA ID	Descriptions of PCAs	Location of PCA <sup>b</sup>	PCA Results in APEC	Resulting APEC	Rationale	COPCs
10 - Commercial Autobody Shops	58	Commet Towing, listed at 1530 Drew Road #26, was identified as a vehicle towing and other vehicle services business. Commet Towing was listed as a waste generator of petroleum products and waste oils and lubricants. Alumni Bunk Corporation was listed at unit 23 at 1530 Drew Road in Scotts Manufacturing Directory as motor vehicle body manufacturing. Aux Generators Inc was listed in Scotts Manufacturing Directory at unit 18 of 1530 Drew Road as a motor and generator manufacturing and motor vehicle electrical and electronic manufacturing. Can_am Hydraulics Products Ltd was listed at unit 23 of 1530 Drew Road as current-carrying wiring devices and industrial supplies.	Off-site	No	NA	PCA is located cross-gradient and great than 150 m from the Site.	NA
34 - Metal Fabrication	59	D&A Mould and Die limited., was listed at 1530 Drew Road, Unit 20. D&A was listed as a waste generator from 2002-2004. D&A Mould and Die Ltd was also listed in Scotts Manufacturing Directory as a machine shop and other metal work Machinery Manufacturing. Ray-Lifts Inc was listed at unit 20 of 1530 Drew Road as a commercial and industrial machinery repair and maintenance facility (Except automotive and electronic) facility. Ray lifts was listed as a waste generator of waste oils and lubricants and petroleum distillates from 2013 to 2014.	Off-site	No	NA	PCA is located cross-gradient and great than 150 m from the Site.	NA
33 - Metal Treatment, Coating, Plating and Finishing	60	Flo Components Limited, was listed at unit 21 of 1530 Drew Road as a repair service facility. Flo Component was listed as a waste generator of petroleum distillates and halogenated solvents from 1990 - 2001. Flow Components Ltd was listed in Manufacturing Directory as a general industrial machinery and equipment or industrial machinery and equipment facility. Gal Power Systems Toronto Ltd was listed at unit 22 1530 Drew Road, as other repair services. Gal Power was listed from 2001 to 2006 as a waste generator of aliphatic solvents, petroleum hydrocarbons, and waste oils and lubricants. Gal Power Systems reported a 30 litre spill of diesel fuel in 2005 and 80 litres of oil from a tank in 2006. Infinity Assets was listed at 1530 Drew Road as a waste generator of waste crank oils and lubricants in 2019.	Off-site	No	NA	PCA is located cross-gradient and great than 150 m from the Site.	NA
42 - Pharmaceutical Manufacturing and Processing	61	Seafood Pharmaceuticals was listed at 1530 Drew Road as general warehouse and storage. Seafood Pharmaceuticals was listed as a waste generator from 2006 to 2021 of pharmaceuticals.	Off-site	No	NA	PCA is located cross-gradient and great than 150 m from the Site.	NA
Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	62	Waste Generator Records were listed for 1600 Drew Road with 2 records for Canadian Bearings Ltd. (2005 to 2019) for solvents, oils, petroleum distillates, and laboratory chemicals.	Off-site	No	NA	PCA is not hydraulically connected to the Site (other side of Creek)	NA
28 - Gasoline and Associated Products Storage in Fixed Tanks	63	Various Fuel Stations were identified at 6995 Dixie Road. Fuel Tank Records included the following: 10 records for expired fuel safety facilities for Tamim Gas Bar (liquid fuel tanks) were identified. 1 record for a private and retail fuel storage tank for Dixie Derry Self Serve Gas Bar (1996). 1 record for retail storage tanks were identified for Petro Canada. 4 records for fuel storage tanks for Suncor Energy Products Partnership. Three records were identified for double-walled fiberglass gasoline USTs that were installed in 2006 and had capacity of 50,000. One record was identified for a double-walled fiberglass diesel UST that was installed in 2006 and had a capacity of 50,000. Two historical fuel tank records for Tamim Gas Bar were identified. One record lists 5 single-walled USTs from 1989, listed as removed. Four of the USTs were listed as gasoline with a capacity of 27,280. The final USTs was listed as diesel with a capacity of 36,370. The second historical fuel tank record identified also lists 5 USTs that match the description of the Suncor Energy USTs. Spill of unknown quantity of gasoline at Petro Canada station in 2017. The TSSA listed 5 expired liquid fuel tanks at this address and four active liquid fuel tanks associated with a self serve	Off-site	No	NA	PCA is not hydraulically connected to the Site (other side of Creek)	NA
56 - Treatment of Sewage equal to or greater than 10,000 litres per day	64	Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Storage of contaminated soil • Metals impacts in soils in garden plot area	Off-site	Yes	APEC-12	PCA is located downgradient but directly adjacent to the Site.	PAH, metals
28 - Gasoline and Associated Products Storage in Fixed Tanks	65	Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Former UST-residual fuel impacts • PHC impacts at former chlorine contact chambers • Active UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons	Off-site	Yes	APEC-12	PCA is located downgradient but directly adjacent to the Site.	PHC, BTEX
55 - Transformer Manufacturing, Processing and Use	66	Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Potential former PCB-containing transformer • Improper storage of PCB ballasts • Storage of contaminated soil	Off-site	Yes	APEC-12	PCA is located downgradient but directly adjacent to the Site.	PCB, PAH
30 - Importation of Fill Material of Unknown Quality	67	Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Unknown fill quality related to area of former septic and sewage system treatment area • Metals impacts in soils in garden plot area • Storage of contaminated soil	Off-site	Yes	APEC-12	PCA is located downgradient but directly adjacent to the Site.	PAH, PHC, ABN, metals
8 - Chemical Manufacturing, Processing and Bulk Storage	68	Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons	Off-site	Yes	APEC-12	PCA is located downgradient but directly adjacent to the Site.	metals, ORP (Hg, Cr6, CN)

<sup>a</sup> PCA is a potentially contaminating activity as defined by O.Reg. 153/04.

<sup>b</sup> PCAs were defined as "other" if PCA was not listed in Table 2, Schedule D of O. Reg. 153/04.

<sup>c</sup> Refer to Figure 2 for PCA locations.

<sup>d</sup> As noted in the *Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the Environmental Protection Act* March 9, 2004, amended as of July 1, 2011.

Notes:

APEC = area of potential environmental concern

AST = aboveground storage tank

ELE = EcoLog ERIS Database Search

ID = identification

L = litre(s)

m = metre(s)

O. Reg. = Ontario Regulation

PCA = potentially contaminating activity

PCB = polychlorinated biphenyl

PHC = petroleum hydrocarbon

UST = underground storage tank

WWTP = wastewater treatment plant

Table 7-3. Areas of Potential Environmental Concern

Phase One Environmental Site Assessment, Etobicoke Creek Trunk Sewer Project, Brampton and Mississauga, Ontario

APEC ID <sup>a</sup>		Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity <sup>b</sup>	Location of PCA (Onsite or Offsite)	Contaminants of Potential Concern <sup>c</sup>	Media Potentially Impacted (Groundwater, Soil and / or Sediment)
APEC-01	Former Pesticide Use - Aerial photographs show that large portions of the Phase One Property were agricultural from before 1945 until at least 1975.	whole property	40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	Onsite	OCF	soil and groundwater
APEC-02	Fill of unknown quality - Fill was encountered below the topsoil in the most of referenced historical boreholes in the study area. APEC-11	Offsite PCA that result in an APEC: Frito-Lay Canada/PepsiCo Canada, located at 12 Clipper Court, was identified as a specialty-Line Food Wholesaler-Distributor in Scotts Manufacturing Directory. 13 records for Frito-Lay Canada/PepsiCo Canada (2002 to 2022) as a waste generator of oil skimmings and sludges, petroleum distillates, waste oils, and lubricants.	third work area (From the east)	Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	Offsite	PAH, PHC	groundwater
APEC-12	Offsite PCA that result in an APEC: -Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns, UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons -Various business were listed as couriers, including Company 6586856 Canada Inc, DHL Express Canada Limited, Loomis Courier Services and Mayne Logistics Loomis Inc. Company 6586856 Canada Inc, was listed with a total of 9 records (2010 to 2022) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. DHL Express Canada Limited was listed with a total of 2 records (2003 to 2009) for waste generation of halogenated pesticides, aliphatic solvents, other specified inorganics, petroleum distillates, pharmaceuticals, detergents/soaps, light fuels, paint/pigment/coating residues, waste oils and lubricants, aromatic solvents, non-halogenated pesticides, alkaline wastes - other metals, organic laboratory chemicals, and/or other inorganic acid wastes. Loomis Courier Services and Mayne Logistics Loomis Inc was listed with 2 records (2001 and 2002) for waste generation of inorganic laboratory chemicals, aromatic solvents, aliphatic solvents, petroleum distillates, waste oils and lubricants, and organic laboratory chemicals. -Clark Transport Inc was listed at 201 Westcreek Blvd as a general freight trucking company. A total of four records (2016 - 2021) for waste generation of miscellaneous waste organic chemicals, light fuels, and/or miscellaneous waste organic chemicals. -12 records for Transex Ltd. (2001 to 2019) for various contaminants, including inorganic wastes, solvents, petroleum distillates, fuels, and heavy metals. -(four instances): Aboveground storage tank - petroleum. No other information provided. -Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Former UST-residual fuel impacts • PHC impacts at former chlorine contact chambers • Active UST - failed cathodic system (1981) reported to have a capacity of 2,000 gallons -Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Unknown fill quality related to area of former septic and sewage system treatment area • Metals impacts in soils in garden plot area • Storage of contaminated soil - F-H Welding Machines Ltd was listed at 150-201 Westcreek Blvd as a waste generator of petroleum distillates, waste crankcase oils and lubricants, and/or emulsified oils. - Three records for Ministry of Environment, Conservation and Parks (2007 to 2011) for PCBs and waste oils and lubricants. -Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Potential former PCB-containing transformer • Improper storage of PCB ballasts • Storage of contaminated soil -Former Brampton WWTP was located at 220 Westcreek Blvd. Historical reports identified the following environmental concerns: • Storage of contaminated soil • Metals impacts in soils in garden plot area -ABB Inc. (1954 to 1963) was listed at 201 Westcreek Blvd in Scotts Manufacturing Directory for chemical machinery manufacturing, wire manufacturing, and automobile vehicle manufacturing. ABB was also listed as a waste generator with 15 records (2000 to 2021) for paints pigment coatings, waste oils, resins, oils, and other metals and chemicals. -Other: Spills Record - DHL Express Canada Ltd reported a spill of 2 L of Gasoline to catch basin July 29, 2008. -Other: Waste Generator Records - Artic Westcreek Ltd, a real estate property manager located at 201 Westcreek Blvd, was listed in 2015 as a waste generator of oil skimmings and sludges.	fourth work area (from the east)	PCA # 8 - Chemical Manufacturing, Processing and Bulk Storage PCA # 11 - Commercial Trucking and Container Terminals PCA # 11 - Commercial Trucking and Container Terminals PCA # 11 - Commercial Trucking and Container Terminals PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks PCA # 30 - Importation of Fill Material of Unknown Quality PCA # 34 - Metal Fabrication PCA # 55 - Transformer Manufacturing, Processing and Use PCA # 55 - Transformer Manufacturing, Processing and Use PCA # 56 - Treatment of Sewage equal to or greater than 10,000 litres per day PCA # 57 - Vehicles and Associated Parts Manufacturing Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	Offsite	PHC, BTEX, PAH, metals, VOC, PCB, ABN, ORP (Hg, Cr6, CN)	groundwater

Table 7-3. Areas of Potential Environmental Concern

Phase One Environmental Site Assessment, Etobicoke Creek Trunk Sewer Project, Brampton and Mississauga, Ontario

APEC ID <sup>d</sup>	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity <sup>b</sup>	Location of PCA (Onsite or Offsite)	Contaminants of Potential Concern <sup>c</sup>	Media Potentially Impacted (Groundwater, Soil and / or Sediment)	
APEC-13	Offsite PCA that result in an APEC: - Hydro One Networks Inc is listed at 7365 Tomken Road as electric power distribution center and a waste generator. A total of six records were listed (2015 to 2021) for generation of oil skimming's and sludges. - Various Numbered Ontario Companies was registered at 7280 Dixie Road as a waste management system and industrial sewage works. - Other: Waste Generator Records - 8 records for UTI Contract Logistics & Distribution (2010 to 2018) for solvents, heat metals, and laboratory chemicals.	fifth work area (from the east)	PCA # 18 - Electricity Generation, Transformation and Power Stations PCA # 58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners Other - Activity not defined in O. Reg. 153/04 Table 2 of Schedule D	Offsite	PAH, PHC, VOC, metals, ABN, ORP (Hg)	groundwater
APEC-14	Offsite PCA that result in an APEC: - Various trucking companies were listed at 7280 Dixie Road. A total of three waste generator records for Autlink Express (2010 to 2013) for waste oils, 5 records for 4 Refuel (2014 to 2019) for light fuels, and 4 records for 2253457 Ontario Inc. were reported for waste oils and sludges and light fuels (2006 to 2022). - 7 records for fuel storage tanks for Aecon Utilities (2 records) and 2215296 Ontario Inc. (5 records). Additionally, two historical fuel tanks were identified for Aecon Utilities. For Aecon Utilities, two records for two diesel, steel, double-walled USTs were identified. The USTs were installed in 2001 with a capacity of 11,350 each. The historical fuel tanks match the same description. For 2215296 Ontario Inc., five records for three diesel and two gasoline fiberglass, double walled USTs. All five USTs were installed in 2012. The three diesel and one gasoline USTs have a capacity of 90,000 and one gasoline tank has a capacity of 65,000. - Corrosion Free North America Inc. (1979) was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a paint and coating manufacturing. - EAZE OUT (no date) -was listed in Scotts Manufacturing Directory at 7280 Dixie Road as a soap and cleaning compound manufacturing business.	Sixth work area (From the east) and towards the east to Dixie Road	PCA # 11 - Commercial Trucking and Container Terminals PCA # 28 - Gasoline and Associated Products Storage in Fixed Tanks PCA # 39 - Paints Manufacturing, Processing and Bulk Storage PCA # 50 - Soap and Detergent Manufacturing, Processing and Bulk Storage	offsite	PHC, BTEX, PAH, metals, ABN	groundwater

Notes:

<sup>a</sup>APEC means the area on, in, or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One Environmental Site Assessment, including through (a) identification of past or present uses on, in, or under the Phase One Property; and (b) identification of PCAs.

<sup>b</sup>PCA means a use or activity as set out in Column A of Table 2 of Schedule D of O. Reg. 153/04 that is occurring or has occurred in a Phase One Study Area.

<sup>c</sup>Contaminants of potential concern were identified using the Method Groups as identified in the Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the *Environmental Protection Act*, March 9, 2004, amended as of July 1, 2011. Include the following AP Method Groups: Metals, hexavalent chromium, mercury, PAHs, PCBs, PHCs, and VOCs.

<sup>d</sup> Refer to Figure 7-2 for APEC locations.

ABN = acid, base, neutral compounds  
APEC = area of potential environmental concern  
AST = aboveground storage tank  
BTEX = benzene, toluene, ethylbenzene, xylenes  
Cl = chloride  
CN = cyanide  
Cr = chromium  
EC = electrical conductivity  
ERIS = Environmental Risk Information System  
FIP = fire insurance plan  
Hg = mercury  
ID = identification  
L = litre(s)  
m = metre(s)

metals = O. Reg. 153/04 complete metals scan  
O. Reg. = Ontario Regulation  
OCP = organochlorophosphate  
offsite = within the Phase One Study Area  
onsite = Phase One Property  
ORP = other regulated parameter  
PAH = polycyclic aromatic hydrocarbons  
PCB = polychlorinated biphenyl  
Phase One Property = from Kennedy Road South, across Highway 410 and 407, and just past Dixie Road to Derry Road.  
Phase One Study Area = properties within 250 m of the Phase One Property  
PHC = petroleum hydrocarbon  
UST = underground storage tank  
VOC = volatile organic compound

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.
