

**Flora Local Ranking Codes**  
L1 = Unable to withstand disturbance; many criteria are limiting factors; generally occur in high quality natural areas in natural matrix; almost certainly rare in the TRCA jurisdiction; of concern regionally.  
L2 = Unable to withstand disturbance; some criteria are very limiting factors; generally occur in high-quality natural areas, in natural matrix; probably rare in the TRCA jurisdiction; of concern regionally.  
L3 = Able to withstand minor disturbance; generally secure in natural matrix; considered to be of regional concern.  
L4 = Able to withstand some disturbance; generally secure in rural matrix; of concern in urban matrix  
L5 = Able to withstand high levels of disturbance; generally secure throughout the jurisdiction, including the urban matrix. May be of very localized concern in highly degraded areas  
L+ = Exotic; not native to the TRCA jurisdiction; includes hybrids between a native species and an exotic  
L+? = Origin uncertain or disputed, i.e. may or may not be native  
LX = Extirpated from our region with remote chance of rediscovery. Presumably highly sensitive.  
LH = Hybrid between two native species; not scored; a hybrid that is highly stable and behaves like a species (e.g. Equisetum x nelsonii) is not given this designation, but is scored and ranked.
