

MISSISSAUGA ROAD, OLD MAIN STREET, BUSH STREET, WINSTON CHURCHILL BOULEVARD AND OLDE BASE LINE ROAD MUNICIPAL CLASS EA STUDY

COMMUNITY WORKING – ROLES AND RESPONSIBILITIES

We have now expanded the limits of the 2009 Environmental Assessment (EA) for Mississauga Road and Bush Street to include Olde Base Line Road from Mississauga Road to Winston Churchill Boulevard, and Winston Churchill Boulevard from Olde Base Line Road to Bush Street.

The Notice of Commencement for the expanded study area was published in various local newspapers in the week of July 9 and will be published again in the week of July 23, 2012.

The Process:

The purpose of the EA process is to provide everyone who has an interest or stake in the study area with the opportunity to provide input in creating the best solution for the corridor. With your input, we will:

- define the problem statement;
- develop and evaluate planning alternatives; and
- determine a preferred solution.

COMMUNITY WORKING GROUP

PURPOSE: The purpose of the Community Working Group (CWG) is to:

- bring together a broad group of people with varied interests to represent the views of the community; and,
- provide input to help us develop a solution for the study area that meets everyone's needs and is technically and financially sound.

MANDATE: The mandate of the CWG is to:

- share knowledge of the study area, road users and community character;
- be informed and engaged by asking questions throughout the process;
- help us identify community issues relating to road use and potential solutions; and
- receive and return feedback from others outside the CWG as issues and ideas come together and serve as a link between the project team and the community.

PARTICIPATION:

We want participation from a wide range of people that represent organizations, associations, residents and businesses within and close to the study area to provide a balanced viewpoint. We think a CWG of approximately 16 members will allow good representation from various areas of interest, skills and knowledge. Once we have received confirmation from everyone interested in participating we will form the group. We may have to narrow the selection down if the number of requests exceeds the maximum size.

If you participate in the CWG and cannot attend a meeting, you can send some one else to attend as long as they are pre-registered with us. The CWG will not hear any public delegations.

CWG CHAIR

An independent professional facilitator will chair the CWG meetings. The facilitator will plan the agendas and coordinate activities of the CWG. The facilitator will also provide meeting process rules and other procedures related to keeping the meetings on track.

MEETING ORGANIZATION

The CWG will meet approximately two times between the period of August 2012 and February 2013. The meetings will be conducted in a manner as to create an environment for constructive dialogue with the participants. We will present some technical information when required during the

CWG meetings will engage a broad group of people with varied interests that represent the views of the community in a more in-depth level of discussion than what is normally available through the Public Information Centre process.

The CWG will help to identify opportunities and issues in the study area and help us plan alternatives through two workshop meetings over the course of the project.

An independent professional facilitator, selected by us will chair the CWG meetings.

Everyone will have the opportunity to be heard and different viewpoints respected.

The CWG is a non-voting group that will make recommendations to the project team for consideration.

The decision-making process resides with the Peel Region Project Team, which will include consideration of the CWG's recommendations.

meetings. Presentations will be focused to ensure maximum opportunity for discussion. An agenda and related information will be sent before each meeting.

Everyone will have an opportunity to be heard and different viewpoints will be respected. We propose that the meetings take place in the evening from approximately 6:00 to 9:00 p.m. The total number of meetings, their location, and timing can be refined with the participants once the group is formed.

DECISION-MAKING

The CWG is a non-voting group that will make recommendations for the study area to the project team for consideration. The CWG will try to come to consensus when making recommendations. Consensus means that each participant has had the opportunity to be heard and understands the recommendation being put forward, though not necessarily agreeing with them. The final decision-making process always stays with Peel Region project team.

MEETING NOTES

Meeting notes will be prepared following each meeting and sent to the participants with two weeks for review and corrections before being posted on the study web site.
