

## Purpose

- To engage community residents in local planning
- To influence the built and natural environment through a formal feedback process, and,
- To improve walkability

In November 2018 members of the Community Working Group participated in Peel Public Health's walking audit program. The audit involved a walk-about over 3 km along Airport Road from Emma Street to Walker Road, and on Old Church Road From Airport Road to the Caledon Community Centre Complex.

A workshop with a mapping exercise and facilitated discussion followed the walkabout. Results are being considered in the Environmental Assessment and will be presented at the next Public Information Centre.
