

We want your **input!**

The Region of Peel is developing a financial plan for water and wastewater services. This will help us make decisions about how we charge for these services in the future.

As we review how we charge for water and wastewater our goal is to ensure:

- You continue to receive high-quality water
- You can rely on our water and wastewater infrastructure
- We can pay for the necessary repairs, replacements, and upgrades
- Rates are fair and we charge in a way that provides good value

Your input is important, so we are hosting an online open house and encourage you to share your feedback at peelregion.ca/share. We look forward to hearing from you!
